

From the Boston Mercantile Journal.
RECIPE FOR MAKING CAKES.
VERIFIED BY S. A. A.

If there's a lady in this learned land,
Upon her tea-board wishes something grand,
Let her take this advice:
Here is a cake, whose flavor, past dispute—
The most delicious palate needs must suit;
Try it—'tis very nice.

Two pounds of flour from freshly gathered wheat,
One half a pound of butter that is sweet,
White sugar of the same weight,
A pint of milk, three eggs, a little yeast—
Such 'tis fresh, 'tis said, is always best
A relish to create.

Part of the flour and milk and yeast mix well,
And let it stand till it hath plainly tell
'Tis as the other—light;
The butter then, the eggs and sugar stir
Together nicely—as you would prefer
A pound cake on bridal night.

This last along with balance of your flour,
To the first mixture you should gently pour,
And let them once more stand,
That the grand compound may become so light,
The merest glance assures you it is right;
Then put it in the pan.

To rise your cakes fit for a courtier's table,
Requires, I judge, as near as I am able—
Five hours or thereabout;
Then will you have, or I'm no judge, I ween—
As wholesome comfits as were ever seen,
For leave or for rout.

P. S. A lady at my elbow hints,
That as a stitch improves a rent in skins,
Salt makes the dough less tough,
Use it or not, I deem is little matter,
Since cakes like comfits, never need be better,
When they are good enough.

PARAGRAPHS UPON HEIGHTS.—Height of
Absurdity.—To call at the "Eye and Ear
Infirmary" to get an eye drilled into a broken
knitting needle.

Height of Folly.—To get drunk and lie
across the rail-road for repose.

Height of Iniquity.—To climb the
house-top, and look down chimney to see
what one's neighbor has for dinner.

Height of Civility.—To run against a
post in the street, and then beg pardon for
the encounter.

Height of Gallantry.—When intoxicated,
to reel along the street with a lady under
your arm, to escort her safely home.

Height of Honor.—To defraud one's
landlord or tailor for the sake of discharging
one's gambling debts.

Height of Temperance.—To keep one's
skin constantly soaked in ardent spirits,
without ever getting drunk.

Height of Philosophy.—To starve one's
self to death in order to illustrate the
beneficial effects of the Graham system.

Height of Benevolence.—To tumble down
the staircase and break your head to avoid
stepping on a kitten that is reposing on the
step.

Height of Charity.—To give a door bender
a dollar, and at the same time threaten to
horse-whip him if he ever troubles you again.

Height of the Ridiculous.—After being
tumbled down a precipice in a stage-coach
full of passengers, amidst the shrieks and
groans and fainting, to hear a lady with
tears in her eyes, inquiring for her hand box.
Bost. Post.

A POETICAL GENIUS.—Recently, in
Glasgow, a poetical genius was hailed up
before a police magistrate for kissing a
girl and kicking up a dust, when the follow-
ing poetical dialogue ensued:

Magistrate—Is your name John Jay?
Prisoner—Yes, your honor, so the peo-
ple say.

Magistrate—Was it you that kissed the
girl and raised the alarm?
Prisoner—Yes, your honor, but I thought
it no harm.

Magistrate—You rascal! did you come
here to make rhymes?
Prisoner—No, your honor, it will happen
so sometimes.

Magistrate—Be off, you scamp; get out
of my sight.

Prisoner—Thank your honor, then I'll
bid you good night!

RETORT CLERICAL.—At a convention of
clergymen some years since, it was proposed
by one of the members, after they had
dined, that each should entertain the com-
pany with some interesting remarks.
Among the rest, one drew upon his fancy,
and related a dream. In his dream he
went to heaven, and he proceeded to relate
what he saw there, describing the golden
streets, the river of life, &c. &c. As he
concluded, one of the divines, who was
somewhat noted for his penurious and
money-saving habits, stepped up to the
narrator, and inquired jocosely, "Well,
did you see anything of me in your dream?"
"Yes," "Indeed! what was I doing?"
"O, you were on your knees." "Praying,
was I?" "No; scraping up the gold!"

NEW GOODS.
SYDNEY BARLOW has received his
Fall and Winter supply of Goods, and
respectfully invites the public to call and
see them.
Pearl-st., Burlington, Nov. 11, 1836.

RUSSELL'S STOMACH BITTERS.
May be used in Wine or Water.
THESE celebrated bitters are com-
posed purely of vegetables of the most
innocent yet specific virtues. They are
recommended particularly for restoring
weak constitutions, cleansing the stomach
and increasing the appetite—also a preven-
tive against the cholera morbus, fever,
and ague, removing nausea, vomiting
heart burning, weakness in the breast-
pain in the stomach and other symptoms of
flatulence and indigestion. One box will
tincture one gallon. Price 25 cents a box.

Russell's Itch Ointment.
This choice and safe ointment is said to
be superior to any now in use, for that dis-
agreeable and loathsome disease, the ITCH.
This ointment is so certain in its operation
that no person troubled with the above
disorder ought not to be without it. It is
a remedy for cutaneous eruptions, scorbu-
tic affections of the head, or any other
breaking out which arises from sharp hu-
mors in the blood. Price 25 cents a box.

**Russell's Vegetable Biliious
PILLS,**
OR FAMILY PHYSIC.
FOR general use, in cases of Jaundice,
morbid sensibility of the stomach and bow-
els, loss of appetite, fetid breath, costive-
ness, Piles, and all diseases arising from
biliary derangements—also for correcting
the state of the blood, and cleansing the
system of foul and viscid humors. These
pills are a mild cathartic, producing neither
pains nor griping, and are therefore a valu-
able and highly approved medicine, and
are pronounced as such by the most dis-
tinguished physicians.—Each box con-
taining 38 Pills. Price 27 1-2 cents a box.

**Russell's Celebrated
Salt Rheum Ointment.**
THIS is unquestionably the best and
safest remedy ever yet offered to the pub-
lic for that obstinate disorder SALT
RHEUM. Where other means have fail-
ed, it has succeeded, and the fact that it
has been extensively used by eminent
Practitioners speaks volumes in its praise.
It is equally efficacious in all diseases of
the skin, ring worms, and the most invete-
rate Itch, &c. &c. Numerous certificates
might be obtained, but the proprietor
chooses that a fair trial should be the only
evidence of its superior efficacy.
Price 50 cents a box.

**Compound Syrup
ICELAND MOSS.**

For the cure of
Colds, Asthma, Whooping Cough, spitting of
Blood and Consumptions.

ICELAND MOSS grows plentifully in
the Island of Iceland, from whence it takes
its name, and in all the high northern lati-
tudes of Europe and Asia, where its Medicinal
qualities have been long known, and highly
appreciated. This plant contains a larger
proportion of Vegetable Mucilage than any
other known substance, and in combination
with it is a bitter principle which acts most
beneficially in giving strength in cases of great
weakness and debility of the lungs. The
knowledge of many of our most valuable me-
dicines, for the cure of diseases, have been ob-
tained from observing their effect on brute
animals—so in the case of this most invaluable
Moss. Its virtues were first discovered by
their effects on the hardy, long-lived and
sagacious Rain Deer, which derives its prin-
cipal nourishment from the Iceland Moss, and
whose milk becomes so highly imbued with
its Balsamic virtues, that it is used with the
greatest confidence as a sovereign remedy by
the inhabitants of all those countries for the
cure of all diseases of the breast and lungs. In
France, this compound has long been known,
and extensively used; and its salutary effects
as much as to the salubrity of the climate, is
probably owing to the very small number
of fatal cases of consumption in that country,
compared with Great Britain and the United
States. This Syrup contains all the medicinal
virtues of the Moss in the most concentrated
form, and is prepared from the original receipt
from Paris, only by
E. HUTCHINGS & CO, Baltimore

And none is genuine unless it has their fac-
simile upon each bill of direction also upon the
envelope, and sealed with their seal.

**IMPROVED
ROTARY STOVE.**
THE Subscriber would just say to the
public, that he has received a large
quantity of the Improved Rotary Stove, of
different sizes and will keep them constan-
tly on hand at his Store, North side of
Court House Square.

Also, Parlor, Box and other cook Stoves,
of different Patterns.
Also, second hand Stoves to sell or Rent,
cheap—also Pipe, stove trimmings, &c.
I would here remark that in consequence
of the rapid sales that attended the Im-
proved Rotary Stove the last season, it was im-
possible to manufacture them so as to sup-
ply over one half of the calls; but the pub-
lic may be under no apprehension on that
point this season, as I have over four times
the amount now manufactured, that I had
last season at this time, so that people from
a distance may come without fear of disap-
pointment. I here omit a long list of Re-
commendations, believing that the Im-
proved Rotary Stove has been sufficiently test-
ed, to recommend itself in this vicinity.

The improvements that we have made
upon the Stove for the last season are valu-
able; we now make the fire Plate nearly
three times the weight of those last year
and turn the friction Rollers on which the
cap rests, and various other improvements
not necessary to mention.

The Stoves are Cast at the foundry of
John D. Ward, and from the best Scotch
and Monkton Pig, and are not surpassed, if
equalled, for smoothness and beauty of fin-
ish, in this section of the country.

N. B. I have recently seen a few stoves
in this vicinity called Improved Rotary
Stoves, that have no friction rollers under
the cap, but turn upon a pivot in the same
manner that I first fixed mine; but after
using mine in that shape one year, I found
that it did not answer my expectation. I
discovered that heating the stove caused it
to turn very hard, especially when the
stove was loaded—when there was a kettle
or boiler of water upon the top it was al-
most impossible to turn it without spilling
the water. I did not at first understand
the reason, as it would turn easy when
cold, but finally ascertained that by heat-
ing the stove it softened the iron, and as
the boiler would rest upon one side, it
caused so much friction that it was impos-
sible to use them with safety or conven-
ience, and in order to get rid of this fric-
tion I have placed under the outer edge of
the cap friction rollers, and have them
turned so as to be perfectly true and
smooth. The few stoves above referred to
are not made at Ward's Foundry, neither
are they made from pig or remelted iron,
but from the raw ore, and the plates con-
sequently are more porous and stogy;
and the back fire plate is not more than
half the thickness of mine. Any person
can very easily tell my stove, or those
made at Ward's, by the friction rollers, as
we make no others.

W.M. BLAKE.
Burlington, Oct. 1 1836.

Ash Timber.
WANTED for the use of the Windmill
Patent Block Mills, and to be deliv-
ered at that establishment in the course of
the ensuing winter, the following descrip-
tions of White Ash Plank, sawed to the
given dimensions, square edged, sound and
free from knots, shakes or heart wood.

| No. of feet, board measures. | Width, inches. | Least thickness to work. | Greatest thickness received. |
|------------------------------------|-------------------|--------------------------------|------------------------------------|
| 20,000 | 7 | 1 1/2 | 1 1/2 |
| 25,000 | 8 | 1 1/2 | 1 1/2 |
| 20,000 | 9 | 1 1/2 | 1 1/2 |
| 16,000 | 10 | 1 1/2 | 1 1/2 |
| 15,000 | 11 | 1 1/2 | 2 |
| 10,000 | 12 | 1 1/2 | 2 |
| 10,000 | 13 | 2 | 2 1/2 |
| 6,000 | 14 | 2 1/2 | 2 1/2 |
| 4,000 | 14 | 2 1/2 | 2 1/2 |

—A L S O—
Wanted, one thousand WHITE ASH
LOGS—the standard log to be 22 inches
diameter and fourteen feet long, sound and
free from knots or shakes—to be delivered
at the Mill during the ensuing winter, or
at the wharf at Burlington in the month of
May, 1837.
GUY CATLIN.

New Goods—Sept. 8.
COMPOUND Chlorine Tooth Wash.
The discovery of the chloride of Soda &
its use by Labarraque of Paris, was an ad-
dition to the resources of medicine of the ut-
most importance as a neutralizing agent. To
counteract at once the principle of decay,
which commencing imperceptibly, slowly
gathers strength, and finally destroys, is
the important service which can be derived
from the use of chloride of soda, when ad-
ministered with skill and care; the disor-
ders of the teeth being, in the great majority
of cases, the result of neglect, and a grad-
ual accumulation of the principle above
alluded to, it became obvious, from the
earliest experiment, that the chloride was
the proper remedy, and preferable to pow-
ders, dentrifices, &c. of whatever kind or
pretension. By a chemical analysis it will
be found that the greater part of the chlo-
rine compounds so extensively in use, do
not contain a particle of the chloride of
soda, on the agency of which their efficacy
must necessarily depend. The article here
advertised is confidently offered to the ex-
amination of the public, as possessing in an
eminent degree, the virtue of neutralizing
all that is offensive in the mouth and breath,
removing soreness and sponginess of the
gums, destroying the taste of tobacco, or
any other effluvia from whatever cause.—
In short, this preparation will be found to
justify the various commendatory notices
and recommendations it has received, where-
ever it has been introduced. Just received
and for sale at the Variety Shop.
PANGBORN & BRINSMARD.
Sept. 8, 1836.

Wool & Butter.
THE Subscribers will pay Cash for
Good Clean Fleece Wool, delivered
at their Store in Church Street.—They

beautiful patterns now opening and for
sale by
LATHROP & POTWIN.
Burlington Sept. 23, 1836.

Harvard University.
THE Medical Lectures at Harvard U-
niversity will begin at the Massachu-
setts Medical College in Mason-st. Boston,
the first Wednesday in November next, at
1.4 before 9, A. M. and will continue three
months. For one month after the end of
the course, lectures will be delivered in the
College, and the Dissecting Room will be
open to such students as may remain, with-
out additional fee. Such students may
also attend the Practice of the Massachu-
setts General Hospital.

Anatomy and Operations in
Surgery, Dr. Warren.
Chemistry, Dr. Webster.
Material Medical, Dr. Bigelow.
Midwifery and Medical Juris-
prudence, Dr. Channing.
Principles of Surgery and Clin-
ical Surgery, Dr. Hayward.
Theory and Practice of Physic, Dr. Ware.

Clinical Lectures will be delivered as
usual on the cases in the Massachusetts
General Hospital.
NEW DISSECTING ROOM.
A new Dissecting Room is now build-
ing, and will be finished before the Lectures
begin. It will occupy all the vacant land
east of the Medical College. Every care is
taken to make this important part of the
medical school as perfect as possible, so
that it may furnish to the student ample
facilities for prosecuting his Anatomical
studies. The legal enactments of the
state, so liberally and so wisely framed,
will be faithfully and thoroughly applied to
the accomplishment of their important ob-
jects.
WALTER CHANNING, Dean.
Boston, July, 1836.

Valuable Salve.
FOR Wounds, Bruises, or Sores of and
about the eyes, or those which have long
troublesome, an immediate cure for Burns of
Scalds, Salt Rheum, Chapped Hands, and the
best thing that I have ever known used for
Sore Eyes. It is also good for the St. Antho-
nia's Fire or Irricopula. I had a child very
much afflicted with it; I applied many things,
but to no effect until I made use of my Salve,
which cured her in one day by rubbing it on
the parts affected. In fact it may be used for
every thing of a sore nature to good effect and
with perfect safety, and no family ought to be
without it. It would be found very useful on
board of Steam Boats, or vessels of any kind,
where accidents may happen; especially, draws
as Scalds or Burns, for where applied, draws
out the pain immediately and heals the wound
quicker than any thing else I ever knew used.
In case of sickness, where persons are under
the necessity to have blisters drawn, this
Salve is the best application which can be
made after the fires are removed. If you
wish to have it draw immediately, spread it very
thin on linen; you need not other applica-
tion. Prepared and sold by J. RUTHER-
FORD, Burlington, Vt. Price 12 1-2 cents
per cake.

This may certify to all that it may concern,
that I have for about two years past, made use
of A. Rutherford's heal all Salve, in my fam-
ily, and I consider it preferable to any salve I
have ever known manufactured; its utility
will apply to fresh wounds, old sores, sore
eyes, scalds and burns. ELWOOD LARSEN.
I do hereby certify that I have made use of
A. Rutherford's Salve for nearly two years,
and I never found any thing ever equalled it
for a burn or scald, or a fresh wound; and for
sore eyes there is nothing that ever I tried
which will restore the eyes to their natural
state in so short a time as this Salve. I do
therefore recommend it for the benefit of man-
kind.
JOHN LOGAN.
Burlington, May, 1836.

The subscriber hereby certifies that for more
than a year past, in cases of wounds and bru-
ises, he has frequently made use of and expe-
rienced the salutary effects of A. Rutherford's
salve, and has also witnessed the same in oth-
ers, and must cheerfully recommend it as a
valuable salve.
E. W. SPEAR,
Shelburne, May, 1836.

We the undersigned have used A. Ruther-
ford's salve for more than a year, and have
known others to use it, and can recommend it
to be the best thing we ever knew for burns,
scalds, fresh wounds, bruises, or old sores of
any kind; and we further recommend it to be
superior to any thing else, for sore eyes; and
we do think A. Rutherford's salve ought to be
more publicly known for the benefit of man-
kind at large.
NATHANIEL HOWARD,
F. W. GRISWOLD,
LUCIUS HENDRICK.
Vergennes, May, 1836. 6mf3June

Utility.
THE public are hereby informed that
the subscriber has invented certain
new and useful machinery for manufactur-
ing starch from potatoes, and has applied
for a patent to secure his right to the same;
and that he is making said machinery at
his shop in Jerico, in the state of Vermont.
The object of said machinery is more effec-
tually to separate the small stones and
gravel from the potatoes in the process of
washing—and in the process of grinding, to
reduce the potatoes to a more perfect pulp,
by which a larger quantity of starch will be
obtained than by the usual method. Starch
manufacturers are invited to call and see.
SYLVANUS RICHARDSON.
Jerico, June 30, 1836.

FURS.
JUST received an assortment of fine
Outer Seal Caps, Hair Seal do. Also
Blk. and Grey Fur Capes, Fur Ties, &c.
LEMUEL CURTIS & Co.
October 21, 1836.

common sewing Needles; of Hemming &
Sons' Manufacture, just rec'd at the Vari-
ety Shop. PANGBORN & BRINSMARD.

September 1836.
Fall Goods at the Variety-shop.
WE are getting in our Fall Goods, all
things necessary to keep our assort-
ment in good order: Watches, Clocks,
perfumery, Tea-pots, Military Goods, Cas-
tore, Jewelry, Stocks, Collars, linen and
satin Bosoms, Lamp wicks, Toys, and an
endless variety of Fancy articles. All per-
sons are invited to call and look at them at
the Variety Shop.
PANGBORN & BRINSMARD.

**Medcalf's Patent Compound
Oil for Painting.**
A perfect substitute for Lined Oil for all
kinds of Painting, is offered to the public by
the subscribers with the fullest assurance of
its utility. It is now about eight years since
it was brought to its present state of perfec-
tion, and during that has been extensively
used & tested in every way which Lined Oil
is used for painting, for inside and outside
house painting, on brick and on wood, and
for coaches, signs, boats &c. As for spread-
ing and drying for inside work it is not sur-
passed, and for body, and durability in sit-
uations exposed to the sun and weather, it is
warranted far superior to the best Lined Oil
and being light colored renders it prefer-
able for white and all other delicate colors.
One of the first painting establishments in
this city [of more than twenty years standing]
say in their certificate "Having used Med-
calf's Patent Paint Oil do certify that more
surface and better painting can be done per-
fected, than when mixed with pure Lined Oil.
This oil forms a combining substance
when mixed with pure Leads that does not
decompose and rub off by exposure to the sun,
and by experience of two years, we are war-
ranted in saying that painting done with this
oil, will stand the weather much longer, and
remain unimpaired, when painting done in the
usual way will not, and for oil cloths, we think
it surpasses every thing that we ever used."
John N. Fassett has purchased the right to
make and vend the "Patent Compound Oil"
in the following States, viz: Pennsylvania,
New York, Massachusetts, Vermont, Connecti-
cut, New Jersey, South Carolina, Ohio,
Michigan, Illinois and Indiana, and cautions
all persons, against any infringement, as every
offence will be met with rigorous prosecution.
The price of the "Patent Oil" will be one
quarter less than Lined Oil. It is warranted
and sold wholesale and retail by
FASSETT, SELDEN & Co.
Dealers in Fruits, Oils, Varnish, &c. 201 River
street Troy N. Y. August 5, 1836.

Valuable Salve.

insurance will receive immediate attention.
WYLLYS LYMAN,

THE SICK MAN'S FRIEND.
Morison's Pills,
Or the real genuine Hygeian Universal Me-
dicine of the British College of Health, in
packages of 1, 2, or 3 dollars, can be ob-
tained in this town, only of the regularly
appointed Agent. As you value "health,
which is life," see that you get the genuine
Pills; they are signed S. Gage at present,
(but will soon be signed H. Fitch) State
Agent, and A. Brinsmaid, sub agent for
Burlington, Vt.—all others are base coun-
terfeits. For the convenience of the pub-
lic, they will be, with the Powders and a
Hygeian Book, kept at the Variety Shop.
A. BRINSMARD.
Agent for Burlington, Vt.
July, 6, 1836.

Gilt and Mahogany Frame
Looking Glasses, from 25 cts. to fifteen
dollars, for sale by
LOVELY & ABBOTT.
September 16, 1836.
