A GREAT BARGAIN.
A SCYTHE FACTORY AND MILL SITES, WITH GREAT WATER POWER.

THE subscriber will sell at a very low price, and on a credit of ten years, with interest at 5 per cent. per annum, that valuable property situated at the Great Falls of Salmon River, 3 miles south of Malone Franklin county, N. Y. consisting of a large and well built SCYTH FACTORY, containing two Trip Hammers, three Furnaces, and all the conveniences for a large business, with a coal House capable of containing 40,000 bushels, and a large and commodious Finishing Shop, built separate, and receiving wind for the free from the Factory—which building is well calculated for a Pocket Furnace, and could be easily arranged for that purpose. The dam and Machinery of the Factory are in good order, and the supply of water abundant and constant. Also attached to these buildings, about six acres of Land, forming a front on the Falls of the River of about 40 rods, with sites and water power sufficient for a large number of Mills. On the land there is a frame of a dwelling House, erected but not finished. All this property will be sold in one parcel at a great sacrifice from its cost, to any one who would put and keep the Factory in operation.
It presents a great chance for speculation to any young mechanic or manufacturer of enterprise, as it can be bought on a long credit, at a low rate of interest, and for a very small price. It is also an object of attention for a capitalist who would be willing to stock the Factory and have the Scythes manufactured on shares—as the business is profitable, and the prospective value of the great water privileges and mill sites is such, as to ensure a large profit to any person who should own it and give it the proper attention. The owner of the property offers it on these inviting terms, in hopes of introducing manufacturers—and thereby promoting the settlement of his lands in the immediate vicinity.
The Ogdensburg and Lake Champlain Rail Road, which will, without doubt soon be constructed, will run within eight miles of this property, and will add greatly to its value and importance for manufacturers.
For further particulars, enquire of the subscriber at Malone.

VERMONT HIVE.
THE subscriber having been appointed agent for Weeks' patent Bee Hive, gives notice that he is prepared to execute rights to individuals in Burlington or any other town in the state where no agency exists. A perfect model, with the fixtures, may be seen at this office—and to see is but to be convinced of its vast superiority over the old box. The attention of apiarists, and amateurs, is respectfully invited to this subject, particularly at the present season, before colonizing new swarms in the common hive. The peculiar advantages of Mr. Weeks' improvement are too numerous to repeat, and too obvious even to the unlearned observer, to need illustrating. Convenience, profit, humanity, all, are enlisted in its favor.
