The following words of Dr. Young form he text for my present discourse :-

Late sitting up has turned her roses white, Why went she not to bed? because 'twas night. My hearers,-in my last discourse I treated upon the beauties of morning, and hinted at the necessity of early rising. I will now nouch upon the loveliness, and solemness, of tight;—and show up the too prevalent practice of sitting up late. Night, my friends, was invented solely for the quiet repose of us, poor day worn mortals; instead of trespassing upon the sacredness of its peace, we ought all to lie down, at a reasonble hour, beneath its dusky quilt, and be prepared to rise when the first flames of morn are kindled upon the oriental hearth. Yet how many young bipedowlets do I see around me who will not go to bed, merely because it is night -who regard not their healths, their reputation, nor their pockets; and willingly permit the worm of corruption to grow at their already moth-caten morals! Ah! their name is Legion-and the way they are all streaking it down the dark road to ruin is sorrowful to steam locomotives. The purple poppies of evening shed no opiate upon eyelids : and the cypress gloom which surrounds them, only serves to render more conspicuous the blue blazes of deviltry, which burn upon the brazen altars of their bearts. The iron tongue of midnight resounds in their ears, but they heed it not; ave it even knocks at their tenantless bosoms, and finds their thoughts absent from home or drowned in the oblivion of drunkenness. I find belonging to the anti-go-tobed-early-society, not only careless and reckless young candidates for des-truction, but men of maturer years-men whose minds were first moulded in the matrix of virtue, but have become warped before the scorching fires of habitual dissipation -between whom and the grave, the dusky curtain of night can fall but a few times more -men who are old enough to knew better than to shake off the balmy dews of sleep from their eye lashes, in mockery to the supplications of declining old age. fore me now one upon whose head the hoar frosts of time are fast descending, who never thinks of retiring to his solitary couch till the midnight bell has ceased to toll. Then he spiritualizes in an extacy of bliss; then to unbutton his waistcoat when a superabundance of ideas flows in every direction, like water from a gardner's pot; and then, when bed singing-

"Fal de ral, fal de ral, fal de ral, ri de, We all love a drop now and then."

Ah! that will never do. He takes too long hitches at a time towards his own sepinto his system, and thereby spare him the pain of offering so many morning apoligies ed youth, with the hardy and strong smewy to his injured conscience; and eventually save him from going down to the grave with away from us like old oaks that have with the blue mould of disgrace upon his venera- stood the winds and the storms of a long life ble brow. My dear friends-many of the fair sex

of Gorham are also raining themselves by keeping late hours. I don't mean those like myself, of female flesh and virtue, they
those of the country.
We know that there is a false pride amo The roses upon their cheeks have been blan- prompts to this-which leads the young miss ched by the midnight breeze, and the lustre to value herself more highly, the more deliof their eyes has been dimmed by the lurid cate she can "whiten out," even at the exgas lights in folly's saloon. They go to their pense of health and the physical powers nocturnal enjoyment, sacrifice health at the timent that such should go down to the grave shrine of foolishness! They sneak home unmarried, childless, "solitary ond alone," to their pillows of rest before Aurora pokes They may toss their head and curl their lip her head out of her chamber window and with as much scorn as they please; the laws blushes upon them for shame; and yet they of nature will not be infringed with impuniwill not go to bed in season for fear of being ty, and however delicate may be the subject, thought vulgar! O my friends, the enlight- truth will not change, and the truth is, that

ness and damnation. for many, which accounts for their watch- out the poorest and most blighted and unripe fulness. I know it is overflowing with beau- seed to plant again, or saved the weakest ty; but it is such an order as should de ap- and most feeble of his flocks to propagate preciated by the serious and soher. Its love- for the future; and yet this is the very error liness is associated with solemnity; and all which is blindly pursued in the continuance its spendors are calculated to drag the of the human species. We say blindly, for thoughts out of the mud, and hang them up it must be owing to a blind impulse that rato dry against the blue vault of heaven. In tional beings should so conduct, rather than the solemn stillness of night, contemplation to any reasoning upon the subject. should spread her airy pinions, and visit the thousand emerald isles in the vast eccan of of death. So m te it be.

I have been much indisposed during the past week, which must account for the shortness of my discourse. The flesh fails me, and the spirit shrinks from the task. I don't expect to wear out much more shoe leather | Farmer. in this flint paved world. A few more sermons and then-Hic Jacet .- N. Y. Sunday

THE PLAYER AND THE PHRENOLOGIST. Hay, and in others, of curing corn blades, most insects continue to hatch in rotation, A well-known eccentric commedian once called upon a phrenologist in New York. 'Sir,' said the actor, 'I have called upon

you to get a cheracter: will you do me the favor to examine the cast of my dead ?" 'Sir, take a seat, and allow me to take your hat,' said the polite professor of the

then newly-broached science. The phrenologist proceeded in his examination, and soon detected a remarkable

prevalence of prominent organs significant of I have made the most promising experiment be effectual, may be more than the applica-

obstinate unbeliever in this new branch of herd's grass, was cut in dry weather, and about the time the insect changes from the knowledge, but you have read my character so completely that I am henceforth a con-

acter of countenance, contrasting in a pecuhar manner with his mirth-provoking ap- be forked at top, to keep them steady while destroys the brown, scaly insect on the bark, pearance on the stage.

my profession." After a good deal of hesitation, anxious to pocket the extra cash, the phrenologist ventured to pronounce his visitor a ministeral professor of theology.

'What!' said the actor, with a start of surprise, 'are you acquainted with me?' 'No, sir, upon my bonor!' replied the professor.

'Do you assure me that you have never seen or heard of me before ?' said the comedian, with impressive solemnity. 'Sir, I do, with the most profound sin-

gical professor.
'Stop, sir!' replied the reverend Thespian: 'Now will you tell me whether you judge from my serious countenance and sable plainness of my habiliments, or from the scientific examinations you have made of my natural developements. Sir, as an honest man, I en-

treat you not to deceive me.'
"Why, my dear sir,' said the accomplished pupil of Sparzheim, to be plain with you -excuse me-I knew you were a preacher the instant I laid my hand upon your head!'

'Well, this is decisive,' with solemn intonation and a look of most extraordinary gravity, rising at the same time, taking his hat, and pushing the double fe before the man of science.

It is my custom to register the names prominent individuals who visit my office, said the phrenologist, 'and I should esteem it an especial favor to enrol yours among my patrons."

'You see it there, sir!' replied the tall. mysterious-looking person, 'staring you in the face, like the ghost of your defunct second sight!' and as he walked away he pointed to a play bill at the door, upon which was inscribed, in 'forty-line pica'—'PARK THEATRE-Benefit of Sol Smith, on which occasion he will appear in his popular character of Mawworm!!!!"

PHYSICAL DEGENERACY.

We copy an article in this number on this subject from the New Enggland his soul swells within him till he is obliged Earmer. It is a subject which we have often brought forward, and one which rises in importance the more we reflect upon it.-We cannot disguise the fact that the great he finds that exhausted nature can no longer bulk of the younger part of the community wrestle with the spirit, he gropes his way to are far, very far from being as athletic, hardy and robust as were the older part when young. We see it every time we look around upon a group of young persons. It appears in every assembly, and it speaks a loud and a warning voice every time we ulchre; and I must try to preach reformation compare the effeminate and sickly forms of the delicate lilly cheeked and filly fingerforms of that generation who are passing time, and are bowing to the effects of old age

rather than any disease. We think that this, though observable i both sexes, is more so among the females white-washed moving mouuments of female than among the males. A pernicious belief beauty who wander at the dead hour of mid- that it is disgraceful to work, and that a night up Broadway to Anthony street to de- young lady is elevated in the scale of respecstruction-for they are rained already. I tability and dignity in proportion to her have reference to those who still endeavor ignorance of domestic duties and her neglect to ornament the gay circle of society with of labor, has led to this. Among the fartheir radiant charms. Whenever I enter mers' daughters you will find something of the dazzling arena of fashion, I behold on the old system of hard labor athome, and a every side such faded specimens of feminine corresponding degree of health and strength. loveliness as to convince me that the deadly In the little villages you will perceive less of upas of etiquette is preying upon their deli-cate vitals. Decked with the costly trap-large villages we see more of it, and in the pings of affectation and pride, they look cities you will find a wide, very wide differ-tempting indeed to the infatuated worshippers of women; but to an experienced judge strength, and physical powers of the girls and

awning posts hung round with dry goods. - | certain individuals of the community which parties, their balls, and their assemblies, and which God has given her, We agree with barter away their beauty for a few hours of the edittor of the N. E. Farmer in the senenment of this world is a compound of dark- puny and feeble parents can raise none oth-My friends—night is said to possess charms would be called a fool indeed, who culled

It is a subject which should engage the atgolden palaces of hope which adorn the ten tention of ever philauthropist. Shall we become a nation of invalids? or shall we rise eternity. Then, too, we should be remind- above the silly pride that seems now to died that soon the darkness of the tomb will rect public opinion, and by manly and useful overshadow us all, when sounds shall disturb labor, coarse but nutritious diet, neat but our slumbers in the dust, till the archangel's comfortable clothing-reform so us to betrumpet re-echoes through the silent valley come again something as our fathers were? They were not afraid of the air. They were not ashamed of labor. They were not too proud to be seen eating coarse but substantial food and they were rewarded with health and strength accordingly .- Maine

HAY AND FODDER.

Great losses are annually sustained in ome parts of the United States in making commonly called fodder. Mine, in the course during their season. To keep the plants of many years, have I think amounted to a perfectly clean, it will be necessary to dress moiety of the crops—and most of the expedients I have resorted to for avoiding these osses, have been but partially beneficial.-Grass loses much both in quantity and sub- I have not had an opportunity of trying stance, by an exposure to the sun in curing it, experiments by dressing the trees, but have and fodder more, being thus exposed in small | collected the worms, which are killed by being | bundles. Both, and particularly the last, touched with the liquid. The expense of suffer greatly by dews and rains. This year labor and engines for dressing large trees, to very flattering qualities.

'Now, sir,' said the actor, 'I have been an in bettom land, of a grass called red top or the ground under the trees with the liquid, about the time the insect changes from the shocked in large shocks quite green, but dry chrysalis state and ascends the trees, will —that is, not wet with either dew or rain— destroy them; or, when the moth is on the vert.—Will you now, sir, include me in a what is the nature of my pursuit in life?

It must be mentioned that the comedian was remarkable for a severe and serious charbase was remarkable for a severe and serious charbase.

—Inat is, not wet with either dew or rain—destroy them; or, when the moth is on the tree, before laying its eggs, they may be destroyed without much labor; in either case, the mixture may be applied much stronger than when it comes in contact with the formula soft in the following mode. Four sticks, of five feet long, of the thickness of a man's wrist or more, were set up in a square of two feet the mixture may be applied much stronger than when it comes in contact with the formula soft in the following mode. Four sticks, of five feet long, of the thickness of a man's wrist destroyed without much labor; in either case, the mixture may be applied much stronger than when it comes in contact with the formula soft in two, as circumstances make it necessary that the destroyed without much labor; in either case, the mixture may be applied much stronger than when it comes in contact with the formula soft in two, as circumstances make it necessary that the destroyed without much labor; in either case, the mixture may be applied much stronger than when it comes in contact with the formula soft in two, as circumstances make it necessary that the destroyed without much labor; in either case, the mixture may be applied by the mixture may be applied by the mixture may be applied in town, as circumstances make it necessary that the destroyed without much labor; in either case, the mixture may be applied by the mixture may be applied by the soft in two, as circumstances make it necessary that the destroyed without much labor; in either case, the destroyed without much labor; in two, as circumstances make it nec stand. One at least of these sticks should of the tree, at the consistency of thick paint, the hay is putting round them. A round log and gives the tree a smooth, glossy, and about six feet long and six inches in diameis not exactly a part of my system, but'---- ter, was laid upon the ground, with one end "Well now you must excuse me, sir; I reaching to the centre of the two feet square am odd in my whims sometimes, but I am between the sticks, and the other raised upanxious to be thoroughly convinced regarding on a fork about eighteen inches, for the pur-

this science of phrenology, and I should like | poses of enlarging the flue presently mentionto be humored upon this point. Here is double the amount of your charge for fingering my pericranium, and I pay it to you with ing my pericranium, and I pay it to you with pleasure if you will do me the favor to name Around & over the sticks the shock was made, its to preaching 2 or 3 feet above the top of the sticks. The purpose of the log was to make a flue for the admission of fresh air into the shock, and the expulsion of the air heated by the fermentation of the grass in curing. The flues were made to face the point from which the wind usually blows at the time of hay-making. If any flues hap-pened to be closed by the pressure of the grass, they were easily opened by a smaller and pointed log—or when the largeness of a shock threatened this inconvenience, it was effectually prevented by inserting into the flue a short, forked stick as soon as the logs are removed as soon as the shock is finished, 2 or 3 are sufficient for following a dozen mowers. The hay thus made is the best I ever saw, and the efficacy of the mode of curing it was strongly supported, by the growing grass under the shocks having been uninjured whereas I never left shocks so long in one pot before, without its having been killed by e undissipated fermentation of the hay in curing. Corn blades or fodder, sustain an mmense loss, even in dry weather, by two or three days' exposure to the sun and dews -- and in wet they are nearly ruined. For an experiment, I shocked them in the mode ust explained, quite green and dry-but I hiefly allowed them from four to eight hours' sun, before they were shocked. Thus was made the best fodder I have seen. But the weather was favorable. The ends of the blades were laid outwards, and the shocks bound at the top by a rope made of the blades .- Arrator, 1812.

IMPORTANT DISCOVERY.

We embrace the earliest moment, after he receipt of the following lettes, to lay it before our readers. The season is not yet so far advanced that the process may not be beneficial to those who put it in operation ;

M. P. WILDER, President of the Massachusetts Horticultural Society:

Sin-Having discovered a cheap and effectual mode of destroying the Rose Slug, I wish to become a competitor for the pre-mium offered by the Massachusetts Horticultural Society. After very many satisfactory experiments with the following substance, 1 am convinced it will destroy the above insect, in either of the states in which it appears on the plant, as the fly, when it is laying its eggs, or as the slug, when it is comitting its depredarions on the foliage.

WHALE OIL SOAP, dissolved at the rate of two pounds to fifteen gallons of water, have used it stronger without injury to the strength of the soap, it will be better for persons using it to try it diluted as above, and if it does not kill the insect, add a little more oap-with caution. In corresponding with Messrs. Downer, Austin, & Co., on the lifference in its appearance, they say :-Whale Oil Soap varies much in its relaive strength, the article not being made as soap, but being formed in our process of bleeching oil. When it is of very sharp taste, and dark appearance, the alkali preominates, and when light colored and flat taste, the grease predominates." The former I have generally used, but have tried the ight colored, and find it equally effectual,

out requiring a little more soap—say two bounds to thirteen gallons of water.

Mode of Preparation. Take whatever antity of soap you wish to prepare, and ssolve it in boiling water, about one quart to a pound-in this way strain it through a ine wire or hair sieve, which takes out the dirt, and prevents its stopping the valves of the engine, or the nose of the syringe-then add cold water, to make it the proper strength add cold water, to make it the proper strength

apply it to the rose-bush with a hand enor syringe, with as much force as practicable, and be sure that every part of the leaves is well saturated with the liquid .-What falls to the ground in application, will do good in enriching the soil, & from its trifling cost, it can be used in profusion. A hogs-head of 136 gallons costs 45 cents--not quite 4 mills per gallon. Early in the morning, or in the evening, is the proper time to apply it to the plants.

As there are many other troublesome and destructive insects the above preparation will destroy, as effectually as the Rose Slug, t may be of benefit to the community to know the different kinds upon which I have ried it with success.

The Thrips, often called the Vine Freter, a small, light-colored or spotted fly quick in motion, which in some places are making the rosebush nearly as bad in appearance as the effects of the slog. Alphis, or Plant Louse, under the name of green or brown fly, an insect not quick in motion, very abundant on, and destructive to, the young shoots of the Rose, the Peach tree, and ma-

The Black Fly, a very troublesome and destructive insect, that infests the young shoots of the Cherry and the Snow-Ball tree. I have never known any positive cure for the effects of this insect until this time. Two varieties of insects that are destructive to, and very much disfigure Evergreens, the Balm of Gilead Fir in particular, one an Aphis, the other very much like the rose slug. The Acarus, or red spider, that well known pest to gardeners.

The Disease Mildew on the Gooseberry Peach, Grape Vine, &c. &c., is checked and entirely destroyed by a weak dressing of the solution.

The above insects are generally all destroyed by one application, if properly applied to all parts of the foliage. The eggs of them two or three times.

The Canker Worm. As the trees on this place are not troubled with this worm,

I remain, sir, Your most obedient servant. DAVID HAGGERSTON. Watertown, June 19th, 1841.

DANIEL SIMPSON.

Patent Lever Watch Maker, from Liverpool.

A S it is now twelve years since he availed himself of the privilege of returning his grateful acknowledgements to his friends and the public in general, for almost unprecedented favors, he begs leave to inform them that he is still at the Old Stand, on Church-street, one cloor south of Noble Levely and Co's, store, where he per-onally attends to the repairing of Chronometers, Patent Levers, Daplex, Lepines, and all other description of Time pieces. He will warrant all new work affixed to Watches in his shop to be as good as the original, or as any done on the continent.

N. B.—A good assortment of NEW WATCHES of the first quality of workmanship, and will be sold as cheap and on as good terms as at any other shop in the state.

the state. From his long experience in the business, and his etent to make selections as any in the vicinity.
