There is a little perfumed flower, That well might grace the lovelless bower, Yet poet never degreed to song Of such an humble rus in thing; Of such an homble rus ic thing;
Nor is it strange, for it can show
Scarcely one that of Ir's bow.
Nature, p rehance, in entreless hour,

Sweet flower! the lesson thou hast taught

THE LOVER CURED.

It was in the year 18-, that one of our then most popular, as she certainly was most beautiful, of our actresses at Covent Garden Theatre, who, for the sake of our story, we must name, although it was not her real designation, Maria Garnett, entered her lodgings accompanied by her confi-dent and friend, Miss Archer. Martha appeared greatly agitated, and if she were not so very pretty, it might be said, even in a ed, she wept, and catching hold of both hands of the friend, she said. of her friend, she said-

THE PLNTING OF POTATOES.

We are rather early in giving directions for the planting of this crop. But if we would notice the mode of planting most of the ordinary crops in season, we must take some one or more of them in anticipation of its proper time. We will promise that our success with this crop has been little favorable. Whether this be owing to the soil we have tilled; to the manure we have used; to the mode of applying the manure; or to injudicous cultivation, or to all these combined, we know not. Want of success with a crop which most farmers deem a good one, has caused us to study all the accounts of its cultivation which have fallen in our way; and also to study the plant and crop in the field, as far as we have had opportunity during the last year. Another thing we will promise, viz: the opinions we shall give, warranted, and for sale by Warranted, and for sale by Warranted, and for sale by Warranted. ments, before we shall venture to promulgate them as rules that farmers will obviousv find it well to follow.
