SUTTON. Fatal Accident.

Saturday morning John Hodge and a friend from Barton started out hunting, each having a gun loaded heavily with shot and ball. They were in the neighborhood where Sylvester Gray lives, and in climbing a tree John Hodge discharged his gun, the charge entering his body under the arm near the shoulder, shivering the bones and flesh in a terrible manner. They started for Mr. Gray's house, but he grew weak from the loss of blood. They called for help and Mr. Gray heard them and went to their assistance. They two carried Mr. Hodge to the house, and Mr. Gray came to the village and telephoned to West Burke for the doctor who came immediately. He telephoned to St. Johnsbury for a doctor who arrived between 11 and 12 o'clock. They could do nothing to save Mr. Hodge's life, and he died about 5 o'clock. He had no blood left in his body, and his arm was so badly broken that it could not have been saved, and he was so weak that he would not have lived to have had the arm taken off. Sudden changes of weather are especially trying, and probably to none more so than to the scrofulous and consumptive. The progress of scrofula during a normal October is commonly great. We never think of scrofula—it's bunches, cutaneous eruptions, and wasting of the bodily substance—without thinking of the great good many sufferers from it have derived from Hood's Sarsaparilla, whose radical and permanent cures of this one disease are enough to make it the most famous medicine in the world. There is probably not a city or town where Hood's Sarsaparilla has not proved its merit in more homes than one, in arresting and completely eradicating scrofula, which is almost as serious and as much to be feared as its near relative, consumption.
