COW-EASE

Relieves Cattle and Horses

FROM FLIES

A liquid preparation carefully compounded from effective materials. It is of the right consistency for applying with a sprayer, and it will not gum the hair or blister the skin.

Every dairyman and every owner of livestock should use Cow-Ease during the summer season. Its use is a humane act, and it also saves money for the stock owner, as a herd of milch cows that are sprayed regularly through the summer months will yield on the average from 10 to 20 per cent. more milk than they would if Cow-Ease was not applied.

In the case horses a mettlesome horse will lose flesh in fly time, whereas if he is sprayed lightly with Cow-Ease before driving, he will keep in good condition. Spray interior of stable and stall and see the flies go.

A Sure Preventive for Lice, Ticks and Vermin

A light application of Cow-Ease will relieve cattle from lice, also prevent tick—the cause of Texas Fever.

Cow-Ease is an excellent article for spraying the interior of hen houses, also roosts and dropping board; it will prevent head lice and fleas and keep the house in a sanitary condition.

How to Use Cow-Ease

The best way to use Cow-Ease is to apply same with one of our Cow-Ease Sprayers. These Sprayers throw a very fine mist and it is easy to direct this mist where it needs to go and at the same time the application is a light one, which is all that is necessary.

In sultry weather a herd of milch cows should be sprayed twice a day. Only a very small quantity is required. If possible spray in the morning and at night before milking.

Where Beaver Board Is Used

Beaver Board is used for walls and ceilings in every type of new or remodelled building. It is used in homes, stores, offices, public buildings, factories, churches, it can be quickly and economically made into booths at fairs and exhibitions, and its possibilities are great when used as a window trim. It builds into new buildings durable, sanitary and economical walls; old, cracked plaster walls can be beautified and unfinished rooms can be easily and cheaply transformed into attractive and useful rooms.

A Few Of Its 41 Advantages

Beaver Board does not crack, chip nor deteriorate. It improves with age. It is a non-conductor of heat and cold, making rooms warmer in winter and cooler in summer. It deadens sound, retards fire, withstands shocks, strains and vibration which crack and ruin plaster. Once up it is up to stay, and never needs repairing.
