FOR SALE—One pair of bay horses, weight 2100 pounds. W. D. LADD, Island Pond, Vt. 7-4tp

Keith's Konqueror Shoes FOR MEN L. F. JONES, DRY GOODS

Edward White, formerly of Island Pond, is now employed as ticket agent at Littleton, N. H., for the Boston & Maine R. R., having charge of the passenger traffic from that station. As Littleton has a population of over 6,000, being a trading center for the entire White Mountain region, also a summer resort, it tends to make this position a busy one. Mr. White, since leaving Island Pond has been employed in the train dispatcher's office at Woodsville, N. H., at the ticket office in Littleton, and other points on the White Mountain division of the B. & M. R. R.

Cross street was a scene of much excitement when the horse owned by Hiram Farmer ran away starting at Colby's mill, Monday afternoon. Mr. Farmer had left the horse at Colby's mill to see about getting a load of sawdust. Turning around he saw the animal going at a terrific speed toward the village. Down Derby street, coming at a "race horse clip," with only the two front wheels of the wagon, the body and rear wheels having been lost off somewhere on the route, into Cross street where someone attempted to stop the frightened animal, and it served to one side making for O. T. Davis' variety store and if it had not been for a team standing directly in its path would have gone thru one of the plate glass windows. There was a general mixup in which neither horse was damaged. Mr. Farmer arrived a few minutes later, having been picked up by Mrs. Daniel Stern and Isadore, who had been motoring toward East Charleston.

RAILROAD NOTES.

Dan O'Dowd broke No. 4 out of Berlin the first of the week.

A car on the highball was derailed near Percy Saturday night.

Engineer Stott was at the throttle on the seaside special last Sunday.

Thomas Kane, who has been off duty for some time, has returned to work.

Conductor McKee is handling the highball during the absence of Conductor Merrill.

The way freight run is not so popular with the trainmen now that they carry passengers, leaving at 5:30 and arriving at 8:00.

Conductor Murphy, who was injured some time ago, says his foot is mending so rapidly that he will be able to have the plaster cast removed this week.

Brakeman Robert Davis has taken a place in Conductor Curran's crew. This was made necessary by the removal of trains 4 and 5 from this terminal.

The railroad business has been very brisk the past few weeks owing to Sherbrooke and the county fairs, every spare man being utilized on trains to and from these places of attraction.

Pain?

There are two good reasons for painting often-enough or even too-often. One, to look prosperous; two, to be so.

Nothing does one more credit or gives one more credit than paint, supplemented of course by what goes with it; and paint costs nothing.

True, the first cost is \$5 or \$6 a gallon put-on; but it saves more than that in the property; saves it from slow going-down—not always slow—it drops with a jump when water gets in on wood and iron.

Dry wood and iron cost nothing, kept dry by paint.

Better paint when it needs it. Paint never goes-down in the sense of being more profitable next year.

Your Attention, Please.

Island Pond, Vt., Sept. 11, 1915.
EDITOR OF ESSEX COUNTY HERALD,
Island Pond, Vt.

DEAR SIR:—I noticed in your paper, some time ago, comment upon the house fly. I now wish to call your attention to a bulletin on typhoid fever issued by the Metropolitan Life Insurance Company for the use of its policy holders. The following therein appears:

"Flies also play an important part in carrying diseases from one to another. The fly as everyone knows lives in filth. The body of the dead animal, the manure pile and the privy vault are its favorite haunts. It alights upon the sputum of a person suffering with tuberculosis, upon the discharges of a typhoid patient, only to carry this infected matter to our milk and other food. This source of contamination is particularly likely to occur in places away from large cities where sanitary facilities are not well developed. For this reason the free use of chloride of lime cannot be too highly recommended as a disinfectant in country districts and in all towns and cities where municipal sewerage systems have not been established.

"In conclusion it should be remembered that the complete conquest of typhoid fever can be brought about only by the general practice of anti-typhoid vaccination, by the use of pure water and clean food, by the proper disposal of sewerage, by the screening of privies and food against the invasion by flies, by the destruction of the fly and of its breeding places, and by the observance of all the rules and regulations that tend to maintain proper conditions of health and cleanliness."

The above quotation needs no comment. The essential conclusion is that places infested by house flies are dangerous, and the time will soon come when health officers will require strict supervision with a view to eliminate as thoroughly as possible one of the filthiest and most dangerous enemies of mankind.

Yours respectfully,

HARRY B. AMEY.
