The medals were earned as follows:  
County Gold Medal, Miss Tillie Buettner, Jasper.  
Case Tp., Gold Med I, Charles McIlree, Madison Tp., medal, Emma Songer, 78.  
Harbison Tp., medal, John M. Ziegler, 75.  
Huntingburg city, medal, Edna V. Kemp, 83.  
All interested are now urged to complete arrangements for commencement, and inform this office as soon as possible. The commencements should be held before busy times are at hand for the farmers. Township commencements are in charge of the township examiners, unless otherwise agreed upon. Town and city commencements are to be conducted by the teachers of the schools. As soon as programs are completed send copy to county superintendent for publication. This column contained a sample program last week.The "Autocrat" will be the literary subject for April, May, June and July. The State Board will decide at its May meeting what is to follow it.  
The traditional school treats education as a science; in its best form it studies psychology and pedagogics and other professional lore, but never sees in the child more than interesting illustrations of these things. For the rational school education is art, in the practice of which psychology and pedagogics furnish some degree of light; but it never tires of studying the child, constantly verifying, amending and extending these science helps. Hence it happens not unfrequently that the traditional school with all its science accomplishes nothing, while the rational school, in the hands even of untutored art, achieves commendable results; for science is its own end, but art creates its science as it realizes its ideals.  
—W. T. Hallman, in Ind. School Journal.  
A BILL was introduced into the legislature of New Jersey providing for a division of the school fund between public and private schools. The bill was formally reported upon by the legislative committee, but the Attorney General pronounced it unconstitutional.**C. G. U. COLUMN.**  
CONDUCTED BY MRS. M. L. HOBBS.  
**BOYS, LEARN TO SAY NO.**  
If Courageously Spoken It Will Bring Health, Wealth and Prosperity.  
Boys say no when offered a glass of intoxicating liquors, even though the request comes from the lips of your dearest friend. Let your answer be no, courteously but firmly spoken.  
When invited to smoke a cigar, a cigarette or to take "chaw" of tobacco, it will take courage, the best kind of courage, moral courage, to speak the little word "no" distinctly and firmly that all who hear will understand what you mean; but speak it and prove yourselves heroes. No matter if boys or even men sail at you. Their jokes and quips will not harm you in the least, nor will they cost you a cent, but the tobacco will.  
When asked to play pool, billiards, cards and kindred games of chance for money—money is a good thing when it is got in a good way, but the touch of ill gotten gold is pollution. You can get money honestly in but one way—by giving in exchange a fair equivalent according to the standard of the country where the barter is made. When you win at pool, billiards or cards, what do you give in return? Nothing, it is masked robbery. Say no!  
When invited to go where you would be ashamed to meet your father, mother, brothers or sisters—the gilded saloons, low theatres and like places of amusement are boy traps, and they catch thousands every year. Don't be one of the boys caught.  
When asked to do what you know to be a mean thing—wantonly tearing or tormenting any creature is pure wickedness. Say no! You may think it unbecoming, but God and the unfortunate creature know that it is down right meanness.  
Boys, learn when and how to say this wondrous little word "no." If courageously spoken at all proper times, it will bring you health, wealth, self respect, the respect of others, and, what is better than all, the Master's "Well done!"—Christian at Work.  
**Eminent Opinions on Women's Suffrage.**  
Any influence I may happen to have is gladly extended in favor of woman suffrage.—Lydia Maria Child.  
Every year gives me greater faith in it, greater hope of its success, and a more earnest wish to use what influence I possess for its advancement.—Louisa May Alcott.  
Those who are ruled by law should have the power to say what shall be the laws and who the law-makers. Women are as much interested in legislation as men, and are entitled to representation.—William Lloyd Garrison.  
Every argument that can be adduced to prove that males should have the right to vote, applies with equal force to prove that females should possess the same right.—Hon. Benj. F. Wade.  
I believe in woman suffrage because women are as integral a part of the commonwealth as men, and have equal social rights, and the first of all social rights is the right of self government.—Harriet Prescott Stafford.  
We used to ask for suffrage because women needed it as a means to larger opportunities. But the aspect of the woman question has changed. Women are now saying, as in the days of the war, "The country needs us."—Mary A. Livermore.  
I believe in the admission of women to the full rights of citizenship and share in the government, on the express grounds that few women keep house so badly or with such wastefulness as Chancellors of the Exchequer keep the State, and womanly genius for organization applied to the affairs of the nation would be extremely economical and beneficial.—Theodore Parker.  
Laugh as we may, put it aside as a jest if we will, keep it out of congress or political campaigns, still, the woman question is rising on our horizon larger than the size of a man's hand; and some solution ere long that question must find.—James A. Garfield.  
In the administration of a state, neither a woman as a woman, or a man as a man, have any special functions, but the gifts are equally diffused in both sexes.—Plato.  
I go for all sharing the privileges of the government who assist in bearing its burdens, by no means excluding women.—Abraham Lincoln.  
In the progress of civilization, woman suffrage is sure to come.—Charles Sumner.  
Justice is on the side of woman suffrage.—W. H. Seward.  
I think there will be no end to the good that will come by woman suffrage, on the elec. act, on elections, on government here.—Chief Justice Chase.  
Woman suffrage is undoubtedly coming, and I for one expect a great deal of good to result from it.—Henry Wadsworth Longfellow.  
With all my head, and all my heart, I believe in woman suffrage.—Elizabeth Stuart Phelps.**TRANSFERS OF REAL ESTATE.**  
Made in the Recorder's office of Dubois county during the month of April up to the end of April 31st.

John A. Bernersheim and wife to Dubois County State Bank 1/2 of lot 90 Jasper, \$800.  
Drucilla Kellems and husband to Stewart & Adams lot 3, Ireland, \$325.**STATE CHARITY STATISTICS**  
Original Cost, Maintenance and Inmates of Institutions.  
The charts prepared by the Indiana State Board of Charities, as a World's Fair exhibit from the State Institutions, will show the cost of the plants and their maintenance since they were established. The institutions under the State control number twelve, and their total cost, including grounds and improvements, amounted to \$1,074,768 42, and the total number of days board furnished during their existence has been 3,149, 872. The Marion county work-house has cost \$125,000. The ninety-two county jails have, at an estimate, cost \$2,780,000, and during 1892 the operating expenses amounted to \$162,966. The ninety-two county poor houses cost \$2,770,000, and \$243,973.76 was spent operating them in 1892. The twenty-five county orphan's homes in the State show an expenditure of \$145,800, with expenses last year of \$82,700. The counties have invested in these jails and poor houses \$5,808,000, and their maintenance last year was \$494,036.78. There are twenty-one charity institutions under private control in the State. Ten orphan's homes have cost \$136,700, with \$45,050 operating expenses, Rose orphan's home at Terre Haute heads the list, with \$118,000 as the total cost. "The number of prisoners serving sentences in the county jails on October 31, 1892, was about 650. Of all the institutions the number of inmates was 2,702, or .0012 per cent of the population. The dependent classes of the State numbered 9,700, divided as follows: Insane, 2,768; paupers, 2,253; aged, 326; children, 2,999; feeble minded, 423. This is on a basis of .1426 per cent of the State's population. There are ten city hospitals in the State containing 439 beds. During 1892 they had 2,446 patients.  
Building improvements in towns, continue to go on.**THE SCHOOL TEXT BOOKS.**  
The Contract for Arithmetic and Geographies Now in Use Renewed for Five Years. Other Changes Decided Upon.  
The important work of the state board of the school book commissioners in its thorough study and consideration of the question of awarding contracts for supplying the various school text books for the next five years was concluded Friday night. In view of the vital importance of the matter to the schools throughout the state, the board for several days has been unremitting in its examination of the various text books under consideration, and in every department of study the books have been closely scanned with regard to their fitness of detail, simplicity of expression and correctness of statement. The board finally reached the conclusion that the arithmetic and geographies now in use are giving such excellent satisfaction that it was desirable to make a second contract for five years with the Indiana book company.  
The board ordered a revision of the writing books, and on the basis of that revision, made arrangements to renew the five year contract. The consideration of the readers was postponed until the board's next meeting, on the 15th of next month. The contracts for furnishing all the other text books have three years to run and, under the advice of the attorney general, the board did not take up their consideration.  
An important step was the discussion of procuring an intermediate grammar. That this was a very desirable innovation was uniformly conceded, but final action was deferred until the May meeting.  
"The books now in use," said Prof. Smart of Purdue University, to a Sentinel reporter last night, "have for the most part proven their worth by uniformly giving the largest degree of satisfaction. I consider it would be a most unwise thing to make any sweeping changes."  
**Tests of Varieties of Sweet Corn.**  
BY JAMES TROOP, HORTICULTURIST, PURDUE UNIVERSITY.  
Out of fifty different varieties of sweet corn tested by the Purdue University Experiment Station, the following are recommended as being especially desirable either for market or family use.  
Cory is one of the earliest varieties grown, but it is not recommended except for the first planting, as the quality is not of the best. Next to this in earliness is Marblehead which is much better in quality as well as in productiveness. Minnesota matures at about the same time as Marblehead and, although small, is quite productive and of good quality. Huntington is a new variety, nearly as large as Egyptian and ripens with the earliest. This will evidently prove a valuable addition to the early varieties.  
Crosby follows closely the early sorts and is of good size and quality, while Concord, maturing a little later, is large, productive and of the best quality. Amber Cream bears quite large ears, grains amber colored when mature, has rich flavor and is altogether a very desirable sort. Honey, sent out several years ago differs from other varieties in the purplish color of its leaves and stalks. It is large and of a first class quality.  
Hickox improved follows those named above and is a vigorous grower, very productive, produces large ears, and is of excellent quality. Stowell is still the favorite variety, and is probably planted more largely for causing than any other variety. It is one of the best, both in quality and productiveness. Silver Coin is another new variety, ripening about Stowell, about the same in quality, and "remaining longer in edible condition."  
No Plus Ultra is a small variety with irregular rows, or rather no rows at all, but it is one of the sweetest and best for family use on the whole list. It matures with Stowell.  
Black Mexican is not a popular variety for the market on account of its dark color, but its quality places it among the best for table use.  
The following five varieties are recommended for a succession: Cory, Concord, No Plus Ultra, Stowell and Black Mexican.  
This Station publishes its experimental results for the benefit of farmers from time to time. Your name and post office address will secure you these documents free. The director would especially like to secure at this time the addresses of all persons engaged in dairying in Indiana. Whatever special branch of farming you are following, please indicate it in your application. Address C. S. PLUMS, Director, LaFayette, Indiana.  
**Wood For Tennis Rackets.**  
Wood for tennis rackets requires at least five years seasoning; that is to say, it requires to be kept for five years in the rough timber stacks before being cut up for use. Wood for pianos is kept, as a rule, for forty years before it is considered sufficiently in condition to be used.  
**Only Way To Get It.**  
In spite of all who "want the earth," There's no man really tries for it, For if he did, and knew its worth, He'd surely advertise for it.**Advertisement for Dr. J. P. Salb:**  
OFF his professional services to all of Dubois county. Particular attention given to surgery and obstetrics, and all calls answered as promptly as possible. Dec. 23, '92.**Advertisement for Milburn & Sweeney:**  
MILBURN & SWEENEY, Attorneys at Law, JASPER, IND. WILL practice in the Courts of Dubois and adjoining counties. Particular attention given to collections. OFFICE—South Side Public Square, Dec. 8, 1892.**Advertisement for W. E. Cox:**

Original Cost, Maintenance and Inmates of Institutions. The charts prepared by the Indiana State Board of Charities, as a World's Fair exhibit from the State Institutions, will show the cost of the plants and their maintenance since they were established. The institutions under the State control number twelve, and their total cost, including grounds and improvements, amounted to \$1,074,768 42, and the total number of days board furnished during their existence has been 3,149, 872. The Marion county work-house has cost \$125,000. The ninety-two county jails have, at an estimate, cost \$2,780,000, and during 1892 the operating expenses amounted to \$162,966. The ninety-two county poor houses cost \$2,770,000, and \$243,973.76 was spent operating them in 1892. The twenty-five county orphan's homes in the State show an expenditure of \$145,800, with expenses last year of \$82,700. The counties have invested in these jails and poor houses \$5,808,000, and their maintenance last year was \$494,036.78. There are twenty-one charity institutions under private control in the State. Ten orphan's homes have cost \$136,700, with \$45,050 operating expenses, Rose orphan's home at Terre Haute heads the list, with \$118,000 as the total cost. "The number of prisoners serving sentences in the county jails on October 31, 1892, was about 650. Of all the institutions the number of inmates was 2,702, or .0012 per cent of the population. The dependent classes of the State numbered 9,700, divided as follows: Insane, 2,768; paupers, 2,253; aged, 326; children, 2,999; feeble minded, 423. This is on a basis of .1426 per cent of the State's population. There are ten city hospitals in the State containing 439 beds. During 1892 they had 2,446 patients. Building improvements in towns, continue to go on.**Advertisement for The School Text Books:**  
THE SCHOOL TEXT BOOKS. The Contract for Arithmetic and Geographies Now in Use Renewed for Five Years. Other Changes Decided Upon. The important work of the state board of the school book commissioners in its thorough study and consideration of the question of awarding contracts for supplying the various school text books for the next five years was concluded Friday night. In view of the vital importance of the matter to the schools throughout the state, the board for several days has been unremitting in its examination of the various text books under consideration, and in every department of study the books have been closely scanned with regard to their fitness of detail, simplicity of expression and correctness of statement. The board finally reached the conclusion that the arithmetic and geographies now in use are giving such excellent satisfaction that it was desirable to make a second contract for five years with the Indiana book company. The board ordered a revision of the writing books, and on the basis of that revision, made arrangements to renew the five year contract. The consideration of the readers was postponed until the board's next meeting, on the 15th of next month. The contracts for furnishing all the other text books have three years to run and, under the advice of the attorney general, the board did not take up their consideration. An important step was the discussion of procuring an intermediate grammar. That this was a very desirable innovation was uniformly conceded, but final action was deferred until the May meeting. "The books now in use," said Prof. Smart of Purdue University, to a Sentinel reporter last night, "have for the most part proven their worth by uniformly giving the largest degree of satisfaction. I consider it would be a most unwise thing to make any sweeping changes."**Advertisement for Tests of Varieties of Sweet Corn:**  
Tests of Varieties of Sweet Corn. BY JAMES TROOP, HORTICULTURIST, PURDUE UNIVERSITY. Out of fifty different varieties of sweet corn tested by the Purdue University Experiment Station, the following are recommended as being especially desirable either for market or family use. Cory is one of the earliest varieties grown, but it is not recommended except for the first planting, as the quality is not of the best. Next to this in earliness is Marblehead which is much better in quality as well as in productiveness. Minnesota matures at about the same time as Marblehead and, although small, is quite productive and of good quality. Huntington is a new variety, nearly as large as Egyptian and ripens with the earliest. This will evidently prove a valuable addition to the early varieties.
