FARROWING OR PASTURE PEN Illustration Shows Such a Structure That Answers Requirements in Ideal Manner.

Mr. Walter S. Prickett, manager and owner of the Roycroft farm at Sidnaw, Mich., has a farrowing penwhich answers the requirements of such a structure in an ideal manner, He calls it the "Berkshire bungalow."

Farrowing or Pasture Pen.

It would certainly be hard to surpass the Roycroft plan for attractiveness and general usefulness. The accompanying drawing indicates the general plan of the cot. The dimensions of little work. By settling the first post all cots are so near standard that it will hardly necessitate the repetition same idea may be applied in pasture of these figures here. The main points of difference in the "bungalow" as compared with other pens are: The center board on each side are hinged so that they can be swung open in hot weather; the ridge cap is so mounted that it can be raised and lowered at will, thus further assisting in the ventilation of the penand the roof boards are made into panels which may be raised or lowered over a window fram which is in place just below them. This last arcangement permits of making the pen into a hothouse whenever desired. The pen certainly has about as many adjustments on it as one could wish for. It is, moreover, one of the most attractive pens built. Its main objection is perhaps that the cost of construction is somewhat higher than is the case with more simple and less convenient types.

CURING HORSE OF KICKING

Harness Devised by Two Missouri Men Teaches Animal Futility of Trying for Own Way.

Sooner or later domesticated animais learn that they cannot have little corn may be given, but the oats their own way, but must bow to the

To Cure Kicking Horse.

awhile, however, there is born a horse who thinks he is entitled to his own opinion, and his favorite he pointed to the print. His friend ing the dashboard to bits. Two Misway of asserting himself is in kickexhibited equal surprise and called a souri men have devised a harness which is warranted to cure this habit. Straps cross the horses back and breast and at their junctions are fastened the ends of ropes which engage the fetlocks of the animal's hind legs in running loops. The other end of the ropes are fastened to staples in the horse's stall or to some other stationary object in front of which he is tied. The result is that when a horse is trussed up in this manner, if he tries to kick he find he cannot get his hind feet beyond a certain point, and after making a number of in effectual efforts he becomes discouraged. If he is a particularly bad kicker he can be goaded into making these attempts until his spirit is broken in that respect. .

Care of Horses.

As the busy season closes and the horses are idle more of the time, give them less grain feed and only twice each day, while they are not working Give all of the horses the run of some field or pasture when they are idle. The exercise and fresh air alone will do them good. The horse, above all other domestic animals, needs abundance of exercise to harden the muscles.

Barley for Hogs.

Canadian experimenters have found more of them. that barley is the best grain for finish. The high price of hogs should not ing the prime bacon hog. As long as tempt any farmer to go into the hogbacon hogs are not selling as high as raising business beyond his means. tat hogs in this country, however, our While prices may continue high, the feeders will stick to corn. It's good crop during the next two or three enough for the market hog, and it years will be greatly increased by makes him good enough for the mar thousands of plunging farmers who

EASY WAY TO HANDLE HOGS

Kansas Man Has Excellent Plan for Transferring Animals From One Pasture to Another.

Herewith is a drawing showing the handy way by which Mr. D. W. Evans of Fairview, Kan., handles his hogs in transferring them from one lot to another. The drawing is intended to show the barn, on one side of which is arranged the stalls for the live stock and on the other the grain bins with a passageway between the two. In the rear of this barn he has a number of swine pens and at the right of the front of it his bog house. As shown by the drawing, he has built a chute in front of the barn which connects with the hog house and which is opened or closed by the barn door. Only two posts are shown in the chute, as this is enough to show the idea. The curved line is intended to show the swing of the door. When the chute is in use for transferring of the hogs from the hog house to the feed lots in the rear of the main barn, or for transferring brood sows from the field to the farrowing pens, the barn gate is attached to the posts at the end of the chute by a chain, which is provided with a simple attachment for fastening. If it is desired to drive a team through the barn, the door is swung clear and the chute is not in the way of any ordinary vehicle. This is one of those little conveniences which add so much to the efficiency and comfort of farm life and which may always be had by simply taking thought and doing a so that the gate will strike it, this gates all over the farm, where it is

To Transfer Hogs.

desirable for persons to pass without allowing stock to get through. Such a gate will need no latch as it will strike against the post on either side and admit of the passage of any one without allowing even a pig to get by.

Weaning the Colt.

The spring colt should now be weaned. The job will be an easy one if the young animal has previously been taught to eat grain. Keep it in a stall by tself with hay in the man ger and feed it oats with bran, moist ened, two or three times each day. A and bran will come nearer supplying the lack of the mother's milk. Look after the mare carefully for at least two weeks after the colt is weaned. milking her just enough at a time to relieve her. Milk her the first thing night, with two or three milkings during the day for the first few days.

Working Heavy Teams.

Heavy draft teams hauling heavy loads keep in good condition when kept at the fast walking gait, and accomplish more than when trotted part of

LIVESTOCK

The bacon hog is growing in popularity every day. Hurdle the lambs on the rape patch

to push their growth. Salt is one of the essentials of suc-

cess in handling sheep. It is a serious loss to let a colt run down at weaning time.

One way to improve land rapidly is

to pasture hogs upon it. The sheep bites close, and will eat

weeds down to the roots. Constant care is what develops the

pigs into market toppers. There is more profit in a grunting

pig than in a squealing one. Sheep return to the soil 80 per cent.

of fertility from the food eaten. The mutton produced by the Cheviot is of a very superior quality.

Horses working hard in the harvest fields need water several times a day. Those who have been raising sheep in recent years have had no reason

to complain. Goats will breed at six months of age, but this early breeding destroys vitality. Eighteen months is about

the right age for breeding. One reason why the breed has not made more headway is the fact that breeders charge prices much too high

for the experimenting farmer. The buck should be removed from the does as soon as the breeding season is over and confined in a field by himself. He must be well fed at all

Hogs are still high, and all other farm animals are bringing such prices that the farmer who can should make all of them do their best and grow

will rush into the business.

A RARE SHEEP OPPURTUNITY

Enormous Receipts at Market-Farmers and Sheep Feeders Can Stock Up at Bargain Prices.

CAUSES OF THE RUN.

200,000 sheep and lambs received in three days-such, in round numbers, the record-breaking run thus far

this week on the Chicago market! This enormous over-marketing of sheep is the result of temporary andpeculiar causes, and offers a rare opportunity for farmers and sheep feed-

ers to stock up at bargain prices. This great rush of sheep to market comes mainly from Montana and adjoining western range country, and cannot last more than two or three weeks longer. It is no evidence of over-production. Its principal causes are the recent drought, which so burned out the grass that there will be very little winter feed on the range, and which prevented the putting up of sufficient hay to carry any considerable number of sheep over winter, while last winter was a very severe one and hay was so closely fed that there is no old hay left over for the purpose. The consequence is that sheep owners are forced to market the bulk of their sheep this fall, or else lose them in the flerce storms of winter.

The most serious cause of the presgeneral liquidation, however, is restriction of the range through occupation and fencing by dry farmers, who are grain growers, and not live stock raisers. The tremendous rush of these settlers upon the range within the last three years, and especially within the last twelve months, is hard for eastern people to realize. It is not alone the area actually enclosed by these settlers, but the breaking up thereby of vast regions of grazing lands into such small sections that they are no longer available to stockmen for grazing their flocks, which is one of the main reasons why the sheep supplies of the western range country are being more closely marketed this year than ever before in the history of the trade.

This means an inevitable shortage at market later on and next year, and with a constantly growing demand for both mutton and wool, it would seem that future good prices are assured.

The western range country has heretofore been the chief source of sheep market supplies, but unless the farmers of the corn belt begin at once to raise many more sheep than they have ever done before, there will be a great scarcity of both mutton and wool before long in this country.

Moreover, there is a world-shortage of live stock of all kinds. All Europe is short of sheep, and even Australia's supply is declining with rapidity. The same general causes that exist in this country are operating in other countries also. Populations are growing rapidly everywhere, while grazing areas are being reduced. As pasture land is turned to production of cereals, sheep raising declines.

Thousands of American farmers can turn this situation to their benefit, through increase of both soil fertility and money profit, by beginning right in the morning and the last thing at now each to keep a small flock of sheep upon his farm. And by taking advantage of the present opportunity to buy healthy, thrifty, growing western range sheep at bargain prices upon the heavily supplied Chicago market, they can stock up at minimum cost, whether they want foundation stock for breeding or the growing kind to fatten for market.

CONVINCING PROOF

Lydia E. Pinkham's Vegetable Compound

What is the use of procrastinating in the face of such evidence as the following letters represent? If you are a sick woman or know one who is, what sensible reason have you for not giving Lydia E. Pinkham's Vegetable Compound a trial? For 30 years we have been publishing such testimonial letters as these-thousands of them -they are genuine and honest, too, every one of them.

Mrs. S. J. Barber says:

"Ithink Lydia E. Pinkham's Vegetable Compound is the best medicine in the world for women-and I feel it my duty to let others know the good it has done for me. Three years ago I had a tumor which the doctor

Ille I said would have to be removed by an operation or I could not live more than a year, or two, at most. I wrote Mrs. Pinkham, at Lynn, Mass., for advice, and took 14 bottles of Lydia E. Pinkham's Vegetable Compound, and today the tumor is gone and I am a perfectly well woman. I hope my testimonial will be of benefit to others." - Mrs. S. J. BARBER, Scott,

Mrs. E. F. Hayes says:

"I was under the doctor's treatment for a fibroid tumor. I suffered with pain, sore-ness, bloating, and could not walk or stand on my feet any length of time. I wrote to Mrs. Pinkham for advice, followed her directions and

took Lydia E. Pinkham's Vegetable Compound. To-day I am a well woman, the tumor was expelled and my whole system strengthened. advise all women who are afflicted with tumors or female troubles to try Lydia E. Pinkham's Vegetable Compound." — Mrs. E. F. HAYES, 1890 Washington St., Boston, Mass.

to use Lydia E. Pinkham's Vegetable Compound, and the pain soon disappeared. I continued its use and am now in perfect health. Lydia E. Pinkham's Vegetable Compound has been a God-send to me as I believe I should have been in my grave if it had not been for Mrs. Pinkham's advice and Lydia E. Pinkham's Vegetable Compound." -Mrs. George May, 86 4th Ave., Paterson, N. J.

33

Mrs. W. K. Housh says:

Mrs. George May says:

"No one knows

what I have suf-

fered from female troubles, neuralgia pains,

and backache.

My doctor said

he could not give

me anything to

cure it. Through

the advice of a

friend I began

"I have been completely cured of a severe female trouble by Lydia E. Pinkham's Vegetable Compound, and want to recommend it to all suffering women." - Mrs. W. K. Housh, 7 Eastview Ave., Cin

Because your case is a difficult one, doctors having done you no good, do not continue to suffer without giving Lydia E. Pinkham's Vegetable Compound a trial. It surely has cured many cases of female ills, such as inflammation, ulceration, displacements, fibroid tumors, irregularities, periodic pains, backache, etc.

For 30 years Lydia E. Pinkham's Vegetable Compound has been the standard remedy for female ills. No sick woman does justice to herself who will not try this famous medicine. Made exclusively from roots and herbs, and has thousands of cures to its credit.

Mrs. Pinkham invites all sick women to write her for advice. She has guided thousands to health free of charge. Address Mrs. Pinkham, Lynn, Mass.

No Man is Stronger Than His Stomach

A strong man is strong all over. No man can be strong who is suffering from weak stomach with its consequent indigestion, or from some other disease of the stomach and its associated organs, which impairs digestion and nutrition. For when the stomach is weak or diseased there is a loss of the nutrition contained in food, which is the source of all physical strength. When a man "doesn't feel just right," when he doesn't sleep well, has an uncomfortable feeling in the stomach after eating, is languid, nervous, irritable and despondent, he is losing the nutrition needed to make strength.

Such a man should use Dr. Pierce's Golden Medical Discovery. It cures diseases of the stomach and other organs of digestion and nutrition. It enriches the blood. invigorates the liver, strengthens the kidneys, nourishes the nerves, and so GIVES HEALTH AND STRENGTH TO THE WHOLE BODY.

You can't afford to accept a secret nostrum as a substitute for this nonoholic medicine or known composition, not even though the urgent dealer

Bad Breath

"For months I had great trouble with my stomach and used all kinds of medicines. My tongue has been actually as green as grass, my breath having a bad odor. Two weeksago a friend recommended Cascarets and after using them I can willingly and cheerfully say that they have entirely cured me. I therefore let you know that I shall recommend them to any one suffering from such troubles."—Chas. H. Halpern, 114 E. 7th St., New York, N. Y.
