It's not words but deeds that prove true merit.

The deeds of Doan's Kidney Pills.

For Jasper kidney sufferers. Have made their local reputation.

Proof lies in the testimony of Jasper people.

Alois F. Pfeffer, Mill St., Jasper, Ind., says: "I was in poor health and my back ached most of the time. At night I couldn't lie in one position for any length of time, and sharp twinges darted through me when I tried to stoop. The kidney secretions caused me no end of annoyance. I often had headaches and dizzy spells, and felt languid and nothing seemed to benefit me. The superior worth of Doan's Kidney Pills was proven when they cured me. Two boxes restored me to good health."

Price 50c. at all dealers. Don't simply ask for a kidney remedy get Doan's Kidney Pills—the same that Mr. Pfeffer had. Foster-Milburn Co., Props., Buffalo, N. Y.

## Our Pauper, ?; Townships and Town.

Trustee Dave Morgan of Columbia tp. was in Jasper Monday making the usual grab in the State Treasury for money to help keep up the schools of his township under the deficiency act, (which should be repealed.) Columbia township with a population last census of 1302, has an enumeration of 475, about 300 attending school. Columbia township within 3 miles of French Lick and West Baden, furnishing a fine market for poultry, eggs and garden products the year around, there is not a single acre in the township that a good working farmer can't clear \$100 a year off of. For the 300 school attendance there are 16 teachers at a daily wage \$47.29. Yet gads and little fishes. Old women drawing 3 50 a day for 6 hours to feed and clothe worthless bi-pebs whose hardest job is to lug their stinking fat around. The township is not assessed at more than 25 per cent of what it ought to be. The inhabitants are very much like Washington Irving's Connecticut Dutch in practicing "bungling" and raising kids, mongrel curs, and oftentimes miscellaneous hordes to give the Jasper court and lawyers something to do. They had a levy of 25 cents last year. Making a total tuition fund of \$3,738.90. 120 days of school costs \$5,674.80. Of which trustee Morgan draws on the state for an additional sum of \$1,935.90 exclusive of the state fund which he received the same as other townships.

What is said above about Columbia will also apply to Hall and Jefferson townships and to Birdseye town.

The following is their little story of woe.

Jefferson Levy 25. Total tuition \$3412.91 State pays deficiency of \$850.69 Total cost of 120 days of school \$4263.70 Teachers employed 12, cost per day 35.53.  
Hall Township Levy 25. Total Tuition 2863.03 State pays deficiency of 392.57 Total cost of 120 days of school \$3255.60 Teachers employed 10. Cost per day \$27.13  
Birdseye Levy 40. Total Tuition \$1539.05 State pays deficiency of \$38.95 total c. st of 140 days 2478.00 teachers employed 4. Cost per day 17.70  
Total deficiency in the 4 \$4118.11 For the townships which cost the county more court cost than the other 12 all put together.

## OPENING WEEK SHOW

Auto Displays Will Be as Extensive as Those of Big Shows.

The automobile displays at the various salesrooms in Indianapolis, Feb. 23-28, during the opening week of the Indianapolis Automobile Trade Association, will be extensive enough to show everything displayed at the New York and Chicago shows.

In fact, many of these exhibits, especially those of the Indiana makers, will be moved bodily to Indianapolis for display purposes. There have been many noticeable changes made in the American automobile in the last year. Chief among these are the great increase in the number of six-cylinder machines manufactured, the growing popularity of left-side drive, the almost universal adoption of self-starting systems and the building of stream line bodies. Some of the old-line makers, however, have stood by the "four," along with the European reaction toward "fours" has introduced a two-speed rear axle, giving, it is claimed, all the advantages of the "six."

Manufacturers who last year built "big sixes" this year are adding "light sixes" to their lines, and many makers who last year built only "fours" are now building "sixes" of one type or other. The last year has seen the self-starter and the left-side drive idea gain equal popularity, where each was yet a novelty at last year's exhibition. The self-starter needed no friend to plead its cause; its advantages were too apparent.

The stream line body has done more than any other influence since the side-door entrance came into vogue to improve the appearance of the automobile. For more than a year the various manufacturers have been experimenting with different designs, and nearly all have at last struck on patterns that are pleasing to the eye and that afford the greatest comfort and convenience to the occupants.

## AUTO INDUSTRY LEADS.

No other industry can compare with that of motor car building, which for every year since 1900 has shown an increasing demand for its products and has been only slightly curbed by the slowing down of general business during the past six months.

## INDIANA SIXTH AMONG AUTO USING STATES

Illuminating statistics upon the tremendous growth of the motor car in the United States during the last three years have just been compiled by Mr. Mitchell May, secretary of state of New York, the figures having been obtained through records in his office, compared with the records for 1911, when a similar table was prepared.

New York still leads with a total of 138,000 registrations, a gain of 51,000, Illinois is next with 95,000, as against 45,000 in 1911. New Jersey is no longer in second place, largely because of her new reciprocity law, and drops into eighth place, leaving Ohio for third place as in 1911, with a total of 87,000, against 46,000.

Pennsylvania is still fourth in number, with 79,000 over 44,000 in 1911, while Iowa succeeds from seventh to fifth place, with 77,000 as against 31,000. Indiana jumps forward from thirteenth to sixth place, with 62,000 as opposed to 13,000, the number registered two years ago, and Massachusetts follows with 57,000, against 37,000 in 1911.

New Jersey, in eighth place with approximately 50,000 cars, shows an increase of only 2,000 over 1911, when the number recorded was 48,000. These figures reveal a loss of approximately 10,000 registrations formerly assigned to non-residents who are now enjoying temporary exemption courtesy.
