**Osteopathic Treatment.**  
(From Osteopathic Health.)  
[Published by direction of Dr. W. J. SMITH, Arcadia Valley Sanitarium, to whom application for further information may be made.]

(Continued from last week.)  
**DEFINITION OF THE WORD.**  
The name "osteopathy" is made up of two Greek words "osteon," which means "bone," and "pathos," which means "suffering" (to suffer). "Pathy," our English equivalent for this word, by usage has come to mean "a system of treatment for suffering, or disease." Hence, viewed strictly from its derivation, this term, "osteopathy," would carry only the meaning of "bone suffering," "bone disease" or "bone treatment."

Very often here arises the first misconception of the science. A single word cannot be invented that will explicitly define, nor that can fully explain, any complete work, complex system, comprehensive science. A name can only be adopted arbitrarily as the symbol of the institution it represents. The names of other schools of practice, the names of political parties and religious denominations, all are equally insufficient and misleading and have to be explained.

Take the term "homeopathy," for instance, meaning literally "like suffering," or "allopathy," meaning "other suffering"—what logical connection would these terms suggest to your mind if familiarity with the theories, drugs and practices which they stand

for were not already in your mind? A name can only stand for the parts of, and not for the complete work.

Just so with osteopathy. It is not alone the treatment of "bone disease," nor the conception that diseases are so often due to faulty adjustment of the bones of the body's framework, that goes to make up the true conception of osteopathy. There is also the use of the bones as landmarks to locate and define physiological disorder in the body, and their use as levers to perform certain movements to secure adjustment of the body tissues, thus contributing to the manual dexterity of the manipulation. These considerations are each a part of the osteopathic conception. The term must really be understood to include all the fundamental facts and principles of anatomy, physiology, psychology, pathology and hygiene, interpreted and applied in a wholly new and practical way to explain and remedy diseases.

Undoubtedly the most original, characteristic and fundamentally important tenet of our system is that the wrong position and malalignment of the bones of the skeleton constitute one of the very common (not universal, please understand) causes of disease, and it is this "bone idea" that makes the name "osteopathy" as appropriate as could be expected of any single word.

Briefly, then, osteopathy is a broad science of diagnosis and treatment of human ailments, acute and chronic, which views disease from a new standpoint and treats disease by new and improved methods, discarding drugs entirely because a better means of cure has been discovered.

(To be continued.)

## Aviators in California.

(A letter received by W. T. O'Neal from his daughter, Nettie, in California.)

My Dear Father—No doubt you have read with much interest the dispatch reports of the Aviation Meet, which has been held here for the past ten days, but I thought you would like an account of how I saw it. It is no longer a question of can man fly? but, to what purpose and extent? This being America's First Aviation Meet, it has attracted much attention of not only our country, but the whole world, especially France, as Louis Paulhan, the daring Frenchman, has won new honors for himself.

Of course, this is an ideal place to hold such an exposition, owing to the climatic conditions, and it is astonishing that a city the size of Los Angeles could furnish a continuous succession of audiences running into tens of thousands daily. One day there were said to be fifty thousand present. The total cash receipts on ticket sales alone amounting to \$137,520.30, the largest sale for any one day being \$19,442.55.

The up-to-date aeroplane differs from the dirigibles, or cigar-shaped airship that we saw at the World's Fair in 1904, in that there is no gas bag; in fact they are such frail, light looking structures that you marvel at their enduring the slightest breeze. When they are in the air the driver is the most conspicuous part—I say this advisedly, having no personal interest in the "man-bird." Seriously, a few miles away they remind me of a butterfly, the man the body, and the framework and canvas appear to be gauzy wings.

As I watched them sailing so evenly in the sky I smiled as I recalled my wonder at first seeing a man successfully ride a bicycle, and how I gazed in astonishment when you pointed out to me in Forest Park, one of those "horseless carriages," the first I had ever seen. Here my reflections ended for I saw on the score board, which recorded the events; "Paulhan now flying!" and the announcer called through the megaphone: "Paulhan and wife now flying!" As they swept past the grand stand the little woman in the air waved a good bye to us and the thousands rose as one and cheered and waved till the machine glided farther and farther, then out of sight. They had sailed away to the beaches and returned, a distance of 21 miles, in 33 minutes, 45 seconds. We had seen heroic flying, theatrical effectiveness, and now this was romance, for a woman flying added new zest to the science of aviation, and as the great bird gracefully alighted in front of the grand stand there was a buzz of excitement. A host of friends, reporters and photographers rushed to get a word or picture for publication. Paulhan then took a number of passengers, one at a time, for a sail in the air, among them, William Randolph Hearst.

I have written at length upon the "flying" of the Frenchman because he dared more and therefore held the center of the stage, but there were other features. Never did we lack entertainment. There were balloons, dirigibles, monoplane and biplanes. The dirigibles being guided only by the utmost skill.

Glenn Curtiss had his biplane on the field, but to the disappointment of all he made very few flights and seemed ever avoiding any risk. He does not possess the instinct for dramatic effect as does the Frenchman and has suffered by comparison, but the last day of the Meet, when it came to a test of speed, Curtiss ran the foreigner down and passed him again and again. With true American loyalty the watching throng cheered loud and long. The Curtiss biplane is very light and graceful but has practically the same horse power as the Farnham machine which the Frenchman drives.

The masses have held their breath when the aviators were high in the air and all have queried, "what would happen if the engine broke?" Charles K. Hamilton answered that query yesterday when he broke a crank shaft, 200 feet from the ground, but instead of turning topsy turvy he glided gracefully to the ground.

I have witnessed races on land and sea but to me they seem tame as compared with those of the air, and if I have conveyed to you, in the least, my enthusiasm, I am glad I have troubled you to read another of my long letters.

An enclosing a chatty letter to mother.

Your affectionate daughter,  
NETTIE.

## County Court Proceedings.

Resignation of Wm Woolem constable of Arcadia township accepted. G. W. Marshall appointed to fill the vacancy.

Mose Thomas, rippapping road district No. 15, \$8.

Following road overseers filed settlements which were examined and approved: French Thurman, district 13; John C Russell, district 17; G W Sutherland, district 10; W E King, district No. 2; Herman Yanke, district 12.

ORDER OF PUBLICATION.  
STATE OF MISSOURI, )  
COUNTY OF IRON, )  
In the Circuit Court of Iron County, Missouri, April Term, 1910.  
Sadie J. Cape, Plaintiff,  
vs.  
John T. Cape, Defendant.

Now at this day comes the plaintiff hereto, by her attorney, F. M. Carter, and files her petition and affidavit, alleging, among other things, that defendant, John T. Cape, has absconded and absented himself from his usual place of abode, and is not a resident of the State of Missouri, and cannot be served with summons in this state.

Whereupon, it is ordered by the

## Five Years of Heart Trouble Cured by Dr. Miles' Heart Remedy

"Before I began taking Dr. Miles' Heart Remedy I had been suffering from heart trouble for over five years. I had pains in my left side, and under my shoulder blade, could not sleep on the left side, and was so short of breath the least exertion would bring on the most distressing palpitation. I had scarcely taken a half bottle of the Heart Remedy before I could see a marked change in my condition. When I had taken six bottles I was cured."

MRS. C. C. GORKEY,  
Northfield, Va.

If there is fluttering or palpitation it is an indication of a weakness of the nerves and muscles of the heart. It is not necessarily diseased—just weak from over-work. The heart may be weak just the same as the eyes, stomach or other organs. You can make a weak heart strong by taking Dr. Miles' Heart Remedy. Get a bottle from your druggist, take it according to directions, and if it does not benefit he will return your money.

Warranty Deeds, Deeds of Trust, Quit Claim Deeds and Chattel Mortgages for sale at this office.

Peter Tumbledown's Weather Predictions for February.

There will be a thaw toward the last of the month and considerable slush in the roads, and black liquor will form knee-deep in the cow yard and run out into the lane. There will be some snow the forepart of the month, a good bit of rain during the month and a blizzard from the 12th to the 15th. Look out for it. The 27th and 28th will be warm and pleasant.—Poor Richard Almanac, 1910.

FOR SALE, CHEAP—One 100-horse-power, stationary engine, in good condition. Apply to Schneider Granite Co., Graniteville, Mo.

Another car of the celebrated Golden Sheaf Flour just received Special prices on 500 lbs. or over. LOPEZ STORE CO.

Any farmer who wants a good, all-purpose horse should go and see the stallion and his colts at Dr. W. J. Smith's stables at the Sanitarium.

FOR SALE—A wagon and two horses and harness. Apply to John Newman, Ironton, Mo.
