

# WHAT FARMERS OWE to the BEE

Colonies of honey makers necessary to fruit raising because they are the chief fertilizing agent: And there can be nothing more tempting than hot biscuit and honey for breakfast on a crisp winter morning

By ROBERT H. MOULTON.

FARMERS in this country are just coming to realize the debt which they owe to the honey bee. It has long been understood, of course, that this busy little insect fertilizes the blossoms of apple and other fruit trees and so helps to increase the crop, yet the bee has seldom been credited with doing so much good as is actually the case. Indeed, in times past some fruit growers have sought to get rid of the bees on the ground that they damage the ripe fruit. The crop so quickly decreased in size, however, that the fruit men were glad enough to have the bees back again. There is a well-established belief that bees puncture grapes in order to extract the sweet juice, but the fallacy of his belief has been proved beyond a doubt. Ripe fruit has been placed inside a beehive, with thousands of the insects present, but it has not been molested. It is true that if hornets or birds make holes in grapes, pears or other ripe fruit, the bees will feed on the juice which is exuded. In point of fact, the jaws of the honey bee are so made that it would be unable to bite into or otherwise make holes in fruit, even if it had a will to do so. Orchards in which bees are present in large numbers are almost always much more productive than those in which only a few bees are to be found and many apple growers are now establishing apiaries in or near their orchards. It is not necessary to have the hives actually under the trees and it may be better to have them in an adjoining field if the orchard is to be cultivated, as otherwise the hives might be in the way and the horses stung. Bees seem to have an instinctive dislike for horses and will even attack the beekeeper sometimes if he starts to work in the beeyard when the odor of horses is upon his clothing. Beekeeping is not to be recommended to hostlers. To the orchardist the honey and wax which he gets from his bees are merely by-products. An extra yield in fruit is what he is after. And he gets it, as may be judged from an instance cited by one of the state experiment stations. It seems that two orchards situated in the same part of the country were cultivated in exactly the same manner and had the same kinds of trees. Yet one was prolific and the other a failure. When the experiment station was appealed to, the trouble was diagnosed as a lack of bees to pollinate the flowers. "You are wrong," the answer was flashed back, "for there are no bees in either orchard." The inspector was not convinced, however, and after a search he found a very strong colony of bees in a fallen log in one corner of the bearing orchard. Bees were immediately installed in the other orchard by the owner, and as a result he netted nearly \$4,000 the next season—pretty good interest on an investment of \$15 or \$20 in bees. Most people do not know that an apple blossom requires to be fertilized several times in order to produce the best fruit, but this is a fact. Moreover, the blossoms of some trees must be pollinated from another source if fruit is to be set. The work is done largely by honey bees, although wild bees and other insects help out to some extent. Once, as a test case, 2,586 apple blossoms were covered in order to keep the bees away, and only three apples matured. Of course, the bee does not pollinate the blossoms purposely. She is in search

of nectar from which to make honey, but all unconsciously she brushes the pollen from one flower and carries it along to another, thus carrying on her part of nature's plan. The value derived from the cross fertilization of blossoms in this way is probably much greater than that of all the honey and wax made by the sun total of all the bees in the country. It is practically impossible to grow cucumbers in the greenhouse unless bees are depended upon to fertilize the blossoms, and so the market gardeners are obliged to yield tribute to this useful insect. Even in the dead of winter, the snow drifts six feet high outside, thousands of bees are to be found flying around in the great glass houses where cucumbers are produced for the exclusive winter trade. It is true that the bees get but little nectar from the blossoms and have to be fed on sugar syrup, but they accomplish the purpose of transferring pollen from one flower to another. Of course this work might be done artificially. That is, a man might go from one blossom to another with a small brush and transfer the pollen, but the process would be tedious and too expensive

IOWA STATE INSPECTOR OF APARIES EXAMINING BEES

sive to be feasible. It has to be done in greenhouses where strawberries are grown, for when bees are used the fruit is always misshapen, but the winter strawberries sell for a dollar or two a pint!

Perhaps it may be said without getting anybody into trouble that the free use of water by spraying makes possible some of the remarkable exhibitions which bees occasionally give. Water is not always used, by any means, but when it is the bees are rendered surprisingly tractable and docile. There are no bee tapers, however, who are not stung at times. Indeed, they may be stung very often, but they are inured to the experience and do not even wince. And, of course, an experienced beekeeper learns how to handle bees without making them angry. Furthermore, some bees are much gentler than others. Many times it is a good plan to kill the queen in a cross colony and replace her with a young queen from a quiet colony. Yet the cross bees are likely to be among the best honey producers in the apiary.

Many farmers fail to succeed with bees simply because they neglect to learn anything about their management. It is true that bees do not require a great amount of attention and do best when left alone most of the time. Yet there are certain things which have to be done just at the right time and in just the right way. These are the few things that the farmer should know about. In early spring, for example, the bees may easily starve to death for lack of stores, although they may have come through the winter safely. In that event they must be fed on sugar syrup if no honey is available. Equal amounts of sugar and water may be used and it is best to have the water warmed, but the sugar should never be melted on the stove, as it is likely to be burned. The syrup may be given in one of several different kinds of feeders, but few are better than a shallow pan from the ten-cent store with a little excelsior in it for the bees to walk on. If this pan filled with syrup is placed on top of the frames of the hives the bees will quickly take the liquid down and be tided over the period of famine.

It is a mistake for any farmer to try to keep bees in the old-fashioned box hives, for they cannot be managed so well and getting the honey out is likely to be a painful as well as exciting process. Likewise, thousands of bees are needlessly sacrificed, and the hives are almost sure to be neglected. Modern hives cost but little, yet may be taken entirely to pieces and the bees looked over without the loss of a single one. And

BEEKEEPERS AT A STATE APARIE DEMONSTRATION

escaping honey out is no trouble at all, when a bee escape is used, for the bees do not even know what is going on. The best way to begin beekeeping is to buy a colony or two from some up-to-date apiarist in the neighborhood, but a hive full of bees can be shipped by express or the insects may be bought by the pound if one already has an empty hive. Indeed, this is a practice which is becoming very common, for even experienced beekeepers often invest in one, two or three-pound packages of bees in order to build up weak colonies. It is not an unusual thing for bees to be shipped all the way from Texas to Canada. Sometimes wild bees may be captured in the woods and brought home. Although called wild bees, these honey makers which are found in logs and hollow trees have escaped from captivity at some time, for there were no honey bees in this country until they were brought here by the Pilgrim Fathers. If the farmer owns more than half a dozen colonies of bees it will pay him to get an extractor. This is a simple device for separating the honey from the combs, the latter being placed in a frame which revolves at a high rate of speed, the liquid honey being thrown out of the wax cells by centrifugal force, just as cream is separated from milk. Then the combs may be put back in the hives for the bees to fill again. The farmer can usually get more honey this way and will have less swarming.

## RELIABLE REMEDY RESTORES KIDNEYS

For many years druggists have watched with much interest the remarkable record maintained by Dr. Kilmer's Swamp-Root, the great kidney, liver and bladder remedy. It is a physician's prescription. Swamp-Root is a strengthening medicine. Dr. Kilmer used it for years in his private practice. It helps the kidneys, liver and bladder do the work nature intended they should do. Swamp-Root has stood the test of years. It is sold by all druggists on its merits and it will help you. No other remedy can successfully take its place. Be sure to get Swamp-Root and start treatment at once. However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

An Improvement. Mrs. Josiah Cowles, the new president of the National Federation of Women's Clubs, was talking in New York about dress. "I didn't get any sleep last night. 'Too much coffee!'" "Oh, no, the baby doesn't drink coffee." "I may claim, in fact," she ended, "that these women start making their own clothes and stop picking their friends' clothes to pieces."

## FOR ITCHING SCALP

When the scalp is itching because of dandruff and eczema, a shampoo with Cuticura Soap and hot water will be found thoroughly cleansing and soothing, especially if shampoo is preceded by a gentle application of Cuticura Ointment to the scalp skin. Free sample each by mail with Book: Address postcard, Cuticura, Dept. L, Boston. Sold everywhere.—Adv.

## Doom of Golf.

Bishop Murray, on his way to preach in Nashville, steamed in his train past a golf course crowded with players. Bishop Murray frowned, then he smiled. "In the millennium," he said, "every day being Sunday, mankind will get surfeited with golf, and the game will then undoubtedly become extinct."

## Q-BAN DARKENS GRAY HAIR

Gray, streaked, prematurely gray or faded hair quickly restored to original dark shade by shampooing hair and scalp a few times with Q-Ban Hair Color Restorer. No dye—perfectly harmless. Q-Ban acts on roots—renews color glands—makes hair healthy, gradually changing all your gray hair to an even natural dark shade, making entire head of hair clean, fluffy, abundant without a trace of gray showing. 50 cents a big bottle by parcel post. (Also sold by most druggists.) Address Q-Ban, Memphis, Tenn. Adv.

## Whenever You Need a General Tonic Take Grove's

The Old Standard Grove's Tasteless Chilli Tonic is equally valuable as a General Tonic because it contains the well known tonic properties of QUININE and IRON. It acts on the Liver, Drives out Malaria, Enriches the Blood and Builds up the Whole System. 50 cents.

## Why That Lame Back?

Morning lameness, sharp twinges when bending, or an all-day backache; each is cause enough to suspect kidney trouble. Get after the cause. Help the kidneys. We Americans go it too hard. We overdo, overeat and neglect our sleep and exercise and so we are fast becoming a nation of kidney sufferers. 72% more deaths than in 1890 is the 1910 census story. Use Doan's Kidney Pills. Thousands recommend them.

## Doan's Kidney Pills

FOSTER-MILBURN CO., BUFFALO, N. Y.

## W. L. DOUGLAS

"THE SHOE THAT HOLDS ITS SHAPE" \$3.00 \$3.50 \$4.00 \$4.50 & \$5.00 FOR MEN AND WOMEN Save Money by Wearing W. L. Douglas shoes. For sale by over 9000 shoe dealers. The Best Known Shoes in the World. W. L. Douglas name and the retail price is stamped on the bottom of all shoes at the factory. The value is guaranteed and the wear protected against high prices for inferior shoes. The retail prices are the same everywhere. They cost no more in San Francisco than they do in New York. They are always worth the price paid for them. The quality of W. L. Douglas shoes is guaranteed by more than 40 years experience in making fine shoes. The smart styles are the leaders in the Fashion Centres of America. They are made in a well-equipped factory at Brockton, Mass., by the highest paid, skilled shoemakers, under the direction and supervision of experienced men, all working with an honest determination to make the best shoes for the price that money can buy. Ask your shoe dealer for W. L. Douglas shoes. If he cannot supply you with the kind you want, take no other make. Write for interesting booklet explaining how to get shoes of the highest standard of quality for the price, by return mail, postage free. LOOK FOR W. L. Douglas name and the retail price stamped on the bottom. W. L. Douglas Shoe Co., Brockton, Mass.

Not Coffee. "What's the matter, Bill, you look tired this morning?" "I didn't get any sleep last night." "Too much coffee?" "Oh, no, the baby doesn't drink coffee."

COVETED BY ALL. But possessed by few—a beautiful head of hair. If yours is streaked with gray, or is harsh and stiff, you can restore it to its former beauty and luster by using "La Creole" Hair Dressing. Price \$1.00.—Adv.

Acquitted. "The sheriff tells me," remarked a visitor to a western town, "that there hasn't been a prisoner in the county jail for over a year. That would seem to indicate that your community is unusually free from crime."

No Joke. "I need a lot of new things this fall," began Mrs. Wife. "We have to get a new rug for the dining room and some curtains for the living room. We need some new dishes, too. And besides, I haven't a thing to wear. I've got to get a new evening dress and a street dress, and a couple of new hats, and I haven't a pair of shoes to my name, and—"

WOMAN'S CROWNING GLORY is her hair. If yours is streaked with ugly, grizzly, gray hairs, use "La Creole" Hair Dressing and change it in the natural way. Price \$1.00.—Adv.

Perfectly Good Dog. Mrs. Jones—Harry, shall I send Fido to the dog show next week? Harry—No, dear; I'm afraid he isn't good enough. Mrs. Jones—Not good enough! Why, Fido never did anything wrong in his life.—Stray Stories.

Swine provided 60 per cent of the total meat consumed in the German empire last year.

LOOKS SO. Patience—I see sixty thousand women in London were thrown out of work by the war.

Patrice—Oh, did the war stop bridge whist?

SOAP IS STRONGLY ALKALINE and constant use will burn out the scalp. Cleanse the scalp by shampooing with "La Creole" Hair Dressing, and darken in the natural way, those ugly, grizzly hairs. Price, \$1.00.—Adv.

Lure of the Rural. "Can you find servants who will go into the country?" "Yes. But only when we're living in the city and the picnic season is on."

AGENTS: If daily professional care is required, write for particulars. KIDNEY PILLS, 107 1/2 St. Louis, Mo.

CHOICE FARMS: Dakota quarter, Mankato, Minn. Description and terms. Box 197, Mankato, Minn.

NEW PENSION LAW FOR WIDOWS: Send for blanks and instructions. No. 6, E. HOWE & CO., Pension and Patent Attorneys, WASHINGTON, D. C.

DON'T CUT OUT A Shoe Boil, Capped Hock or Bursitis FOR ABSORBINE

It will reduce them and leave no blemishes. Stops lameness promptly. Does not blister or remove the hair, and horse can be worked. \$2 a bottle delivered. Book 6 M free.

ABSORBINE, JR., for making the antiseptic liniment for cuts, bruises, sore, chafes, various sores. Always Pain and Inflammation. Price \$1 and \$2 a bottle at drug stores of delivery. Will tell you more if you write. W. F. YOUNG, P. O. F., 310 Temple St., Springfield, Mass.

## Our Opportunity in Latin America

By JOHN BARRETT, in the Review of Reviews.

These are the times when everybody should be studying the twenty American republics lying south of the United States. These are the days of unprecedented and legitimate opportunity in Latin America for the commercial and financial interests of this country. This present year should be the beginning of a new epoch in the material, social and political relations of North and South America. The next ten years are going to be "all American" years. All America is to attract the attention of all Americans. This new development is inevitable. The cause is found in the natural wealth, resources and potentialities of Central and South America, their actual commerce and trade, their remarkable progress during recent years, together with the unceasing propaganda of the Pan-American union, which was at first even ridiculed and little appreciated, but is now generally valued and recognized. The occasion of this new interest at this moment is the European war and the emphasis it has placed upon the geographical segregation and commercial solidarity of the nations of the western hemisphere. Consider Latin America in any phase one prefers, and it is worthy of keen interest. Let us first look at it geographically and physically. We see twenty countries ranging in area from little Salvador, with less than 8,000 square miles, or smaller than Vermont, up to mighty Brazil, with 3,200,000 square miles, or greater than the United States proper with Great Britain thrown in! In all, they spread over nearly 9,000,000 square miles, or three times the connected area of the United States! They contain mountains higher, rivers longer and more navigable, valleys wider and more fertile, and climates more varied than those of the United States. Noting the population, we find that Costa Rica starts the small end of the list with 400,000 inhabitants, and Brazil tops it with 20,000,000. All Latin America supports today approximately a population of 75,000,000, which is increasing by reproduction faster than is the population of the United States. When the new emigration from Europe starts in after the war, and when the Panama canal is in full use by the shipping of a peaceful Europe, this total may soon overtake and pass that of the big sister nation of North America. We are almost astonished by the figures of Latin-American commerce. They make us respect many of the southern republics and peoples, even if some other influences may not be so favorable. Last year the twenty southern neighbors of the United States, through sheer strength and capacity, pushed up the total of their foreign trade to the huge sum of nearly \$3,000,000,000. This was divided almost equally between exports and imports, with the actual balance of trade in their favor. Argentina, for example, with an ambitious, vigorous and prosperous people numbering about nine millions of souls, conducted a foreign commerce valued at the surprising total of \$900,000,000, which makes an average of about \$100 per head. Chile, a land of achievement and promise,

## A BATCH OF SMILES

Objectionable. "It was rather impolite for you to snort when Jobbies pulled out his tin watch." "Oh, I wasn't expressing contempt for his timepiece." "No?" "I simply don't see any excuse for pulling out a tin watch with a flourish."

His Money Gone. Omar—Did you ever experience what might be termed a feeling of "gone-ness?" Hetty—Yes: I once backed a race horse that "also ran."

Counting the Cost. "This poet says love is all in all." "That's the poetical view of life," answered the practical person. "Yes?" "Married life is 50 per cent love and 50 per cent upkeep."

lying on the Pacific coast of South America (like the states of California, Oregon and Washington, on the Pacific slope of the United States), covering an area of nearly 300,000 square miles, or more than that of Texas, and directly tributary to the Panama canal, bought and sold in foreign commerce products valued at nearly \$282,000,000.

Advantages of the Telephone. Evan B. Stotsenburg, attorney-general, tells a story concerning the early days of the telephone in New Albany.

A character of the town, who operated an office in rooms just above the livery stable, was impressed with the benefits of the telephone and had one placed in his office. Meanwhile the new-fangled instrument also went into the livery stable. Then the town character sat down and waited for someone to take advantage of the new instrument. No one did. One day the telephone bell in the livery stable, however, rang with all its might.

"Hello," yelled the livery stable proprietor. "Hello, yourself," answered the voice of the town character, upstairs.

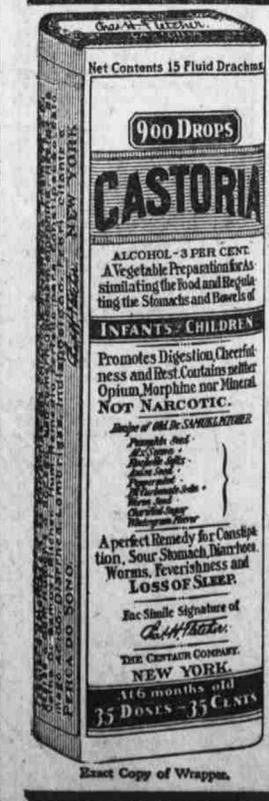

"Just pass me the broom up through the front windows, will you?" said the voice.—Indianapolis News.

Seventy per cent of the world's cork supply is said to be produced in Spain and Portugal.

Friendly Comment. Hamlet—I see by the papers this morning that our friend Footlits has shuffled off this mortal coil via the suicide route.

Eggbert—Bah! I'll bet that is another one of his schemes to secure a little free advertising.

No Shoes or Stockings. "When I came over from Ireland to this country I was a barefooted boy." "You don't want me to understand that you waded over, do you?"

## Children Cry For

## What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant, it contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic, all Teething Troubles and Diarrhoea. It regulates the Stomach and Bowels, assimilates the Food, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.
