

LANSBURGH & BRO.

SPECIAL CLOSING OUT SALE

Odds and Ends.

These goods to be found on our 2d floor, 7th street annex. Ladies' All-wool Black Equestrian Tights, sizes 2 and 3 only. These sold for 98c, \$1.12 and \$1.25. To Close, 50c pair.

Ladies' Short Underskirts, made in pink, blue and gray flannel-ette. To Close, 29c.

All of our Ladies' Elderdown Dressing Sacsques, in blue, pink and gray. To Close, 89c.

SPECIAL IN WRAPPERS.

The sizes being broken, we have divided the balance of our stock in two lots:

Lot No. 1—Comprises 98c and \$1.25 Wrappers— To Close, 69c.

Lot No. 2—Comprises \$2.25, \$1.98 and \$1.68 Wrappers— To Close, \$1.39.

Lansburgh & Bro., 420, 422, 424, 426 7th St.

Mother's Bread.

Trade-mark Registered.

Notice to the Public.

Beware of imitations of our celebrated Mother's Bread.

Some unscrupulous bakers are trying to palm off an inferior bread on our celebrated Mother's Bread.

None is genuine unless it has the words, "Mother's Bread. Just as Mother made it, and "Made by Corby's," on every loaf.

Anything else is simply a counterfeit, and is much inferior in quality. Our Bread is just like cake. We use cream, sugar and milk in our dough.

Mother's Bread is only made by Corby Brothers, 2335 Brightwood Avenue.

Ask your grocer for it. If he doesn't keep it, drop us a postal card and one of our wagons will serve you. Telephone 1440.

ONLY A STUFFED FIGURE.

North Terrytown Terrorized by a Supposed Ghost.

Tarrytown, N. Y., Jan. 26.—Chief of Police Minnerly, of North Terrytown, has ended a panic in that place by demonstrating that a "woman in black" that has spread terror among the residents is merely a stuffed figure.

Tales of a mysterious woman haunting the streets late at night, dressed in black, with a veil over her face and a hand held under a shawl, had been told there.

Wesley Van Tassel and some of his friends were going home through Beckman Avenue about midnight. They saw the figure of a woman in front of Farrington's drug store. As they drew near the figure went into a doorway, and as they passed the head was turned so that they could not see the face. They told friends of the incident, and the next night the police were on the lookout. The woman was supposed to be a victim of a ghost.

The figure was seen coming from the Sleepy Hollow Cemetery one night. Another time it was in Beckman Avenue, and often in Beckman's yard. A heavy thunder storm occurred Tuesday night, but the figure was not seen.

Worst reached the chief Minnerly Friday night that Miss Joanna Murphy had met the woman in black and that she had been thrown at her. The chief found the story was without foundation, but such tales served to spread panic in the village.

Paul Birdsell and a friend ran into police headquarters late last night and told the chief that the mysterious woman was in Beckman's yard. When the chief arrived there he found at least thirty men and boys standing around not daring to venture near the figure, which was seated on a wisp of straw.

Chief Minnerly walked up to the figure, took hold of the arm and gave it a shake. The arm separated from the body. The chief laughed and said the figure had probably been used to carry out the joke of some bad boys.

AMERICA LEADS IN

Marvelous Expansion of the Great Industry.

Twelve Million Tons Produced in the Last Year.

Share of Various Nations in the Total Output of the World.

New York, Jan. 30.—An estimate of iron production in 1898 made some weeks ago proves not 24,000 tons less than the official statement now made by the Iron and Steel Association. Surprising that estimate, and all others still more, the actual production, 11,723,834 tons, was at least 500,000 tons greater than anybody expected when the first half of the year closed with an output 500,000 tons greater than in any previous half year. There was then a very natural apprehension shared by many in the business that the pace had been rather too fast to last, and would not be sustained by the future consuming demand. It was true that the consumption during the first half of the year, reckoning a decrease of 118,642 tons in stocks unsold, imports of 13,245 tons and exports of 56,421 tons, had been 5,545,889 tons, which was larger by 569,844 tons than in any previous half year. Yet the actual consumption of pig in manufacture appears to have been 103,520 tons greater than the year before, and the remarkable fact is that it was not until the end of the year that the war had created an unusual demand for iron and steel products which could not be expected to continue after the war ceased. But the consumption in manufacture during six months, of which five were months of peace, was actually larger than in any half year, and two months were spent in war and two more in preparation for war.

Out Gings of the Mineral.

The figures are here given for the first time, exactly, because the official reports of imports and exports of iron have not been published, but are shown in advance received by Mr. Austin, Chief of the Bureau of Statistics at Washington. Exports for the year were 25,370 tons, and the imports 24,137 tons—a net output of 238,521 tons. But the decrease in the stocks unsold was 420,645 tons, and the production 11,723,834 tons, and the consumption in manufacture was 12,005,058 tons for the year, without allowance for such stocks as are carried by the great export companies but not reported to the association. The official figures for exports and imports during the first half of the year with those of the association for all of the year, and the consumption during that half-year as stated above, leaving 6,659,189 tons for the last half of the year. Thus both half-years surpassed all former ones, and the consumption in 1898, and the consumption in the calendar year, exceeded that of the fiscal year 1896, the largest fiscal or calendar year preceding, by 1,828,855 tons—nearly 18 per cent.

Pig-Iron in Domestic Use.

These figures, it will be observed, show the quantities of pig iron consumed in all forms of domestic manufacture. That is a matter which can be somewhat definitely determined; the effort of some to find out what quantities of iron and steel products all forms carried into the country, sent out, and remained for use here is entirely impracticable, because no record shows the weights of heavy machinery and other products which are exported. The "Financial Chronicle" judges that the exports were nearly 900,000 tons, which seems not improbable, because the quantities which are reported were in eleven months about 850,000 tons, besides pig iron, against about 52,000 tons imported. But it is not of the least consequence how much fine cutlery, tools, or electrical machinery, or saws, or sewing machines, cycles, or typewriters. There is scarcely any finished product of which half the value is the cost of the raw material, and the most valuable exports are those which are of a high value, and which are of a comparatively constant in successive years. At intervals of ten years the development of the industry to higher and higher levels, and the cheapening of production, so that the ratio of all products to materials was 2.5 in 1899, against 1.5 in 1889. Yet the ratio of the prices of leading products of iron in this market at various dates to prices of pig iron has been as follows:

Table with 4 columns: Year, Price, etc.

Quotations of wire nails are not found for the earlier years, but in January, 1887, the price of wire nails was \$2.15, and at the same date of cut nails, \$2.30.

Consumption in England.

British consumption of pig-iron in manufacture during 1898 is not yet definitely known, but in the first half of the year reached the highest point it had ever touched—4,025,000 tons in six months.

The "London Economist" is right in estimating the year's production at about 9,000,000 tons; the consumption may have a little exceeded the record for any previous year—namely, 8,117,227 tons, adding imports and deducting exports for the year. The total production of pig iron in the world, according to the figures, and Germany produced 7,400,000 tons, or 21.1 per cent, but the official statistics make the production of the United States 25.7 per cent of that quantity. These rates compare with 32.7 per cent for Great Britain, and 18.9 per cent for Germany. But the estimate for the United States was 273,254 tons too small, and our estimate may prove as much, or more, in error.

WON'T PAY FOR LYNCHING.

County Held blameless in the First Suit Under the Ohio Law.

Urbana, Ohio, Jan. 26.—The jury in the suit of Benjamin F. Church against the county commissioners of Champaign for \$2,500 has decided in favor of the county. The suit was to recover under an act passed by the legislature giving that amount to the next of kin of a person meeting death by the hands of a mob. The case is the first one tried under the law. The case was carried to the supreme court to test the constitutionality of the law.

The suit is the outgrowth of the lynching of "Click" Mitchell June 4, 1897. Mitchell was taken from the county jail and hanged in the court house yard in the presence of 16,000 people.

Presumption of Death Admitted.

London, Jan. 30.—Justice Barnes, of the probate, divorce, and admiralty division of the High Court of Justice, has granted to Lady Curtis an order presuming the death of her husband, Sir Arthur Clouston Curtis, who joined the Klondike mining party and disappeared from Mud River on June 10 last.

JUVENILE MISCHIEF

WRECKS A POWDER HOUSE

EXPLOSION OF A MAGAZINE

Boys Set Fire to Meadow Grass, and the Result is a Serious Disaster.

Bridgeport, Conn., Jan. 30.—The explosion of a powder magazine Saturday morning shook the whole city and damaged several houses in the eastern section. Two persons—Pedro Maleno and Katie Andrews, nine years old—were badly cut by flying glass from broken windows in their house, which is the nearest habitation to the wrecked magazine.

There are three powder houses on the Salt Meadows, which are on the corner of the ship Park Boulevard. Except for the house built by Maleno on the edge of the meadows there is not another dwelling within several hundred yards of the meadows, and the boys with a penchant for mischief set fire to the long, dry meadow grass. Flamed by the steady wind from the north-west the flames leaped to the meadows, roaring and cracking fiercely as they leaped toward the magazines.

The locality realized the danger and were loath to jeopardize their lives, but several volunteers, armed with buckets, went to work to check the fire. It steadily crept toward the meadows, and when it became apparent that the first house could not be saved the volunteers ran for their lives.

The houses which were on the meadows were a series of reports. The first two were light, but they were followed by an ominous roar, and the earth was thrown up and the powder house went skyward, blown to atoms.

Maleno and the Andrews girl were in the house when the explosion came from the window. The glass in every window was shattered. The flying pieces struck them in the face. Maleno had an ugly cut on one cheek, and the little girl was cut in several places.

Glass in houses half a mile further was broken by the concussion. After the explosion the boys were taken to the meadows, and men went to work to save the other two powder houses, located a short distance away. The nearest one was a brick structure, in which were stored a large quantity of dynamite. The reinforced corps of workers finally checked the flames, preventing a second and probably more disastrous explosion.

The wrecked powder house belonged to Billings & Clamette, druggists, in Wall Street, this city.

STRUCK BY AN ICE YACHT.

Skaters Knocked Unconscious by a New York Yacht.

New York, N. Y., Jan. 29.—Miss Margaret Gilbride and William Fowler, Jr., of Marlborough, narrowly escaped being killed by an ice yacht Saturday afternoon on the Hudson River, near that village.

While they were skating together Miss Gilbride and Mr. Fowler were struck by the yacht, which was being driven by a man at a high rate of speed. Both were hurled a considerable distance, and were rendered unconscious. Mr. Fowler was badly cut about the head, and Miss Gilbride sustained serious bruises, and it is feared she was injured internally. The couple were conveyed to Marlborough, where they were attended by Dr. Mosher.

Howard P. Mosher and A. L. Morgan, of New York, who is visiting at the former's home, met with an accident recently while sailing the ice yacht Storm King on the Hudson. The wind was blowing a gale, and they were getting caught on the boom of the yacht. With the speed of an express train the boat plunged into a large hole, and Mosher and Morgan were hurled to the edge of the ice. Morgan was the first to get out, and taking off his overcoat, threw it to Mosher, who grasped the sleeve, and was drawn to safety.

GRANGE MEETING.

Large Assembling of Farmers Held at Beltsville.

Beltsville, Md., Jan. 30.—The Pomona Grange, composed of eight subordinate granges—the Beltsville and Eureka granges, of Beltsville; the Union Grange, of Grove, Olney, Brighton, Damascus, Barnesville, and Rockville, of Montgomery county; met at Brighton last week, with a large attendance from the surrounding country. The following officers were elected: Master, John C. Bentley, Olney Grange; overseer, W. Everett Brown, Brighton Grange; secretary, W. T. L. Tallaferra, Beltsville Grange; secretary, Mrs. Charles Harris-borne; chaplain, William Rich, and treasurer, S. W. Bell, Beltsville.

THE LIBELLANT'S WON.

Crew of the Canada Paid Off and the Vessel Released.

Norfolk, Va., Jan. 30.—The libel suit of fourteen members of the former crew of the British ship Canada, Capt. N. V. Munroe, was decided in favor of the libellants by United States District Judge Edmund S. Ford, at the city of Norfolk, Va. The owners of the vessel, which is in the stream ready to sail for Rio Janeiro with a cargo of coal, decided to pay off the claim, and the crew were thereupon paid off yesterday and the ship was released. The amount of the judgment was \$463.20.

CATARH OF STOMACH.

A Pleasant, Simple, But Safe and Effective Cure for It.

Catarh of the stomach has long been considered the next thing to incurable. The usual symptoms are a sour, flatulent, and watery action of the bowels, accompanied sometimes with sour or watery risings, a formation of gases, causing pressure on the heart and lungs and general debility, and a general played out, languid feeling.

There is often a foul taste in the mouth, coated tongue and a feeling of the interior of the stomach as if it would show a slimy, inflamed condition.

The cure of this common and obstinate trouble is found in the use of the new and improved food, which is thoroughly digested before it has time to ferment and irritate the delicate mucous surfaces of the stomach. To secure a prompt and healthy digestion is the one necessary thing to do, and when normal digestion is secured the catarrhal condition will have disappeared.

According to Dr. Harlanston the safest and best treatment is to use after each meal a tablet, composed of Diastase, Aspic, Pepsin, a Little Nux. Golden Seal and fruit acids. These tablets can now be found at all drug stores and are not a patent medicine, can be used with perfect safety and assurance that healthy appetite and thorough digestion will follow their regular use after meals.

Mr. N. J. Booher, of 2710 Dearborn St., Chicago, Ill., writes: "Catarh is a local condition resulting from a neglected cold in the head, which has become a chronic inflammation of the nose becomes inflamed and the poisonous discharge therefrom passing backward into the throat reaches the stomach, thus producing the catarrh of the stomach. Medical authorities prescribed for me for three years for catarrh of stomach without cure, but today I am the happiest of men, after using only one box of Stuart's Dyspepsia Tablets. I cannot find appropriate words to express my good feeling. I have found flesh, appetite and sound rest from their use."

Stuart's Dyspepsia Tablets is the safest preparation as well as the simplest and most convenient remedy for any form of indigestion, catarrh of stomach, biliousness, sour stomach, heartburn and bloating after meals.

Send for little book mailed free, on stomach troubles, by addressing Stuart Co., Marshall, Mich. The tablets can be found at all drug stores.

Jan 30

AN ENGINEER'S

Electricity to Be Produced by Water Power.

Successful Experiment at the Miller Manual School in Richmond.

The Water Will Have a Fall of Two Hundred and Fifty Feet—Steam to Be Superseded.

Richmond, Va., Jan. 30.—The Miller Manual School, in Albemarle county, one of the largest and most prosperous institutions of the kind in the South, has recently accomplished one of the most interesting engineering feats that has been attempted in Virginia for some time. This school, which was provided for in the will of the late Samuel Miller, of Albemarle, is located near Greenwood depot, at the foot of the mountains in that county. Until recently all of the machinery used in the various shops in the institution was driven by steam engines. Mr. Weaver, the principal of the school, conceived the idea of converting the old stream on the top of the mountains into motive power to take the place of steam.

A reservoir was constructed with a capacity of 10,000,000 gallons, and the water is brought down from the reservoir to the workshops in heavy iron pipes. The elevation gives a fall of 250 feet, the highest fall used for manufacturing purposes, probably, in Virginia. The turbine wheel, which is propelled by this stream, furnishes motive power for generating electricity, which is used for lighting and for driving all of the machinery.

Terminal Construction.

The construction of the terminal buildings here and the other work which the Richmond, Petersburg, and Carolina Railroad Company project, will give employment to a large number of persons. The bridge which this company will have to build over the James River, which is expected to be not only durable, but also a handsome one.

Skaters Knocked Unconscious by a New York Yacht.

New York, N. Y., Jan. 29.—Miss Margaret Gilbride and William Fowler, Jr., of Marlborough, narrowly escaped being killed by an ice yacht Saturday afternoon on the Hudson River, near that village.

While they were skating together Miss Gilbride and Mr. Fowler were struck by the yacht, which was being driven by a man at a high rate of speed. Jan 30

and Boston. Upon the announcement of the bishop's inability to be present, however, the elaborate celebration was abandoned. The anniversary was appropriately observed in the school chapel. Rev. Dr. Frissell made the address.

WINCHESTER'S POSTOFFICE.

New and Commodious Quarters Occupied.

Winchester, Va., Jan. 30.—The postoffice is now located in the handsome new three-story building which has just been erected at the corner of Market and Water Streets, the new building having been made Saturday. The postoffice inspector who is in this city Friday says that the department's new quarters are the handsomest and most roomy in the State, outside of several of the offices located in government buildings.

SNOWSTORM IN VIRGINIA.

Heaviest Known for Many Years. Traffic at Norfolk Delayed.

Norfolk, Va., Jan. 30.—The heaviest snowstorm in years visited this section Saturday. An early hour snow began falling and continued on into the night. Traffic was considerably delayed.

Petersburg, Va., Jan. 30.—A real mid-winter snowstorm visited this city Saturday and continued until late in the afternoon. The flakes fell to a depth of 10 inches or more, and the snow was the deepest known in Petersburg for some years. There were a number of sleighs on the streets and the sleighing was good again yesterday.

Richmond, Va., Jan. 30.—About 5 inches of snow fell here Saturday. Reports last night indicated that the storm was pretty general over the State.

Danville, Va., Jan. 30.—The biggest snowstorm of the season visited this section Saturday, leaving about 8 inches of the fleecy substance on the ground.

MORRITZ BECKER'S FAMILY.

Wife and Three Children Will Be Deported to Russia.

Richmond, Va., Jan. 30.—The wife and three children of Morrutz Becker, it seems now, will have to be deported to Russia. They have been at Castle Garden, New York, since January 1, awaiting appeals that have been made to General Immigration (Commissioner) Powderly to permit them to come to the United States.

This Mr. Powderly declines to do. Becker claims that being a naturalized citizen entitles his wife and children to come here. The commissioner, however, asserts that Becker's papers were obtained by improper representations. This official also says that the wife of Becker came to this country under an assumed name. This latter's counsel admitted that claim, but was done to enable them to secure a passport in Russia. Today Becker's friends have been endeavoring to procure the means with which to secure a writ of habeas corpus in New York to prevent the deportation of the man's family. They have failed in this, owing to the limited time, and Mrs. Becker is expected to be sent back on a ship tomorrow evening.

ENGINE EXPLODED.

Three Men Seriously Injured Near West Appomattox.

Lynchburg, Va., Jan. 30.—The engine of a freight train on the Norfolk and Western road exploded yesterday morning near West Appomattox. The force of the explosion was so terrific that the heavy mass of steel and iron was thrown around on all sides entirely from the track. Many of the cars were thrown from the rails.

As the men in the rear of the train hastened forward they found that Engineer Oliver and his fireman and the front brakeman had been severely injured. They were at once removed to the caboose, and in a short while the officials of the road were notified of the accident. Physicians responded, and the injured were brought to this city. It is thought all will recover.

GUARDING AGAINST SMALLPOX.

Authorities in Virginia Taking Precautions Against the Scourge.

Richmond, Va., Jan. 30.—Extraordinary precautions are being taken against smallpox in Virginia, and even the small towns and some of the counties are providing for general vaccination, making it compulsory. The Chesapeake and Ohio Railroad has established its own system of inspection of its trains by doctors at the important points, and the disease has been listed at several points to a considerable extent for months, not a single death has resulted. It is virulent in several small towns in North Carolina.

OLD DOMINION NEWS NOTES.

Mrs. Mary A. Rhodes, widow of the late Joseph Rhodes, died at her residence near Lansburg Saturday.

The first important road by Mayor W. M. Fulk, of Piedmont, awarded the police expenses \$22.10.

The south-bound passenger train on the Norfolk and Western road, which was killed Sunday at Ledlow, of Spray, N. C. Saturday night, about six miles north of Martinsville.

Postmaster Sill Billings, who had the misfortune last week to lose his leg, is being strapped from a train at the Union depot in Petersburg, and who has been confined to the house ever since, is improving. He is now able to walk a little and to eat.

Messrs. Fisher and Stewart, capitalists of Pennsylvania, are having a large saw mill and saw factory erected at Ledlow, a new town on the Richmond, Petersburg and Carolina Railroad. The firm expects to purchase and utilize all or most of the output of the saw mills on the line of this road.

Green Mauck, a young man of Lacey, met with a serious accident at that place Saturday. He was attempting to draw the brake on a heavily-loaded lumber wagon while riding, and, slipping, fell. The hind wheel passed over his leg on the frozen ground, causing a compound fracture above the knee. The bone was so badly broken and splintered that it is feared the leg cannot be saved.

Yesterday afternoon, while examining a shotgun, a youth named Edward Cook, of Lexington, accidentally though not fatally shot his mother in an adjoining room. He was a short distance from a table on which he had a thickness of plaster. During the epidemic of the grippe a few years ago, when so many cases resulted in pneumonia, it was observed that the attack was never followed by that disease, which is known as Cough Remedy was used. It counteracts any tendency of a cold to grippe to result in that dangerous disease. It is the best remedy in the world for colds and the grippe. Every bottle is guaranteed. For sale by J. H. Evans, Wholesale and Retail Druggist, 328 F. & W. and Conn. ave. and 8th st., and 1258 Md. ave. n.e.

Physicians recommend Heurich's Maresin and Senate Beer for invalids. Phone 634, Arlington Building Co., for a case of Heurich's.
