

The Evening Times

THE TIMES COMPANY. PUBLISHED BY THE TIMES COMPANY, 1111 F STREET, N. W., WASHINGTON, D. C.

Subscription Rates: Monthly by Carrier, Fifty Cents; by Mail, Sixty Cents.

Circulation Statement: The circulation of the Times for the week ending February 18, 1899, was as follows:

Advertisement Rates: The advertising rates of the Times are as follows: One square, one week, \$1.00.

Communications: Communications intended for publication in the Times should be sent to the Editor.

Long on Dewey: We trust that no one seeking for light as to the meaning of Admiral Dewey's omission to cablegram to the Navy Department.

Cuban Good Will: The demonstration at Havana yesterday on the arrival of General Gomez demonstrated the good feeling that exists between the majority of the Cubans and the Americans.

An Abused Young Man: There have been a good many women over the alleged mad determination of a woman to do men's work.

The Price of Labor: An article by Herbert Casson, in the "Coming Nation," contains some interesting and rather significant facts regarding the price of labor in different countries.

of the kind is done. The German gets his living, the American does not get anything like sixty-five times his living.

But, though it is quite true that there is something wrong, this is one of the cases in which statistics prevaricate, if they do not quite lie.

There are several circumstances which tend to modify this astonishing discrepancy. In the first place, the American shoe which is made in eleven minutes is not always as durable or as high in price as the German shoe made in half a day.

Before the improvements in machinery in this country shoes often cost \$8.50 and \$10 a pair, and that without being remarkably fine shoes.

In those days factory work was in its infancy, and the operatives usually laid up money in the savings bank and often owned their homes.

They made money, and so did the farmer, because there was less competition, but their ways of living were simpler and they regarded many things as luxuries which people now consider necessities.

It would be a poor family nowadays which had no light except that of the fire or a candle, but that was the state of affairs in well-to-do farmers' houses two generations ago.

The conditions of our living today demand that the woman in order to have necessary intelligence for his work and be a useful member of the community, should spend twice as much as he did fifty years ago.

It is a good thing if he has twice as much to spend; otherwise it is a most mischievous thing. And one of the misadjustments of the time is that in some places the workman of today is better off than the laborer of fifty years ago.

When the woman in order to have necessary intelligence for his work and be a useful member of the community, should spend twice as much as he did fifty years ago.

The capitalist should not be blamed for conditions which are beyond his control. But he is to blame if he uses his wealth in such a way that it is a public menace.

There is a remarkably lucid and cogent statement of a view by no means uncommon, especially among youths who are philosophically inclined.

What will be the effect of this clear-cut and emphatic statement of the sphere of woman? Two things might possibly come of it.

The interests and feelings of the women themselves have been considered long enough. They have no business to remain in offices when it is not best either for them or the country.

They should retire, or be discharged, and men should be appointed in their places. This much is clear. But is the correspondence of the St. Louis work ready to do his part in this gross work?

GENERAL WASHINGTON NEWS AND GOSSIP. General Egan and His Pay—The alleged intention of the War Department to hold up General Egan's salary during the six years he is under suspension from the service is believed to be an afterthought on the part of the Administration.

The President has decided to order the alleged intention of the War Department to hold up General Egan's salary during the six years he is under suspension from the service is believed to be an afterthought on the part of the Administration.

It is not for an instant to be supposed that it will have any effect upon the spread of the disease, the sentiments expressed by the health authorities of this city are making every effort to stamp out and control the spread of the disease.

VACCINATION AND SMALLPOX. An Advocate of Vaccination. To the Editor of the Times: At the end of the nineteenth century it is surprising that such ideas should be promulgated as I noticed in a recent letter in the Times, under the heading "Smallpox or Vaccination."
