Instead of having them handled over and over again, no one touches them from the time they leave the oven until they reach your table. Instead of keeping them in a cracker jar to get stale and musty you keep them in the package, and the package keeps them fresh. THE QUEEN OF BEAUTY To Appear in Washington in Regal Splendor.

A Grand Society Event Mme. Yale to Lecture Beauty and Physical Culture.

Subject: "The Art of Attractiveness." The ladies of Washington are to be scientifically entertained at the National Theatre by the world's greatest living scientist on Beauty Culture and Exponent of "Beauty." Mme. Yale, of international fame, is to give one of her classical lectures and high-class entertainments there on Tuesday, May 14, at 2:30 o'clock p. m. "Attractiveness," Mme. Yale's subject on this occasion, will give her broad scope for artistic rendition.

Personal Mention. Mme. Yale, who was originally a portrait and figure painter (while abroad pursuing her art studies), conceived the idea that it was the Creator's intention that all humanity should be beautiful and that each generation should evolve into greater beauty, set herself the life task of transforming human ugliness into beauty and bringing about this great reform. Her first experiment, which was upon herself, wrought such marvelous results as to create a profound sensation in scientific circles throughout the civilized world and to completely revolutionize human evolution.

Physical Culture. Mme. Yale's system of physical culture creates health and beauty; it lends strength and dignity to the carriage; it gives suppleness to the body, elasticity to the muscles, limberness to the joints, and the poetry of motion to gesture of movement and grace to the expression of the body.

Beauty Culture. Mme. Yale will give instructions for ridding the skin of all blemishes and for creating a perfect complexion. The hands, arms, neck, and bust will likewise receive artistic consideration.

Wrinkles. Mme. Yale is the only authority in the world who has conquered wrinkles. She will instruct the ladies how to banish them and how to keep them at bay forever.

The Eyes, Mouth, and Expression. Mme. Yale will lay great stress on the treatment for beautifying the eyes, mouth, and expression.

The Hair. Mme. Yale is the only scientist who understands the scientific workings of the human hair. Its natural restoration to color is among her noted achievements.

Superfluous Hair. Mme. Yale will tell how to overcome the abnormal state of superfluous hair so as to refine it to a normal condition, making the cure permanent.

Tickets Complimentary. Tickets for Mme. Yale's lecture, good for a reserved seat, will be given conditionally free. In order to control them and to distribute them without showing any partiality in regard to choice of seats, all who apply for a ticket will be requested to make a purchase of one or more of Mme. Yale's discoveries.

Mme. Yale's Beauty Books. All visitors to the Yale Beauty Department this week will receive two books written by Mme. Yale on the immortal theme of Beauty. The Yale system completely will be quite in Mme. Yale's book, "Woman's Wisdom." Ask for "Hair Beauty" is a complete treatise on the human hair.
