

MEMPHIS APPEAL. TUESDAY, SEPTEMBER 7, 1886.

THE BUSINESS SITUATION. The commercial newspapers continue to speak in the most cheerful terms of trade, present and prospective. The New York Bulletin says that "another symptom of improving business is the fact that lake freights have received a further impetus this week; and as about all the available tonnage at Chicago has been taken up, the movement cannot be regarded as a fiction or momentary."

adopted by the State Board isolating the fever in the quarter where it broke out. Biloxi faces the gulf, and is on the railroad to Mobile, fifty miles from New Orleans. The type is mild, and the situation of Biloxi makes it easy to keep the healthy from approaching the sick. No fear exists of the sickness spreading to New Orleans, and the Times says: "New Orleans was never in a healthier condition than at present, and has been singularly fortunate in escaping the effects of an overflow from the river and from excessive rains."

THE WORKINGMEN.

"LABOR DAY" CELEBRATED AT VARIOUS CITIES.

Imposing Demonstrations at Boston, New York, Chicago, Baltimore and Newark. BOSTON, Mass., September 6.—"Labor Day," which is to be a permanent annual institution in Boston, was being celebrated by the workingmen of this city and suburbs today in an imposing manner. The feature of the morning was a grand procession in five divisions in which it is estimated at some 15,000 persons participated and which took an hour to pass a given point. The marching order was as follows: First, the various labor organizations of the city, as reviewed by Mayor O'Brien on School street and was witnessed by thousands of people who crowded the sidewalks along the route and in the narrow streets crowded and encroached on the right of way of the procession. The exercises of the day were to be continued at a monster picnic which is to be held at Downer Landing. The afternoon will be devoted to athletic sports, dancing, clam bakes, etc.

THE PRESIDENT'S PARTY

Enjoying Themselves at Lake Placid—A Pleasant Journey. STEVENS HOUSE, LAKE PLACID, N. Y., September 6.—The President's party breakfasted at 7 o'clock at the Stevens House, Lake Placid, this morning, and drove forty miles today over a stretch of country affording some majestic mountain scenery. The route was through the Wilmington Notch and down the west branch of the Au Sable river, and then up the east branch of the same river, through the Keene valley, and thence across the country to the westward. The trip through Wilmington Notch furnished a view of the big falls of the Au Sable river, where the water rushes over the rocks and falls feet into the bed below. At this point the rocky sides of the mountain gorge rise perpendicularly to a height of many hundred feet and the strip of White Face Mountain, laid bare by the landslide, is distinctly seen from the road. The horses on the Au Sable and the party junched in the shade of a cump of trees, a couple of miles below the village of Keene. Somebody had recognized the President as he was going through the village of Upper Jay and word that the President was coming reached Keene an hour in advance of the travelers. The villagers hastened down to the Keene Center House to see him and Mrs. Cleveland. After a halt of an hour in order to bait the horses and replace a shoe on one of them, the President's party drove leisurely over to Adirondack Lodge. When within a few miles of Adirondack Lodge, where it had already been arranged they should remain till tomorrow morning, they changed their plans and drove back to the Stevens House. The route which they had traveled during the day was nearly circular, hence their ready return to the starting point after forty miles of travel. The change of programme was made after leaving Keene some miles behind.

New York, September 6.—There being a movement to secure the listing of some new issues of Georgia State bonds at the Stock Exchange, Henry Cleveland sent a letter to the chairman of the Stock List Committee, protesting against favoring the action, because of the continued attitude of repudiation maintained by the State with regard to the 7 per cent. gold and gold quarterly bonds. Mr. Cleveland's attention to the decision of Attorney General O'Brien in October, 1885, prohibiting savings banks from investing in Georgia State bonds. His letter is accompanied by the following protest addressed to the Governing Committee: "We, the undersigned holders of repudiated bonds of the State of Georgia, have learned that an application has been made for listing upon your exchange new issues of bonds of that State. We respectfully urge upon you that, so long as the name of Georgia remains dishonored by repudiation, you should stamp upon such applications your absolute disapproval, and thus maintain the well known and uncompromising hostility which the New York Stock Exchange has always shown against bad faith and dishonest practices."

THE TURF.

Brooklyn Jockey Club Races. New York, September 6.—The attendance was about 6000. The track was in splendid condition, owing to the slight rains, and the races were all that a lover of close finishes could desire. The features of the day were the withdrawal of O'Fallon in the fourth race. He was disqualified because, as asserted by the Association, he had won a stake race. He did win the cash stakes at Saratoga. In the fifth race, Bedford behaved very badly at the post. He was nearly thrown by a fall, rolling over his jockey (Griffin) and breaking two of his ribs on the left side and damaging him internally. Bedford was then taken to his stable. The suit, which is backed by the Board of Transportation of this city, is brought against the railroad individually under the State law, which forbids pooling by competing lines. THE FEBER AT BILOXI.

The New Orleans Times, in a very sensible article upon the intelligence received last week from Biloxi, censures the idiotic policy pursued there that endeavored to hide what is impossible to conceal, and says: "Any attempt to conceal the truth in a case of this kind will only bring evil. Indeed, had the first case at Biloxi been reported, as it ought to have been, that town would, in all probability, have escaped its present unfortunate condition." The same paper assures us that the most vigorous measures are
