THE BEAVER FALLS DAM

It Will be Rebuilt, and Work is to Commence at Once

BEAVER FALLS, March 11.—Preparations are now being made to rebuild the dam across the Beaver river, north of town, which was washed away in existence, some years ago. When the canal was abandoned it was allowed to get out of repair, and some years ago, during high water, it was swept away. The rebuilding of it will give Beaver Falls one of the finest water powers in the country, and will also create a body of water seven miles in length that can be used for pleasure boats and from Rock Point, Homewood and other points north. Work will be commenced as soon as the weather permits.
