

OLD RATES RESTORED

The East and West-Bound Tariffs on Iron and Steel

INCREASED 12 PER CENT.

Manufacturers Say the Trade Can't Stand the Advance.

RAILROADS DEMAND THEIR SHARE

Railroad freight rates on iron and steel were pushed up another notch yesterday. In consequence there is considerable agitation among the manufacturers who are directly affected.

In accordance with instructions received from the joint committee of the Central Traffic and Trunk Line Associations, a meeting was held yesterday afternoon by the Pittsburgh Committee in the private office of the Lake Shore road.

CHASING THE OTHER ADVANCE.

This is following close upon the heels of the advance of about 10 per cent which was made about two months ago. On Wednesday THE DISPATCH published an item to the effect that the advance was not a permanent one.

The rates were advanced about one month ago, and I cannot understand the necessity of increasing the burden on the iron manufacturers. The railroad officials think that this is the only way to enable the manufacturers to make a slight profit.

SHIPPERS LOSING MONEY.

The iron manufacturers and large shippers of this city are losing money for the want of better service. The shippers of iron by the railroad companies is the weakest apology I ever experienced.

At the office of Jones & Laughlin it was stated that Mr. Jones was out of the city in reply to the inquiry, his representative said:

"Suppose the railroads have advanced the rates, what difference does it make? There is no use kicking, as it will not alter the case. All the disaffected talk of iron manufacturers that could be published for the next month would have no effect on the matter.

AN OPPOSITE VIEW.

Another manufacturer, who has a large plant on the Southside, and who asked that his name be withheld, took the opposite view of the matter. He said that the railroad companies should have advanced the rates in a poor condition, and every road tried to get what little business there was.

One of the railroad officials who was present at the meeting yesterday said that five years ago when the iron business was at a low ebb and the manufacturers were complaining of losing money we reduced the freight rates at their request.

The Chicago, Rock Island and Pacific road announces a reduction in rates on railroad materials to Denver and Colorado points. The rates are good for 30 days.

HAYS AGAIN DENIES IT.

He says that he did not mention any of the Church's funds. Rev. I. N. Hays, of the Central Presbyterian Church, of Allegheny, was visited at his residence last evening by a DISPATCH reporter, and questioned in regard to the rumored misapplication of funds by the trustees.

"It is all about some misapplication of funds. The members of the congregation have, and always have had, a full knowledge of all financial transactions on the part of the trustees. As to members of the congregation promising money for the support of the church and then refusing to pay, I have no knowledge of any individual instance of such defection. I do not see why such reports are published, as they are untrue and do great damage. The true story has been published in THE DISPATCH."

WRANGLING ABOUT A SITE.

Allegheny Councils Can't Agree on a Place for the Electric Power House—Irwin Avenue Power Protest.

Allegheny Common Council held a special meeting last night, when President Hunter was absent, and the body came to order and Mr. Dahlinger was called to the chair. The first business taken up was the report of the City Property Committee, reporting the failure to purchase the site for the electric power house at Irwin avenue and Oak alley for \$7,000, and recommending that another site on Irwin avenue be purchased for \$6,700.

On motion of Mr. Parke Mr. Charles W. Robb was given the privilege of speaking on the resolution. He said that if the plant was located where proposed it brings it close to the most valuable property in the city. He had been assured that there would be no noise and no smoke, and that everything would be lovely for the residents. He could not say that the lot, 35x119, was not better suited to the growing demands of the city for five years. He did object to having a plant with its noise and dirt put alongside of the most valuable and highest taxed property in the city.

R. H. Boggs was also opposed to it. He spoke of new the old stockyards had kept the progress of the city back for years. The stockyards are gone and that section is building up. To put the power house there was to throw it back again. One man had said that he had an option on a lot or two lots on Burns Vista street, on which he meant to build two good houses, and he was waiting to see what Councils did about this plan.

John H. Hampton said he had lived on North avenue for years, and wanted to end his life there. He spoke of the miseries the people had suffered during the stockyard days, and said that he would like to see peace now. He told the Councilmen that the resolution they were considering was not legally drawn, as it did not describe the property under consideration.

Mr. Dahlinger announced that the resolution had been drawn in the shape presented to enable the committee to buy where they pleased if they could not get the site contemplated.

Mr. Soaman, of Select Council, Chairman of the committee on the subject, was asked to speak on the matter. He gave a history of the work of the committee. He said that one of the men interested in the property that the committee refused to take the lot on which the power house was to be located could not now be located on Irwin avenue, and he thought they had been stirring up the neighborhood.

Mr. Knox said he favored action at once. Mr. Hampton had spoken of the Martin street property owned by the city. There were people living on that street and he would like to see it sold for \$50,000.

Mr. Soaman said that the committee could get a better site they would have an option on the lot on which the power house was to be located. He said that the committee had been asked to purchase the site on Irwin avenue, and he thought they had been stirring up the neighborhood.

Mr. Soaman said that the committee had been asked to purchase the site on Irwin avenue, and he thought they had been stirring up the neighborhood. He said that the committee had been asked to purchase the site on Irwin avenue, and he thought they had been stirring up the neighborhood.

A FINE HIGH SCHOOL.

The Allegheny Building Dedicated at the Educational Shrine.

BIG CROWDS, SPEECHES AND MUSIC

Dr. Moffat and Superintendent Houck Kevel in Wit and Oratory.

VERY PLEASING EVENING INSPECTION

A large and appreciative audience, composed of some of the best people of the sister city, assembled in the elegant and commodious hall of the new Allegheny High School yesterday afternoon to listen to the dedicatory exercises of that magnificent and beautiful building.

The large hall was crowded to its utmost capacity, many persons having to stand in the aisles and alongside the walls. The exercises, however, were of such character that those who had to stand soon forgot their small discomfort in a most thorough enjoyment of the addresses and music.

The hall was embellished with cut flowers and potted plants, the work having been done by Superintendent of Parks William Hamilton and Ludwig and Richter, the stairways and halls were similarly decorated and presented an attractive and inviting appearance, furnishing somewhat of a foretaste of the good things in speeches and music that were to follow.

All very interesting. The exercises were commenced with music by the Allegheny Concert Orchestra, which rendered the number, "Sounds of Joy," in a most splendid manner. The liberal applause which followed the rendition was taken as an indication of joyful feelings in the breasts of the friends of the High School. Next, the anthem, "All Ye Nations," was followed by a fervent and touching prayer by Rev. J. W. McKean, D. D., after which the chorus rendered, "O Columbia! We Hail Thee."

Just here the first and only hitch occurred in the programme. James S. Young, Esq., President of the Board of Controllers, was down for an address. When the time for his delivery arrived Mr. Young was not on hand. The gentleman making the announcements apologized for Mr. Young in a few well-chosen words and then introduced R. B. Scandrett, Esq., Secretary of the Board, and one of the hardest workers for the success of the school.

Mr. Scandrett gave an interesting historical sketch of the High School, and of the trials and tribulations through which its supporters had to pass before the present magnificent building was commenced. Mr. Scandrett spoke of the opposition against the High School and of its final overthrow, and likened its promoters and adherents to heroes, who could manfully stand out for success in spite of all adverse circumstances.

As he told of one achievement after another, the applause was long and loud. When he finished his address he was greeted with a shout of success in spite of all adverse circumstances. Mr. Scandrett spoke of the opposition against the High School and of its final overthrow, and likened its promoters and adherents to heroes, who could manfully stand out for success in spite of all adverse circumstances.

WEST POINT MILITARY ACADEMY, AND THE HIGH SCHOOL FACILITY AND COMMISSION.

The audience passed out many favorable comments on the building were heard, and the general verdict is that Allegheny at last has a High School of which she can be proud.

About a month or more ago a full description of the new building appeared in the columns of THE DISPATCH. In the evening a public reception was held, and the building thrown open for the inspection of the citizens. Large crowds availed themselves of the opportunity to inspect the interior with its fine furnishings, and to be regaled with the sweet strains produced by the Allegheny Concert Orchestra, which was stationed at the head of the grand stairway on the third floor.

HALLOWEEN ENDS IN DEATH.

John Kaye Expires After a Debauch on Wednesday Evening.

The dead body of John Kaye, a boiler maker in the employ of R. Munroe & Sons, was found in the second-story front room of a small frame dwelling house, No. 107 First street, Allegheny, yesterday morning about 3:30 o'clock, by Officer Dittner. Kaye had spent Halloween drinking whisky with his wife and another woman named Bulger, whose guests they were. About midnight Kaye and his wife, who were too drunk to go home, retired on a shakedown on the floor. About 3 o'clock in the morning his wife awoke and spoke to him, but received no answer. She then called to Mrs. Bulger, saying that Kaye would not answer, and that he was sick. When they tried to wake him they found that he was dead. Both the women, who were still

under the influence of liquor, began to accuse each other of killing him, and the officer brought Officer Dittner to the scene. The voices put them both under arrest and sent them to the station house, where they will be held until a full investigation can be made.

POSTPONED BY THE FLOOD. Knights of St. George at Johnstown to be Organized to-morrow.

The Knights of St. George at Johnstown to be Organized to-morrow. The ceremony of this city will leave in a special train to-morrow for Johnstown to participate in the exercises at the installation of Division No. 4 of the latter organization. They will be accompanied by the Great Western Band. This will probably be the first parade to be held in Johnstown since the memorable flood of May 31.

The new division had completed all their arrangements for their installation on June 2 or the Sunday after the flood. The ceremony necessarily had to be postponed. A number of those who had intended to join the organization were drowned.

THE MECHANIC'S GRATITUDE. Rev. R. M. Farrand Will Preach a Sermon to them To-morrow.

Southside Council, Jr. O. U. A. M., will attend divine services at the Southside Presbyterian Church to-morrow morning. Rev. R. M. Farrand, the pastor, will preach a sermon especially prepared for the occasion. A member of Southside Council died a short time ago, and there was trouble at the funeral caused by the fact that the funeral was conducted by the minister who was called to conduct the services refusing to do so because the American flag and regalia of the order lay on the deceased's casket. In the emergency Rev. Farrand was called, and he won the esteem of the members to such an extent that they were anxious to hear him again.

BREACHED BY A TRAIN. The Body of Patrick McLaughlin Found Along the Railroad.

As a freight train was passing Homewood, on the Pittsburgh and Lake Erie Railroad yesterday afternoon, the engineer noticed the body of a man lying at the side of the tracks. The train was stopped and the body picked up. The remains were taken to Reaver street, where the man's clothes identified him as Patrick McLaughlin, but nothing further was known about him last night.

HAVE TOO FAR TO WALK. Lower St. Clair Township Citizens Want a New Voting District.

Dr. R. H. O'Connor, Adam Henniger and County Engineer Davis, commissioners appointed by Judge Magee to determine upon the division of Lower St. Clair township into an additional voting precinct, will meet at the office of Squire Conrad next Wednesday. It is claimed that a new voting district is a great necessity, as some of the voters are now compelled to walk more than a mile to reach the polls.

FOUND DEAD IN BED. Patrick McQuillon was found dead in bed yesterday morning in the boarding house of Mrs. Welch, at Britton street. For some years he had suffered heart disease and the coroner decided that an inquest was not necessary.

AN EXPENSIVE COLUMN. A granite column which cost \$1,000 was taken to McKeesport yesterday, and will be used in the \$60,000 building of the Bank of McKeesport, which is in course of erection.

DR. B. M. HANNA, Eye, ear, nose and throat-diseases exclusively, Office, 715 Penn street, Pittsburg, Pa.

TOM PACKER TALKS.

He Absolutely Denies That He Practiced Malfeasance in Office.

CONSTABLES ARRAIGNED TO-DAY.

Porter Waived a Hearing, But Had no Fight With His Bondsman.

PORTER SECURES A NEW YORK WITNESS

Alderman Porter waived a hearing before Squire Hyndman, yesterday, for a court trial. The hearing in the case of Thomas Packer, constable of the Fifteenth ward, wife Shepard, deputy constable of the same ward, and ex-Constable Daley will take place to-day at 3 o'clock before Alderman Hyndman, of East Liberty. Mr. Packer was interviewed at Alderman Porter's office last night by a DISPATCH reporter. He said:

"I never made an information at Alderman Porter's office, except one disorderly conduct case. I was not connected with the detective agency which had its headquarters at our office. Any information made by the detectives of the Porter agency it is possible that I may have served the warrants, and arrested the guilty parties. This part of the business came directly within my province because I was constable for Alderman Porter. When the warrants were handed over to me, it is possible that I may have given them to one of the deputy constables, and in that way we have all got mixed up in the conspiracy case."

"I am in total darkness as to the details of the indictment against me. The only statement on the writ was contradictory. It is peculiar for the plaintiff to make an information against me, and have me arrested. There is not a thread of evidence which can in any way connect me with the agency, or prove my obligation to keep what is going on on the other side of our nearest neighbor. While we may believe that the man in the moon, and the woman, too, for that matter, have been preserved in ice from a time to which even the memory of prehistoric man runseth not contrary, yet it would be a comfort to know, you know, something of their history, political and theological opinions, views of government, etc. It is discouraging to feel that we must wait until the mortality has passed on immortally before we can hope to be enlightened much further than at present."

"We are the inhabitants of this planet in our day and generation animated with the same aspirations, hopes and fears that move those of the earth? While we may feel that somehow or other our ignorance in this respect is all we should mind to be contented with, yet we would like to know something about our coeval neighbors. Dr. Goff did not hold out any hope that people who cannot get to the North Pole will ever succeed in visiting the moon."

DECEASED OR BELIEVED? I certainly will plead not guilty, and propose to substantiate my plea. "My connections with the office has extended over a period of three years. During this time not a penny beyond my legal costs did I ask extort from the citizens who have been in the office since my election will be on hand to-day to corroborate my testimony. They allege that there has been malfeasance in office. How they are going to prove the allegations of the citizens is their responsibility, and I sought a different bondsman for a court trial. It is reported that Mr. Bauermeister was interviewed yesterday, and made a public statement reflecting on me. The interview is false, and I am willing to bet \$50 to \$5 on my assertion."

"My office is a police headquarters. As such I never look my office door open to any of the drawers. My books and papers have always been open to the police; and if I had been illegally conducting my business, surely someone would have found me out in my own office. I am willing to bet \$50 to \$5 on my assertion."

"I am willing to bet \$50 to \$5 on my assertion. My office is a police headquarters. As such I never look my office door open to any of the drawers. OUR NEXT DOOR NEIGHBOR.

Chancellor Goff Tells What He Knows of the Moon and Star Services—Further Acquaintance is Barred.

Chancellor Goff, of the Western University, last night delivered an instructive lecture in the Smithfield Street M. E. Church, telling what he knew about the moon. He illustrated his talk by means of drawings representing the relative position of the sun, earth, moon and stars at various times. He explained the moon's practical uses to sailors and explained in a familiar way how astronomers obtain knowledge of fair Luna's size, composition, etc., making his hearers wish they could see the three-sevenths of her person she persistently hides from us and has hidden since the day she, in bibliographical parlance, was set to rule the night. Dr. Goff sets even a higher value on the moon than did the Irishman who prized her because she gave light at night, when it was needed.

At the close of the lecture Rev. Locke tried to induce the audience to ask the lecturer questions, but as he could not succeed he asked them himself and drew from him the admissions that he did not keep in his life time to know much not actually discovered. He also intimated that he wasn't crying like a child for the moon, as he recognized the futility of such sorrow. Mr. Locke then asked Dr. Goff to explain the use of the tides, and he replied that in addition to being of use to sailors to enable them to get over shoal water, the agitation of the ocean thereby served to stir up the bottom and keep the earth healthy. In addition to being a nice thing to have around and a comfort and an inspiration to lovers, the moon serves as a sort of balance of them in the sky, which we do not see of the industrial world to which we expect to put the sun some day, when we harness him to do the work that coal, electricity and steam do now for us, yet we should mind to be contented with, yet we would like to know something about our coeval neighbors. Dr. Goff did not hold out any hope that people who cannot get to the North Pole will ever succeed in visiting the moon."

Locke tried to induce the audience to ask the lecturer questions, but as he could not succeed he asked them himself and drew from him the admissions that he did not keep in his life time to know much not actually discovered. He also intimated that he wasn't crying like a child for the moon, as he recognized the futility of such sorrow. Mr. Locke then asked Dr. Goff to explain the use of the tides, and he replied that in addition to being of use to sailors to enable them to get over shoal water, the agitation of the ocean thereby served to stir up the bottom and keep the earth healthy. In addition to being a nice thing to have around and a comfort and an inspiration to lovers, the moon serves as a sort of balance of them in the sky, which we do not see of the industrial world to which we expect to put the sun some day, when we harness him to do the work that coal, electricity and steam do now for us, yet we should mind to be contented with, yet we would like to know something about our coeval neighbors. Dr. Goff did not hold out any hope that people who cannot get to the North Pole will ever succeed in visiting the moon."

At the close of the lecture Rev. Locke tried to induce the audience to ask the lecturer questions, but as he could not succeed he asked them himself and drew from him the admissions that he did not keep in his life time to know much not actually discovered. He also intimated that he wasn't crying like a child for the moon, as he recognized the futility of such sorrow. Mr. Locke then asked Dr. Goff to explain the use of the tides, and he replied that in addition to being of use to sailors to enable them to get over shoal water, the agitation of the ocean thereby served to stir up the bottom and keep the earth healthy.
