

IN VERY BAD ODOR, A Black Eye for Pinkerton Detectives, Turn Which Way They Will.

MR. SCOTT'S LITTLE BILL Would Prevent Their Travel on Any Railroad or Boat Line.

CONGRESS SORE ON THE SYSTEM, And Fully Prepared to Pass a Bill That Would Annihilate It.

A NEW MOVE TO AID HOMESTEADERS

WASHINGTON, July 14.—There is every probability that the present troubles at Homestead, however that they may result...

A Heavy Fine and Imprisonment.

It provides that any owner, president, manager, officer or employee of any company or corporation convicted of violating the provisions of the act shall be fined not less than \$5,000 and shall be imprisoned for one year.

The Officers and Employees of every railway line over which they traveled to their destination would have been liable to heavy fines and imprisonment.

Mr. Scott takes the ground that the only persons who should be held responsible are those who are directly engaged in the investigation of the trouble at Homestead.

THE SHIP NOT GIVEN UP.

An Eloquent Speech Keeps the House From Surrendering—Helm in Once More Turned Down by His Friends—The Gallagher Resolution.

WASHINGTON, July 14.—The smoke of yesterday's battle having been dissipated by the night breeze, the House met today somewhat refreshed and ready to dispose of the matter which stands between it and an early adjournment.

Mr. Herbert of Alabama, presented a disagreeing conference report on the naval appropriation bill, and it was agreed to.

A COALING STATION SECURED

At a South American Island through the purchase of a small island.

WASHINGTON, July 14.—A matter of international importance is the rumored securing of one of the Galapagos Islands by the United States as a coaling station.

THE WOMEN AT WORK.

Mrs. Charlotte Smith Keeps Up Her Agitation for the Homesteaders' Wives and Families—A New Step Taken for Their Aid.

WASHINGTON, July 14.—The news which the DISPATCH yesterday said to the interest of the Homestead affair among the women of the country had something more than the mere word of Mrs. Charlotte Smith behind it.

Mrs. Charlotte Smith, President of the so-called Women's National Industrial League, is a well-known figure about the capital. Her task, that of attempting to meliorate the condition of workers, is a self-appointed one.

Smith does accomplish a great deal. That fact is evidenced by the increase of wages she has secured for scrub women in the departments and for other women engaged in the lowly classes of labor.

SMITH LOBBYING HARD.

To-day Mrs. Charlotte Smith was bustling about the lobby of the House, buttoning her dress and adjusting her hat.

It is unlikely anything definite will be done at to-morrow's meeting. It is difficult to see what can be done.

Representative W. L. Wilson, of West Virginia, one of the superior Democrats, cannot see the possibility of enacting national legislation that will prevent struggles between labor and capital.

The Proposed Arbitration Law.

"I cannot see how Congress can do anything to prevent conflicts between capital and labor," said Mr. Wilson.

ENTERTAINING DEBATES.

The Senate Considering the Purchase of a Government Printing Office Site—Bills Mahone's Property and Cameron's Scheme to Have It Bought at a Fancy Price.

WASHINGTON, July 14.—[Special.]—The debates in the United States Senate during the day have been highly entertaining.

The facts leading up to the discussion are these: The present Government Printing Office is a dilapidated, dangerous, disease-breeding structure, which is apt to fall down at any time beneath the weight of a great press.

A Quarter of a Million for a Site.

In the last Congress a sum of money something like \$250,000 was set apart for the purchase of a site for the new building, and the Committee on Printing were authorized to investigate the matter of a site and report thereon.

No definite action has ever been taken looking for the purchase of a site, for the reason that the real estate jobbers of the District of Columbia began such a fight against themselves that it was impossible to choose between them without bloodshed.

At the last session of the Fifty-first Congress Senator Cameron, of Pennsylvania, who is a heavy dealer in Washington real estate, introduced a resolution making the matter of the selection of a site out of the hands of the Committee on Printing and instructing them to choose the Mahone property.

The Cameron-Mahone combination worked their scheme in this way: During the absence of Senator Stanford in Europe, Senator Quay was the Chairman of the Committee on Public Buildings and Grounds, and the leader of the minority on the committee is Senator Vest.

STEEL DISCARDED FOR GOOD.

PHILADELPHIA, July 14.—After 15 years experimenting the Pennsylvania Railroad officials have decided to discontinue the use of steel ties.

WASHINGTON, July 14.—The eruption of Mount Etna is rapidly increasing in violence. Immense streams of lava are pouring down the mountain side, and it appears certain that several villages and a number of dwellings will be destroyed.

MORE LIBERAL GAINS, Which, Though Not Up to Expectations, Make Mr. Gladstone Safe.

BLAKE, THE CANADIAN, ELECTED.

A Rumor That Liberals Will Postpone the Home Rule Issue to Push a Big New Electoral Reform.

LONDON, July 14.—To-day's results have not quite realized Liberal expectations, but they are considered satisfactory, as confirming the steady flow of gains.

A feature of to-day's contests was the fact that for the first time during the present election, more opposition seats were at stake than Unionist seats.

A New Recruit for Burns' Faction. Mr. Burkinra, of Ayr borough, who was elected to-day on the Gladstonian ticket, is a pronounced Liberalist.

RUSSIAN DOCTORS MOBBED.

Ignorant Peasantry Imagines That Cholera Patients Are Being Buried Alive—Many Killed When They Resist Troops—Ravages of the Disease in Astrakhan.

ST. PETERSBURG, July 14.—Owing to a report that the doctors were causing cholera patients to be buried alive, the lower classes of the city of Saratoff arose in revolt against the authorities and the doctors on the 10th inst.

The rioters threatened to take full possession of the city, and would undoubtedly have done so had it not been for the opportune arrival of the troops, who had been summoned.

INCREASE THE BOND.

Officers of the American Window Glass Association Asked to PUT UP A MUCH LARGER AMOUNT For the Honest and Faithful Performance of Their Duty.

THE DELEGATES TO TAKE AN OUTING

After the usual preliminary exercises had been completed at the convention of window glass workers in Southside Turner Hall yesterday morning President Eberhart announced to the many delegates that it was necessary for all resolutions touching on the business of the association to be handed in before the close of the day session.

Immediately after the President had taken his seat the resolutions began pouring in and there were so many of them that a few could be noted.

The first resolution of any importance was one asking that window glass factories be limited to nine months' work instead of ten months, which is now the rule.

Many favored this measure, but after a close and exciting vote it was defeated. Another resolution of equal importance was presented immediately. It was to the effect that manufacturers should be obliged to engage their workmen 30 days before the end of the year's fire. This was also lost.

After a vote had been taken upon this measure the noon hour had arrived and an adjournment was ordered.

At 2 o'clock delegates reassembled and a resolution was submitted that the term of the President and Secretary should not extend for more than one year at a time. This was thoroughly debated, but when balloted upon was defeated.

Resolutions Against Pinkertons. The next resolution on the programme was carried. It was to the effect that the President and council of the association be authorized to petition the proper gubernatorial officers to take steps to prevent the hiring of Pinkertons or armed detectives by any firm or company, the same to be utilized in a fight with workmen.

Probably the most important resolution of the day, but which was not acted upon, was the one which asked that the wages of gatherers be advanced to 70 per cent for 40 per cent of the workmen, and to 40 per cent for 50 per cent of the workmen, and to 50 per cent for 60 per cent of the workmen.

Of all the above resolutions none were of any more prominence than that which requested the re-establishment of the International Glassworkers Union, but it was not expected that any would be taken upon this particular measure before a day or two.

An Invitation to an Inspection. During the meeting communications were received from the Chambers Glass Company and the Kensington Land Company asking the members of the association to inspect the work of the company.

During the afternoon adjournment the Homestead matter was taken up. The resolutions which were handed in were examined, accepted and indorsed. They read as follows:

The window glass workers of America, in national convention assembled, would most earnestly request that the necessary legal steps be taken forthwith to return to Mr. Andrew Carnegie all the monies or securities which have been received from him for the erection of a public library.

In common with the majority of the people who are wage earners and fully appreciate the circumstances under which Mr. Carnegie has accumulated his vast wealth, we deem it our duty to request that the necessary steps be taken to secure the return of the monies or securities which have been received from him for the erection of a public library.

As an employer he has gradually and surely subordinated and controlled the iron and steel industries under his control as to crush the individual manhood and power of employees and subject to his arbitrary will the lives and property of his workers.

HE SAWS BAW WHEAT.

The Founder of the Edenic School Explains the Benefit of His System.

NEW YORK, July 14.—A few days ago a tall, clerical looking man, who gave the name of J. B. Burford, of Gatos, Cal., appeared at Barker's, W. Va., as an expounder of a new school of health which he calls the Edenic School.

Matters were unusually quiet at the headquarters of the Amalgamated Association yesterday. There were no secret meetings nor any conferences; the only thing to relieve the monotony of the day was the announcement that one more iron firm had signed the new scale and the official paper had arrived under the morning.

The new addition to the list of signers was the Home Cotton. The Manufacturing Company. The works of this concern were built in the early part of 1889, and put into operation in July of the same year.

The plant is equipped with four single puddling furnaces, two heating furnaces, two trains of rolls and one hammer. The product is bar, hoop and band iron with an annual capacity of 3,000 net tons. The firm employ 100 men.

With from a half to three-quarters of a pound of wheat per day a man can do a good day's work. There is a great amount of nutriment stored up in raw wheat. While at my home in California I ate but one meal per day, but since I have been traveling I have eaten two meals a day most of the time, and then only when hungry. I never eat at regular intervals.

"How much does it cost a day to live on that sort of food?" "I can get along on 10 cents a day, but that is rather high. I have eaten sometimes only one or two cents' worth of raw wheat, and five cents' worth of rolled oats will last me twenty-four hours while traveling."

"How much raw wheat is necessary daily to keep the system in good working order?" "With from a half to three-quarters of a pound of wheat per day a man can do a good day's work. There is a great amount of nutriment stored up in raw wheat. While at my home in California I ate but one meal per day, but since I have been traveling I have eaten two meals a day most of the time, and then only when hungry. THE DAUGHTER OF ELLIS ISLAND.

A Little Syrian Waif Lands Alone on the Borders of the New World.

NEW YORK, July 14.—A pathetic story which has touched the heart of Colonel Weber and his assistants at Ellis Island is that of a little 3-year-old girl who arrived in this country a week ago alone.

The little wanderer's name is Adene Hana. She has never seen her father. Three years ago he came to the United States. He wanted to make a home for his wife and child. The husband when last heard from was at New Orleans. For almost three years his wife waited for letters from him, but they never came.

The husband when last heard from was at New Orleans. For almost three years his wife waited for letters from him, but they never came. The poor woman sold her little furniture and decided to follow her husband to the United States and try to find him.

Adene Hana embarked on the steamship Cambria with her little girl. Directly on the voyage her mother, Mrs. Hana, fell ill, growing weaker and weaker until the third day after sailing, when she died. She was buried at sea.

Little Adene did not know and could not understand what had become of her mother. The passengers told her that she had gone to Heaven.

Ever since her arrival at Ellis Island little Adene has been in the hands of the body from Colonel Weber down, and already she has come to be known as "the daughter of Ellis Island." Learning that no one was likely to claim Adene, Miss Lendall, a Swedish missionary, applied to Colonel Weber yesterday afternoon and was given permission to take care of her.
