

While We Live, Why Not Live Well THIS IS MY MOTTO

Youth keeps the world a-moving.
Debts keep me moving.
I have been able to meet them all so far.
And if business keeps up like it is, I will come out ahead.
I am not worrying much.
LIFE IS SHORT AT BEST.

Fall and Winter Goods

Coming in and HAVE TO BE PAID FOR and Paid for Quick to get a big DISCOUNT.

Help Me Make That Discount

My conscience is in good shape and I won't rob you.

I Sell

Clothing, Shoes, Hats, Caps
Shirts, Collars, Cuffs, Underwear, Jewelry, Trunks and Dress Suit Cases.

Make Clothes to Order

Make them to Fit and Reasonable Prices

Don't go somewhere else to be cheated. SEE US. My boys, Earl and Burton, both with me ready to do business.

HORTICULTURAL BUILDING, PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

ONE of the most notable buildings at the Panama-Pacific International Exposition at San Francisco in 1915 will be the great Palace of Horticulture, constructed of glass, covering over five acres, or two city squares in extent, and surmounted by a dome 150 feet high. The Palace of Horticulture will be set in a great tropical garden near the main entrance to the exposition grounds. It will be 672 feet long and its greatest width will be 320 feet. An impressive nave eighty feet high will run the length of the building and paralleling the central nave on either side will be two side aisles fifty feet in height. At the main entrance to the building a huge arch will be adorned with classic bas-reliefs suggestive of the purpose of the structure. The entrance and interior of the Palace of Horticulture will be decorated with trellises upon which flowering vines will be trained. When the exposition opens the Horticultural Palace will appear as if set in the heart of a marvelous garden. Although wood will be used in connection with glass the Palace of Horticulture will be in every sense a glass palace; it will be the largest glass structure ever built. During the night illuminations at the exposition the vast surface of the building will present unusual and beautiful reflections.

The KITCHEN CABINET

WE SOW the globe, we reap the corn.
We build the house where we may rest;
And then, at moments, suddenly,
We look up to the great wide sky,
Inquiring wherefore we were born—
For earnest or for jest?
—E. B. Browning.

DAINTY DISH FROM LITTLE BITS.

When a large amount of bread has been sliced, do not allow it to dry out, but pack in a jar and cover with a cloth wrung quite dry out of hot water, then place a plate over them and the bread will keep fresh. Sandwiches may be made and served at luncheon or supper and are always a welcome addition to the meal.

If you have a bit of boiled frosting left, add a few nuts and chopped raisins and drop on wafers. Bake in a hot oven until brown. These are nice with a salad.

Fondant left from French candies will keep indefinitely if kept in a covered dish, and may be melted over water and used for cake icings.

A few tablespoonfuls of preserves may be used as a garnish for fruit salad, like pear or apple. Or it may be used as a filling for tarts, having more than one kind to use up odd bits.

A custard or chocolate ice cream may be used as a sauce for pudding if used within a short time.

Dainty pies may be made from left-over pie crust in the form of turnovers, of which children are very fond, or baked in gem pans and made like a grown-up pie.

Take your convalescing friend a baked apple prepared thus: Wash and wipe the apple but do not peel, scoop out the core with an apple corer, beginning at the blossom end but do not make a hole way through for the small well is to hold a bit of butter, a tablespoonful of sugar and a grating of nutmeg or a bit of lemon peel. Surround with water if the apples are not juicy, and bake until thoroughly tender. Apples that do not keep their shape during baking are not so attractive baked in this manner.

Left-over icing or fondant, when making candy, the scrapings of the bowls, can be used to stuff dates.

Nellie Maxwell.

Advancement in Japan.
The Japanese are making great strides in the woolen industry, and by importing the latest modern machinery, are striving to manufacture all classes of woolen goods that find a market in Japan. This they will probably do in a few years, with the exception of goods intended for men's outside wear, but at present the mills are making shirtings, both plain and fancy, and ladies' dress goods of various kinds.

Holland's Flag.
Holland's flag is also the emblem of liberty; but nobody knows how during the long centuries the orange became changed to red.

Economy.
"Tommy, did you wash your hands this morning?" "I washed one of them, mother. The other didn't need it."—Life.

The Line.
A girl makes this distinction between white lies and fibs: She tells fibs to her chum and white lies to her beau.

POULTRY

CONSTRUCTION OF TRAP NEST

Without Use of Device Results From Individuals of Any Flock Must Be Uncertain.

(By J. L. JONES, Mechanical Engineer, Oklahoma Experiment Station.)

It is not necessary to dwell on the advantages of using trap nests. The primary object is to develop a heavy laying strain. It has been found by the use of trap nests that the number of eggs laid per hen in an average flock varies from 40 to 245. Without using trap nests, the results from such a flock would be uncertain and probably unsatisfactory. It is the ob-

Bank of Trap Nests.

ject of the poultryman to breed and build up the strain which lays the heaviest, by breeding to the heavy producers.

For fanciers, the trap nest is indispensable on account of the fact that in the ordinary pen there are from six to twelve females to one male. If trap nests are used, and there are as many as there are females in the pen, it is possible to distinguish each hen's eggs, while if the trap nests are not used, this is impossible.

The use of trap nests goes far to prevent the hens forming the habit of egg-eating. They are likely to form this habit if kept in limited quarters. If so kept, they are probably not given the very best food, and probably not enough of it, especially animal food.

The accompanying drawings of a bank of trap nests are almost self-explanatory. The nests are built without any top or bottom. The hen enters through the back of the nest, brushing under the hanging wire, which releases the door. She then passes on to the next compartment toward the front end. To inspect the nest and to remove the hen, ascertain her number, and secure the eggs, the front door is simply unbuttoned and let down. It will be noticed that the two doors are fastened together with a cord, so that when the front door

Sectional View of Nest.

is let down, the trap is automatically set again. The hen will find it difficult to leave through the back door at this time, as the hanging wire permits her to go one way only. These are so simple that in making them in almost any quantity, the material should not cost over 15 cents, at most, per trap nest.

Seek Knowledge.
He who refuses to be taught loses from life its charm and sacredness. Cease to learn and you will in time starve your powers of admiration, of reverence, of obedience, and all the rest of those delicate faculties which in their union are the very strength of character.—George Adam Smith.

Children Cry for Fletcher's

CASTORIA

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of *Chas. H. Fletcher* and has been made under his personal supervision since its infancy. Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-good" are but Experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is Pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. It cures Diarrhoea and Wind Colic. It relieves Teething Troubles, cures Constipation and Flatulency. It assimilates the Food, regulates the Stomach and Bowels, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

Gave Up Hope

"I suffered five years, with awful pains, due to womanly troubles," writes Mrs. M. D. McPherson, from Chadbourne, N. C. "They grew worse, till I would often faint. I could not walk at all, and I had an awful hurting in my side; also a headache and a backache.

I gave up and thought I would die, but my husband urged me to try Cardui, so, I began, and the first bottle helped me. By the time the third bottle was used, I could do all my work. All the people around here said I would die, but Cardui relieved me."

TAKE The CARDUI Woman's Tonic

For more than 50 years, Cardui has been relieving woman's sufferings, and making weak women strong and well. During this time, thousands of women have written, like Mrs. McPherson, to tell of the really surprising results they obtained by the use of this purely vegetable, tonic remedy for women.

Cardui strengthens, builds, restores, and relieves or prevents unnecessary pain and suffering from womanly troubles. If you are a woman, begin taking Cardui, today.
