# Staunton Spectator

VOL. 81. STAUNTON, VA., FRIDAY, MAY 9, 1902. NO. 19.

Our readers will find correct Schedules of the three great railroads of the State regularly published in this paper—the C. & O., the N. & W. and the Southern.

## Weinberg Clothing Co's

### SPRING & SUMMER CLOTHING

FOR Men, Boys AND Children!

One of the widest varieties of the most approved styles ever shown in Staunton!

Garments of Quality and Fashion, designed by the leading tailors of Baltimore and New York City.

Garments that in shapeliness, fit and finish, are the most convincing arguments ever employed against the folly of having Clothing made to order and paying 50 per cent more than is necessary for absolutely correct garments.

All the nobby smart styles are here. Correct in every detail, dressy, and above all—most durable. The plain and mixed plaid Norfolk, Vales, 2-Button Double Breasted, 3-Button Sacks, and endless variety of Serges and Cassimers in all shapes and colors. In every instance the fabrics are of the best, the tailoring positively faultless.

### The Nobbiest Suits for Boys,

Mothers have ever had the opportunity to select, are right here. An air of refinement and style is part of every garment from the serviceable school suit to the nattiest garment for dress.

OUR HAT and FURNISHING DEPARTMENT is complete in every detail. A call greatly appreciated.

## Weinberg Clothing Co.,

Staunton's Reliable Clothiers, Hatters, Tailors, Furnishers.

No. 5 South Augusta Street,  
Next to Augusta National Bank Staunton, Va.

### NEW DRUG WORTH \$7,000 A POUND

#### Most Powerful Astringent Known to Medical Science.

One of the newest, most important and most expensive drugs on earth is adrenalin. Those who are not physicians will be first interested in learning that adrenalin costs \$1 a grain—that is, \$7,000 a pound.

Now the gold that is coined into beautiful yellow eagles is valued only at about \$215 a pound. So adrenalin is worth at least 33 times its weight in double eagles. A solution of adrenalin, one part to a thousand of the solvent, sells for \$1 a fluid ounce. A fluid ounce is two tablespoonfuls; so, if you do not really need adrenalin you can buy with the money it costs the best wine that ever graced the table of a Lucullus.

So much for the sordid value in money of this new and dear drug. Much more important is the claim made for it that its properties render it valuable to humanity beyond all price. Indeed, it is confidently asserted that this drug is an equal boon to mankind with either opium or quinine. The discoverer of adrenalin declares that by its use minor surgical operations can be performed without the loss by the patient of a drop of blood.

Adrenalin's discoverer is a Japanese by birth, an American by adoption and marriage, Dr. Jokichi Takamine. Dr. Takamine claims that adrenalin is the most powerful astringent, hemostatic and heart tonic known. If you do not know what an astringent is, bite an unripe pomegranate. Its astringent effect will pucker up your mouth.

Just so adrenalin puckers up the walls of the smaller blood vessels so that the blood cannot flow from them even if their ends are severed. That is what a "hemostatic" is, another of the wise doctors' big Latin words.

In surgical cases where chloroform must be used it is of the greatest possible value to know that adrenalin can be injected into a vein and prevent such heart failure as an overdose of chloroform often causes. This action of adrenalin, it is claimed, has been proved by many experiments.

There is a peculiar disease named after the man who first described it, "Addison's disease." It is accompanied by and ascribed to changes in the suprarenal capsule, and is characterized by the patient's sudden and fast-growing weakness. Besides, his body becomes mottled with spots which range in color from light yellow to slate blue-black. The strange thing is that adrenalin has been found most useful in the treatment of the obscure Addison's disease. And even the learned doctors don't know why.

#### The Average Man's Ideal.

A woman who says she has had experience, having had two husbands and three sons, gives the following opinions of man and his little preferences: "A man of medocrity—and that means most husbands, or, at least, every other woman's husband—has his ideal of a wife.

"The kind he likes dresses handsomely and becomingly on a very small allowance. She must never go into debt for anything, but must always pay ready money, whether she can manage to get it from him or not.

"Her jewels must on no account be eclipsed by those of any other women of her set, but when she buys them, and the bill comes in, her husband is furious about the outlay.

"He sulks for a week, but then he would have sulked quite as long if, at the last dinner party, she had shone a secondary star to any lady of their acquaintance.

"A man loves his wife to be gentle and sympathetic to himself. If she is too much so to her boys, and they take advantage of it and get into debt and go to her to help them out, then he says: 'Bother sympathy.'

"If she is too good to the poor, and gives them of the household abundance, he is apt to be cynical and censorious—talks of 'encouraging a parcel of idle rogues' or 'indiscriminate charity,' and the harm it does, and of the danger of paperizing the needy.

"None of these considerations, however, prevent him from giving to charities that print his name at the head of the subscription lists, or fork log out a quarter for cases that come under his immediate notice. It is only the wife who is to subordinate her kindly impulses to considerations of political economy.

"A man likes his wife to be cheerful. He does not always concern himself very particularly about the means to make and keep her so, but he disappears utterly of a sad or pensive face.

"He may cut her to the quick with some bitter word before he leaves home in the morning, but he is extremely annoyed if he perceives on returning any signs of the wound he has inflicted.

"A man hits hard, but he never expects to see a bruise. He has forgiven himself for administering the blow; why should not the recipient be equally quick about forgetting it?

"A man likes his wife to be intelligent, quite sufficiently so to be able to conduct the concerns of life, and to appreciate his own intellectual parts and enjoy stray ebullitions of his wit and humor.

"She must applaud these with discrimination, and in that delicate manner which infers no surprise at his possessing brilliancy.

"But he is exasperated should she be too intelligent. His depths are to be violated, but he likes to sound her shallows; and so well does she know this that she often assumes a shallowness when she has it not."—Philadelphia Inquirer.

### EAT HIS WIFE.

#### How a Converted African Chief Made Himself Eligible for Baptism.

A missionary returned from equatorial Africa told this story at a ministers' club the other night to illustrate his remark that the bringing of health into the fold didn't begin to be the biggest job that the missionary had on his hands.

In this man's territory there was a chief who had resisted every appeal to make him a Christian. He was the biggest man in a sort of confederation of savage tribes, and the missionary knew that if the big chief were once converted the effect would be felt by every native within fifty miles. So the missionary kept after him month in and month out, in face of every kind of indifference and rebuff.

At the end of two years the missionary was all but ready to give up, when one day the miracle came to pass—the big chief's heart was touched by the truths of Christianity. The missionary redoubled his efforts, and in two months more the big chief offered himself for baptism.

It looked like a great victory now, until, in examining the new convert, the missionary discovered that according to the chiefly prerogative, he had two wives. The missionary expressed his horror, indignation, and grief to the chief.

He explained to him how the state of polygamy was a barrier to any one who wished to become a Christian. Then he prayed with him and the chief departed, weeping over his unfitness. But a month later he came again, joyous, devout, and, throwing himself at the missionary's feet, asked for baptism.

"My brother," said the missionary, "I cannot baptize you while you are the husband of two wives."

"No two wives; just one wife now," said the chief.

The missionary raised him to his feet. Here was the true penitent.

"My brother," said the missionary, "you make my heart glad. And what did you do with your second wife?"

"Um," answered the chief. "She no good; we want be Kistian; me eat her."—New York Sun.

#### Reveals a Great Secret.

It is often asked how such startling cures, that puzzle the best physicians, are effected by Dr. King's New Discovery for Consumption. Here's the secret. It cuts out the phlegm and germ infected mucus, and lets the life-giving oxygen enrich and vitalize the blood. It heals the inflamed, cough-worn throat and lungs. Hard coughs and stubborn coughs soon yield to Dr. King's New Discovery, the most infallible remedy for all Throat and Lung diseases. Guaranteed bottles 50c and \$1.00. Trial bottles free at B. F. Hughes.

#### Dresses the Summer Girl Should Have

A gown of light summer silk, such as foulard, India or eural, will be needed for church and cool evenings.

A gown of flannel or light-weight serge made up without a lining is among the most sensible and useful to include in one's list of summer dresses. The linen and cotton ducks cannot be excelled for all-round usefulness. If a girl has one or two of these white skirts with a couple of white blouses she can feel perfectly at ease no matter where she may be, nor what the occasion at which she must put in an appearance.

A thin white gown for special occasions is absolutely necessary. Linen, Persian lawn, dimity, organdy, and the like materials from which to make a gown which will be suitable for the many little impromptu affairs which spring up in the summer time.—May Ladies' Home Journal.

#### Stand Like a Stone Wall

Between your children and the tortures of itching and burning eczema, scaldhead or other skin diseases. How? Why, by using Bucklen's Arnica Salve, earth's greatest healer. Quick cure for Ulcers, Fever Sores, Salt Rheum, Cuts, Burns or Braises. Infallible for Piles. 25c at B. F. Hughes, drug store.

#### Meeting a Demand.

The crowded condition of the Virginia Polytechnic Institute shows that a good institution with industrial training meets the needs of the times and will be well patronized. Ten years ago the Institute had eighty students. Under President McBryde's guidance it has steadily grown, at no time being able to accommodate all the applicants. In 1898-'99 there were 300 students; in 1899-'00, 343; in 1900-'01, 388; and 470 young men are enrolled in this session, with dozens turned away for lack of room. Over 100 students are doing work to help pay their way.

### CASTORIA

The Kind You Have Always Bought

Bears the Signature of *Chas. H. Fletcher*

### THE ROUND TABLE

We faint would live always, we wish not to die, In the dark, dark grave we shudder to lie; From this bright, heartsome earth we would not depart, Whilst eye meeteth eye and heart throbs to heart.

In the mountains and valleys we hunger to dwell, And roam over the glade, the prairie, and dell, And catch the weird dirge of the winds through the pine, And inhale sweet essence and balsam divine.

The joys of this life we are loth to forego, Since our state in the future is denied us to know; Alas! we would forfeit rich treasures on high— We faint would live always, we wish not to die.

Dark, dark, are the billows of Charon's deep tide, Which litter from thither doth ever divide; Whose passage forever doth break the We faint would live always, we wish not to die.

O death, how bitter, how poignant thy sting; Antheus, mayhap, at the throne we may sing, But ah! through of perdition we start! and we cry— We faint would live always, we wish not to die.

O sweet are the greetings of friends here below, And dearer the favors they kindly bestow, Though bliss be assured us in the great by and by, We faint would live always, we wish not to die.

Though loved ones await us on that Where rest is eternal and parting no more; As doits spurn the substance and on shadow rely, We faint would live always, we wish not to die.

Though toll be our portion and cares not a few, And troubles beset us and friends prove untrue; We forget these heartaches with a fear and a sigh— We faint would live always, we wish not to die.

Though prostrate by disease and e'er racked with pain, Though helpless from age and most feeble of brain, Though we dwell in privation and in poverty lie, We yearn to live always, and strive not to die.

O Father, who made us and who rules over all, Who doth all guard us—even notes the sparrow's fall, O guide us and help us weak nature defy, And wish not to live always, and grieve not to die.

John E. Lockridge, M. D. Indianapolis, Apr. 12.

#### What Thin Folks Need

Is a greater power of digesting and assimilating food. For them Dr. King's New Life Pills work wonders. They tone and regulate the digestive organs, gently expel all poisons from the system, enrich the blood, improve appetite, make healthy flesh. Only 25c at B. F. Hughes.

#### The May Scribner.

An air of Spring pervades Scribner's Magazine for May. It contains a beautiful drawing in color by Henry McCarter to illustrate Helme's "May Song"; there is a breezy saltwater narrative by James B. Connolly, who gives his adventures "On a North Sea Smack" (illustrated by M. J. Burns)—another of those inimitable fishing sketches which have already put Mr. Connolly in the first rank of writers of the sea; an exciting "Fight with a Muskallonge," by John R. Kathorn, who in a very brief space gives the reader all the sensations that an expert fisherman gets in landing a gamy fish (illustrated with a spirited picture by A. B. Frost); and there is an "Early May" poem by John Burroughs.

### THE DAIRY

#### FEEDING ALFAFA HAY.

##### How to Construct a Barn and Arrange a Feed Lot That Will Prevent All Waste.

Every time alfalfa hay is handled there is considerable loss from the breaking off of dry leaves. Where it has to be forked over several times before it reaches the manger, little is left but unpalatable stems. I recently saw an alfalfa barn and feed lot constructed with an idea of preventing this waste. The barn was surrounded with feeding racks, the common V-shaped rack made of one-inch boards, just far enough from the manger so that a wagon can be driven between.

The alfalfa hay is put into the barn through these doors and when wanted for stock a wide chute is used leading from the barn door to the rack. By these means the hay is conducted from the barn to the rack without loss. These chutes are removable and can be taken out when the barn is being filled or for any other reason. The work of feeding the stock is also greatly lessened, and it consists simply in throwing the hay into the chute and allowing it to slide down into the rack—Orange Judd Farmer.

#### THE AVERAGE COW.

##### She Consumes Lots of Food and Renders as Little Return Therefor as Possible.

As the average man is not the ideal man, so the average cow is not the ideal cow for dairying. As regards the cow the trouble is that she eats and exists upon a man's farm, doing only half the work she ought to do, and she consumes as much food, or perhaps more, than the first class milkers. She will give about 3,000 pounds of milk annually, while she ought to give as many quarts of better milk, says the Dairy and Creamery. Her structure is generally the reverse of what it should be; her head is too large, and her shoulders wider than her hips; besides she has a tendency to put fat upon her back and not in her milk, and she has ample storage capacity for everything except milk. She is a parasite, which, according to Mr. Gould, "eateth by noonday and wasteth a man's substance by night." In this way she beats all the trusts and rings of which man is kind complaisant. As a cow she is one that uses health and vigor to consume food and renders as little return therefor as possible.

The average cow may be good for other purposes than dairying. It matters not that her blood is a mixture of red and white, which man's proper training and careful feeding may raise her above the average. Keeping account with dairy cows and employing the most judicious and best tried methods of feeding and treatment will improve the milk giving properties of the stock man's herd.

The average cow cannot be blotted out, as a race, on short notice. But much can be done in raising the average and increasing the yield of milk. The average cow and the wooden plow go well together, but even the home dairies require better stock than that.

#### DAIRY AND LIVE STOCK.

How will large brass knobs do for the horns of the cows? "Beware of the bull" is a sign put up that he who reads may run.

Every dairy animal ought to have about two ounces of salt every day.

Do not feed any of the decayed ensilage to the stock; throw it out on the manure pile. Valuable animals have been killed by eating this rotted material.

When you go to buy a cow do you milk her before you close the bargain? If not, try it. By so doing you may learn some things you did not know before that particular cow.

Some horses cannot eat oat straw. I came near losing a good horse once from impaction of the bowels due, without doubt, to feeding oat straw. Be careful to watch the effect of giving such food to your horses.—Farm Journal.

Milk Needs Careful Handling.

I am very careful when milking my cows to have them clean as well as to keep my hands and those of my hired men clean, says M. Dickinson, in American Agriculturist. My stables are always in the best of condition. The milk is run from a hand separator directly into the milk cans. Each skimming is kept separate and hauled to the creamery by itself.

Holds Up a Congressman.

"At the end of the campaign," writes Champ Clark, Missouri's brilliant congressman, "from overwork, nervous tension, loss of sleep and constant speaking I had utterly collapsed. It seemed that all the organs in my body were out of order, but three bottles of Electric Bitters made me all right. It's the best all-around medicine ever sold over a druggist's counter." Overworked, run-down men and weak, sickly women gain splendid health and vitality from Electric Bitters. Try them. Only 50c. Guaranteed by B. F. Hughes.

"Pain in the head and back" is a form of suffering with which so many women are familiar. Often this pain is associated with nervousness, sleeplessness and loss of appetite. The cause of such suffering is generally to be traced to derangement of the womanly function, or a diseased condition of the delicate womanly organs.

In such cases the action of Dr. Pierce's Favorite Prescription is marvelous in the prompt relief of pain and permanent cure of disease. It regulates the periodic function, drives disengorged drains, heals inflammation and ulceration, and cures female weakness. It cures when all other means have been tried in vain. Sick women are invited to consult Dr. Pierce, by letter, free. All correspondence is held as strictly private and sacredly confidential. Address Dr. R. V. Pierce, Buffalo, N. Y.

In a little over thirty years Dr. Pierce, assisted by his staff of nearly a score of physicians, has cured more than half a million women.

"I was a great sufferer for six years and doctored all the time with a number of different physicians, but did not meet with any benefit," writes Mrs. George Souders, of 64 Bond Street, Saginaw (South), Mich. "One day as I was reading a paper I saw your advertisement, and although I had given up all hope of ever getting better, thought I would write to you. When I received your letter, telling me what to do, I commenced to take your Favorite Prescription and follow your advice. I have taken ten bottles in all, also five vials of the Pleasant Pellets. Am now regular after having missed two years and suffered with pain in the head and back. I was so nervous, could not eat or sleep. Now I thank you for my recovery."

Dr. Pierce's Pleasant Pellets cure biliousness.

Small crops, unsalable vegetables, result from want of

# CASTORIA

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of *Chas. H. Fletcher* and has been made under his personal supervision since its infancy. Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-good" are but experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

### What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is Pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. It cures Diarrhoea and Wind Colic. It relieves Teething Troubles, cures Constipation and Flatulency. It assimilates the Food, regulates the Stomach and Bowels, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

### GENUINE CASTORIA ALWAYS

Bears the Signature of *Chas. H. Fletcher*

The Kind You Have Always Bought In Use For Over 30 Years.

THE CENTAUR COMPANY, 37 NASSAU STREET, NEW YORK CITY.

### ARE YOU DEAF? ANY HEAD NOISES?

ALL CASES OF DEAFNESS OR HARD HEARING ARE NOW CURABLE

by our new invention. Only those born deaf are incurable. HEAD NOISES CEASE IMMEDIATELY.

F. A. WERMAN, OF BALTIMORE, SAYS:

Gentlemen:—Being entirely cured of deafness, thanks to your treatment, I will now give you a full history of my case, to be used at your discretion.

About five years ago my right ear began to ring, and this kept on getting worse, until I lost my hearing in this ear entirely.

I underwent a treatment for catarrh, for three months, without any success, consulted a number of physicians, among others, the most eminent specialist of this city, who told me that only an operation could help me, and even that only temporarily, that the head noises would then cease, but the hearing in the affected ear would be lost forever.

I then saw your advertisement accidentally in a New York paper, and ordered your treatment. After I had used it only a few days according to your directions, the noises ceased, and to-day, after five weeks, my hearing in the diseased ear has been entirely restored. I thank you heartily and beg to remain

Very truly yours,  
F. A. WERMAN, 730 S. Broadway, Baltimore, Md.

Our treatment does not interfere with your usual occupation. Examination and advice free. YOU CAN CURE YOURSELF AT HOME at a nominal cost. INTERNATIONAL AURAL CLINIC, 596 LA SALLE AVE., CHICAGO, ILL.

## J. J. MURPHY,
