

Welcome inspection of our Subscription List, by Advertisers, and assure them that they will find it the largest of any paper published in this City.

Staunton Spectator

VOL. 81. STAUNTON, VA., FRIDAY, AUGUST 1, 1902. O. 31.

Our readers will find correct Schedules of the three great railroads of the State regularly published in this paper—the O. & O., the N. & W. and the Southern.

Weinberg Clothing Co.'s

SEASONABLE CLOTHING!

The values we give and the great money saving opportunities that prevail at this store, have established in the minds of a large majority of the buying public this fact—When a comparison of our goods is made quality for quality, with the same elsewhere, our prices are absolutely and unconditionally the lowest; our styles are unapproachable, the fit and workmanship without comparison, and then you get all this without extra cost. Our immense stocks in

Men's, Boys' and Children's

are thoroughly complete to the most minute detail. Never before have we shown such a full and comprehensive assortment. Our Children and Boys department is simply crowded with what we call TRUE VALUES. The 2-Button Double Breasted Jacket Suit, the Yoke, Norfolk and the Reversible Belt Suit, in all colors. Also an immense assortment of COATS and PANTS for exclusive Summer wear.

If you want to be fitted right, suited right, and treated right, come direct to WEINBERG'S, and you always buy with our guarantee. Anything not satisfactory your money cheerfully refunded.

CASTORIA

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of and has been made under his personal supervision since its infancy. Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-good" are but Experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is Pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. It cures Diarrhea and Wind Colic. It relieves Teething Troubles, cures Constipation and Flatulency. It assimilates the Food, regulates the Stomach and Bowels, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

GENUINE CASTORIA ALWAYS

Bears the Signature of
Charles H. Fletcher
The Kind You Have Always Bought
In Use For Over 30 Years.

PUTNAM'S MUSIC STORE.

Our motto has always been "Not how much can we get! But how low can we sell? And still make a reasonable profit." We have strictly adhered to this policy, and consider it the secret of our success. We have sold hundreds of instruments in Staunton and vicinity and we do not know of one dissatisfied customer. We guarantee satisfaction to every purchaser, and always are ready to correct any mistake that might possibly be made.

We handle six of the best and most popular makes of pianos in the United States. We buy them for spot cash under special contract with the manufacturers. This, combined with our own manufacturing business, enables us to sell BOTH pianos and organs at much lower prices than any of our retail competitors can possibly offer.

The sales of Pianos and Organs is almost entirely a matter of confidence in the person or firm with whom you are dealing. You cannot possibly know about the value of these instruments unless you have had actual experience in the business, and you must rely on the judgment and word of some reliable dealer for the tone, quality, value and durability of the instrument you purchase. We can refer you to hundreds of purchasers in this part of the country, who are now using our instruments, and will ask you to satisfy yourselves fully concerning our reliability and responsibility, then call, examine our instruments and get our prices.

We guarantee to satisfy you and save you money.

W. W. PUTNAM & CO., No 103 West Main Street, Staunton, Va.

'PICKETT'S CHARGE AT GETTYSBURG.

The Gallant Officer's Widow Describes the Scene.

As the days lengthen the anniversary of Gettysburg, July 1st, 2d and 3d, draws near. Soon survivors and military experts will be fighting the battles over again.

To-day the forest of monuments, the most beautiful in the world, covers the miles of battlefield, overlooking a vast panorama of landscape, where American history began a new chapter for free Government.

Mrs. La Salle Corbell Pickett, widow of General Pickett, the hero of Pickett's charge at Gettysburg, when requested to make a brief statement of her husband's heroism in connection with that memorable charge, said:

"I have written a book about General Pickett and his men, and I do not think I can improve on what I said in the chapter on 'The Third Day at Gettysburg.'"

The final charge was described by Mrs. Pickett thus:

"Dauntlessly Pickett's men pressed forward, the grandest column of heroes that ever made a battlefield glorious. They reached the post and rail fence, upon the other side of which, and parallel to it, an ordinary dirt road ran straight through the field across which they were advancing.

"The fence was but a momentary obstruction. It was but the work of a few seconds to climb over it into the road, while a hundred blazing cannon poured death-dealing missiles into their devoted ranks.

"Now and here was given to the world the grandest exhibition of discipline and endurance, of coolness and courage under a withering fire, ever recorded in military history—a scene which has made the story of Pickett's charge the glory of American arms. There in the road with the deafening explosion of numbered shells filling the air, their ranks plowed through and through again and again by the fiery hail which the batteries from the heights beyond were pouring into them, amid all this terrific roar and the not less disconcerting cries of the wounded and dying, they heard the command of their company officers: 'Halt, men! Form line! Fall in! Right dress!'"

"Now they broke forward into a double-quick, while canister and grape whirled and whizzed through the air. On, they rushed toward the stone wall where the Federal batteries were pouring forth their deadly missiles. A hundred yards away their flanking force came down on a run, halted suddenly and fired into their line a deadly storm of musketry. Under this cross fire they reeled and staggered between falling comrades, and the right came pressing down upon the centre making the line at the point twenty to thirty deep. A few, unable to resist temptation, without orders, faced the enemy on their right, though the latter were sixty to one.

"The fighting was terrific. Muskets seemed to cross. Men fired to the right and to the front. The fighting was hand-to-hand. The firing was into the enemy's faces.

"The Federals in front fell behind their guns to let them belch forth their grape and canister into the oncoming ranks, piling up the dead and wounded almost in touch of them. When within a few feet of the stone wall the artillery delivered their last fire from the guns shot to the muzzle.

"Victory was within their grasp. Alas! where were the promised supports? Worn and exhausted by the tension of the bloody fighting of the day before, in which they had suffered terribly, their leaders dead or wounded, they had crumbled away under the deadly hail of the artillery fire.

"Of the 5,000 who had followed where the flash of Pickett's sword lit the way to glorious victory, or not less glorious defeat, 2,500 had gone down to the soldier's triumphant death, to live forever in our hearts and on the fame-crowned pages of their country's history."

GEN. SICKLES ON THE CHARGE.

Of Pickett's famous charge, Gen. Sickles writes for the Republic:

"What is commonly called 'Pickett's charge,' July 3d, 1863, at Gettysburg, was really an assault made by General Longstreet's command by order of General Lee. The troops engaged consisted of Pickett's Division of Virginia, of Longstreet's Corps and Heth's Division of Hill's Corps, under the command of General Pettigrew. Hill having been wounded on July 1st. Longstreet had no confidence in the success of his assault, and while discussing the plan with General Lee expressed the opinion that 'fifteen thousand men who could make a successful assault over that field had never yet been arrayed in battle.' Nevertheless, the assault was a brilliant feat of arms, seldom, if ever, surpassed on any battlefield. It was witnessed by more than 150,000 combatants belonging to the armies. It was overturned by one of the most terrific cannonades on both sides ever heard on any battlefield. Over 220 guns were in action—Since the battle of Creasy so many cannon had never been engaged at once on any battlefield of the world.

"It was an epoch in the annals of war. No soldier had heard it like before. The cannonade did little harm on either side, notwithstanding the noise it made. It was 'sound and fury, signifying nothing.' The thunder of the conflict was plainly heard forty miles away.

"But the men in the ranks understood clearly the desperate, hopeless character of the movement, and along the lines many of them were heard in subdued voices calling 'good bye' to

Hydrography of the Southern Appalachian Mountain Region.

The importance of the Southern Appalachians as a source of timber and of water supply, both for municipal use and for the development of power, is steadily gaining recognition in the East, as is shown not only by the effort to preserve a large part of it as a National forest reserve, but also by the general interest which this movement has aroused.

For a number of years the United States Geological Survey, through the Division of Hydrography, has been making careful studies of the physical conditions and water resources of this section, and has gathered a mass of information which has lately appeared in its regular reports Nos. 62 and 63 of the series of Water-Supply and Irrigation Papers. The report has been compiled by Mr. H. A. Pressey, who as engineer in charge of the Atlantic coast, has had unusual opportunities for observing the existing conditions in this section.

Among other aspects of the region which are noted in the report, one of the most impressive is the rapid destruction of the standing timber, and its extremely injurious effect. Not only is the soil on the steep hillsides left without protection, and soon washed away by heavy rains, but its productive qualities seem to remain for only a few years after the removal of the trees; thus making continued and successful agriculture impossible. The destruction of the forests also greatly impairs the efficiency of the streams, which lose their steadiness of flow, and hence their value as producers of power.

Owing to the numerous steep slopes in the region, many admirable water powers have been found to exist, which especially in the southern portion, in the neighborhood of the cotton-growing districts, may be made of the utmost value to the South, as a source of cheap power. The report is illustrated by half-tones made from photographs, which admirably depict the leading characteristics of the country. It may be had upon application to the Director of the United States Geological Survey.

King Edward's Trouble.

Perityphilitis, the malady from which King Edward VII. is said to have been suffering, is an inflammation of the tissues surrounding that curious physiological relic, the vermiform appendix. The idea of the ordinary operation in appendicitis is to remove this little blind pocket before the disease has eaten a hole in it, and infected the peritoneal, or main abdominal cavity. In perityphilitis this infection has occurred, but by some good fortune, instead of going on to a general peritonitis, an extremely serious and grave complication, it has been cut off, or localized, as it is technically called, so as to form an abscess about the exterior of the appendix. It is, of course, a much more serious condition to operate upon than the ordinary perforated appendix, but is far less serious than a case of perforation resulting in general peritonitis. Perityphilitis may be caused by several pathological conditions, one of which is malignant disease, or cancer. Where it is due to cancerous growth it is of the greatest gravity, even after an apparently successful operation, as indeed are all cancerous affections of the intestinal tract.

Of Interest to Public School Graduates.

The U. S. Civil Service Commission will hold examinations, during September and October, in several places in each state to secure young men and women for the government service. There are now 126, 436 positions in the classified civil service, being an increase of 46,730 in six years. There were 7,972 persons appointed between July 1, 1901, and April 15, 1902, being at the rate of 10,070 for the year. There will probably be 11,000 appointments next year. Salaries at appointment vary from \$600 to \$1,200 a year with liberal promotions afterward. All appointments are for life and for most positions only a common school education is required. Politics or religion is not considered. Those desiring to take examinations of this kind can get full information about them free by writing to the Columbian Correspondence College, Washington, D. C., and asking for its Civil Service Catalogue for 1902.

Look Pleasant, Please.

Photographer C. C. Harlan, of Eaton, O., can do so now, though for years he couldn't, because he suffered untold agony from the worst form of indigestion. All physicians and medicines failed to help him until he tried Electric Bitters, which worked such wonders for him that he declares they are a godsend to sufferers from dyspepsia and stomach troubles. Unrivaled for diseases of the stomach, liver and kidneys, they build up and give new life to the whole system. Try them. Only 50c. Guaranteed by B. F. Hughes, Druggist.

Delights to Have Fingers Cut Off.

"We have a patient in our insane department who has a mania for making the physicians amputate his fingers," said Superintendent Emde, of the Cleveland, O., infirmary. "He has had three fingers amputated since he has been in there, the third one only last week, and now the attendant reports that he is binding up another finger that he may in a few months have it cut off."

"When he decides he wants a finger off he binds it up and complains that it hurts him. Even when we keep him from binding it, he concentrates his mind on it and imagines that it hurts him, so that after a while it begins to shrivel up and become useless. It practically becomes dead. He is the happiest man in the world when he gets a finger cut off. His name is Henry Doerner and he is only thirty years old."

Shatters All Records.

Twice in hospital, F. A. Gullidge, Verbena, Ala., paid a vast sum to doctors to cure a severe case of piles, causing 24 tumors. When all failed, Bucklen's Arnica Salve soon cured him. Subdues inflammation, conquers aches, kills pain. Best salve in the world. 25c at Hughes' drug store.

When He Was a Boy.

"Pa, when you was a boy did you always fight somebody of your size?"

"Yes, my son; before I got married I was afraid of nothing."—Chicago Record-Herald

Only 50 Cents

to make your baby strong and well. A fifty cent bottle of Scott's Emulsion will change a sickly baby to a plump, rosy child. Only one cent a day, think of it. It's as nice as cream. Send for a free sample, and try it. SCOTT & BOWNE, Chemists, 409-415 Pearl Street, New York. 50c. and \$1.00; all druggists.

BREAKING THE HEIFER.

Many Dairymen Break This Operation, and in Most Cases Without Reasonable Cause.

We have broken several Jerseys and have cows that apparently never knew how to kick, writes G. C. Lies, in the Ohio Farmer.

In the first place, the heifer should be perfectly tame, should never have known fear of her owner; should be accustomed to going into the stable. We prefer the winter time, as she is accustomed to being in the stable then. However, she should be tame enough to go into it at any time without fear and anxiety regarding the safety of the calf when we are around, while if we came around her for the first time after the calf is several hours old she seems to think we want to injure the calf, and she is frightened; and there are other reasons for being with her at that time.

We never touch a heifer's udder before she is fresh. In nearly every case she will resent it with a kick, and once started to kicking she may keep at it. We often read advice to accustom the heifer to having her udder handled before being fresh. We wonder if the author of such advice has ever tried it. It is contrary to nature for a heifer to allow her udder to be meddled with until the time comes for her to be milked. The first time we touch her udder is when the calf sucks the first time. It is natural for her to want to be milked then. In a few hours we separate the calf and heifer and when we wish to milk her we turn her with the calf and let the calf suck while we milk. We milk her in this way a few times, when we separate them for good, and we seldom have any trouble afterward.

We are always very careful not to hurt her in milking. There is a great difference in the way different people milk. Some squeeze the teats so roughly and pull downward so hard that the cow kicks because she is hurt. Avoid hurting your cow and she will not kick you. No heifer should be allowed to be fresh without having been fed and prepared for the occasion. This is especially so if she is on dry feed. Lined oil meal fed with other grain feed and clover hay will make her in good condition for calving.

A HANDY MILK COOLER.

Very Simple in Construction and Almost Essential to Successful Dairy Operations.

It is essential that milkmen cool their milk before it leaves the farm, and if it be air-cooled it will keep longer and win a better name. A cooler of home manufacture, Fig. 3, is a wooden frame, 6 or 7 feet in height. The separate sides, Fig. 2, may be made of four strips, with as many crosspieces as necessary for stability, as shown in Fig. 1. A slight unevenness of structure will not affect its usefulness if it but stand firm. The funnel, Fig. 4, over which a cheesecloth strainer of many thicknesses is hung, rests in the aperture at the top, as shown at a b c, in Fig. 3. Cleats of wood are nailed on three inner sides, g h i j, of

Natural History.

Some of the caterpillars found in the vicinity of the Darling river, Australia, are over six inches in length.

The leaders of a flock of migrating wild geese become tired sooner than others and are frequently relieved by their fellows.

The gray buzzard is said to be the heaviest bird that flies, the young males, when food is plentiful, weighing nearly forty pounds. The bird is rarely extinct.

The terrapin lives largely upon crabs. He never eats his food, but bolts it. His favorite tidbit is the crab's claw, which he swallows whole with the greatest relish.

The glow worm lays eggs which, it is said, are themselves luminous. However, the young hatched from them are not possessed of those peculiar properties until after the first transformation.

A whistling moth is an Australian rarity. There is a glassy space on the wings crossed with ribs. When the moth wants to whistle, it strikes these ribs with an antennae, which have a knob at the end. The sound is a love call from the male to the female.

Some one who claims to know says that of about 600 varieties of weeds that are common in our fields, sheep are known to eat 515 varieties, while horses, cattle and hogs eat but a few each. Commenting on this statement The American Cultivator says: "If we do not yough for this as being exactly correct, we know that sheep destroy many weeds that our other farm animals do not care for or will not eat unless starved to it, and this is why we claim that from four to six sheep can be kept in a pasture with each cow, and they will eat what the cow leaves, and by the destruction of weeds and the fertilizer they leave in the field, will enable the pasture to furnish better feed for the cows than they would have if the sheep were not there, at least after the sheep have run with them one year."

No Ear for Music.

"Oh, pa, what made you fling that bag of lime on Mr. Citykid last night when he was serenading me so beautiful with his mandolin?"

"Mandy Linn! Was that it? What d'ye 'spose I thought it was?"

"I don't know, pa."

"Blamed if I didn't think 'twas one o' them seventeen-year locusts."

Just Look At Her.

Whence came that brightly step, faultless skin, rich, rosy complexion, smiling face. She looks good, feels good. Here's her secret. She uses Dr. King's New Life Pills. Result—all organs active, digestion good, no headaches, no chance for 'blues.' Try them yourself. Only 25c at B. F. Hughes.

All Were Saved.

"For years I suffered such untold misery from Bronchitis," writes J. H. Johnston, of Broughton, Ga., "that often I was unable to work. Then, when everything else failed, I was wholly cured by Dr. King's New Discovery for Consumption. My wife suffered intensely from asthma, till it cured her, and all our experience goes to show it is the best cough medicine in the world." A trial will convince you it's unrivaled for throat and lung diseases. Guaranteed bottles 50c and \$1. Trial bottles free at B. F. Hughes.

GIRL WOMEN.

The general standard of measurement for womanhood is "grown-up-ness." When a girl is emancipated from school and arrives at the dignity of trailing skirts and elaborate hair dressing she is looked upon as a young woman. But nature knows nothing of such standards, and there is need of womanly care and caution. It is girlish ignorance or neglect at this critical time which often results in long years of after misery.

Mothers who perceive the evidence of functional derangement in young girls should promptly have them begin the use of Dr. Pierce's Favorite Prescription. It establishes regularity, tranquilizes the nerves and tones up the whole system.

"My troubles started during my girlhood," writes Miss Flora J. Greer, of Bay Shore Street, Akron, O., "but did not prove serious until I was 18 years old. I had severe monthly periods with terrible headache, irritation of the spine and pains in my loins. I had severe nervousness, and was unable to carry all the time and constant headache. One doctor would tell me one thing and another would say something altogether different, but they only relieved me. I then wrote you and followed your advice. I took five bottles of Dr. Pierce's Favorite Prescription. Four of 'Golden Medical Discovery' and five vials of 'Felix.' Have not had a single symptom of my old trouble for six months. Can sleep good, work hard, and eat solid and substantial food without distress."

Dr. Pierce's Pleasant Pellets cleanse the bowels and stimulate the sluggish liver.

Dr. T. T. FAUTLEROV, DENTIST.
