**LINDE TO CONTINUE HIS FIGHT AGAINST RAILROAD CO.**

Attorney General Linde evidently does not intend to give up his fight against the railroad companies, wherein he is trying to enjoin them from the importation of intoxicating liquors into the state for illegal purposes. Asked as to his opinion of Judge Amidon's decision he said:

**Linde's Statement**

"I am particularly surprised at Judge Amidon's decision in the liquor injunction cases because the question is in fact a new and novel one, yet I do not intend to abandon the injunction theory until the question has been passed upon the United States supreme court. However, these actions have been of substantial value because I am satisfied now that the railroad companies fully realize that the importation of intoxicating liquor for illegal use must be absolutely discontinued."

**Powerful Weapons Left**

"Notwithstanding the decision of the state of course, has powerful weapons to use in enforcing the law prohibiting the importation of liquor in that every carrier is subject to criminal prosecution and I shall insist on prosecution being instituted against every case where illegal deliveries are made."

**More Costly Now**

"In fact, the only different since the injunction has been dissolved,

is the large cost and expense of a large number of prosecutions, while if the injunctions were kept in force the cost of enforcing the law would be comparatively small by resorting to contempt proceedings.

"I have not yet fully determined made from Judge Amidon's decision or not but it is more than likely that an appeal will be perfected."

**PROSPERITY HAS COMETOSTAY**

J. Ogden Armour, Multimillionaire packer, believes that prosperity has come to stay in the United States. In an interview printed Mr. Armour says our prosperity is not a war prosperity, but that the products of the farm are the basis of it. Mr. Armour said:

"America is rapidly rising to an unprecedented prosperity, a prosperity which would have been inconceivable a year ago and which is enduring. It will be boom-like for, say, three years and should not be affected by a termination of the European war within that time."

**Gives His Reasons**

"The idea that the cessation of European hostilities must affect us adversely is, I believe academic," said Mr. Armour. "In the first place, emigration from the countries no at war will not be prohibited. They will be forced to take this step because the con-

dition means an exhaustion of men, as well as of treasure. Men will be needed over there as much, if not more, than money. There can be no competition between a country of America's great vigor and infinite resources and countries that have spent themselves."

"America was destined to lead the world commercially and financially in fifteen years. The war simply hastened that manifest destiny. For an American to fear the aftermath of the war appears to me baseless."

The president of Armour & Co. then proceeded to give reason for his unshakable optimism.

**Not a War Prosperity**

"Our is not a war prosperity, although to be sure, ammunition orders are accelerating the pace," he said. "It is fundamental in that the products of the farm are the basis of it. We are still largely an agricultural community, and as agricultural prosper, the whole country prospers."

"Look at our crops, and the prices we are getting for them. Both have no parallel in the country's annals. Wheat was late in harvesting, but is now coming abundantly to market. The enormous daily exports show that the corn yield is bountiful. The run of hogs will be large."

**Big Demand for Supplies**

"The demand for these necessities is in proportion to their supply. Europe is buying as she has never bought before, and the swelling bank deposits reflect the heavy European payments as well as the affluence of the farmer."

"Take for example the National City bank of New York," (of which Mr. Armour is director.) "A year ago the gross deposits of that institution were \$245,000,000. Today they are more than \$500,000,000." (The shares of the institution have risen 150 points.)

"Bankers as a rule have been hard put by these startling increases. Rates are low, but the money will all be profitably employed. It is only a question of time; and the employment of so much money will mean just so much more prosperity."

"The south, which only a few months ago was in despair, is now, to speak colloquially, drunk with prosperity. Planters are finding no difficulty in marketing their cotton at good prices. That section of the country is fortunate, too, in enjoying a revival in the lumber trade. Timber in the south has advanced \$2.00 a thousand."

**DEMOCRATS WIN IN KENTUCKY ELECTION**

The election of former Congressman August Stanley of Henderson Democrat, as governor of Kentucky, was conceded in a statement tonight by Edwin P. Morrow of Summerset, Republican gubernatorial candidate in the election of Nov. 2. Mr. Morrow also set at rest wide-spread rumors that the Republicans might contest the election of Mr. Stanley before the legislature.

Until tonight Republican campaign managers had claimed victory for Morrow. Returns from showed a plurality for Stanley more than 300 votes.

**GETS RECORD PRICE FOR STEERS**

Mr. A. Walls of Sanborn, in the eastern part of North Dakota recently sold nineteen fat Hereford steers in Chicago for what is said to be the highest price ever paid for beef cattle raised in that state. The steers were three years old, prime and averaged in weight more than 1600 pounds each. They were born in North Dakota, grazed there and finished on corn and alfalfa grown in that state, so they were strictly North Dakota cattle.

They brought \$10.25 a hundred an average of \$170.15 for each steer.

**CASE TO SUPREME COURT**

Status of Punching Devices to be Tested.

Asserting that the so-called punch-boards, operated by tobacco and confectionery dealers throughout the state, are not a violation of the anti-gambling law. William Storey of Valley city will bring a test case before the supreme court.

Recently, F. L. Watkins, agent of the North Dakota Law Enforcement League, issued a statement threatening prosecution of any dealer operating a punch board. Storey, a traveling salesman, is soliciting money from customers and will fight the case.

Dealers assert that while capital prizes are given to holders of lucky numbers, each punch entitles a purchaser to collar buttons.

**WANTED TO DIE**

Adolph Johnson, a transient laborer at Hankinson became despondent last Monday and made an attempt to take his life by throwing himself in front of a Soo Line train near Anselm. From his appearance when picked up it was seen that he had been on a terrible debauch for the past several days and was suffering from its

effects. Johnson evidently thought when he flung himself in the rails that he was going to be struck one of the fast trains, but instead it was a light switch engine, and after being considerably cut up about the face, he was thrown from the track. He was taken to Dr. Labbitt's hospital at Enderline to have his injuries attended.

**HOW AMERICAN CITIES GROW**

Nobody knows how fast an American city, state or town may grow. I recall some 25 years ago meeting a friend in Denver. He was an investor from the east. I think Denver had about 30,000 people then. He had come to buy real estate. He said to me, "This place is overgrown. Real Estate is too high. None for me!" And he went away. Had he invested wisely at that time he could have multiplied his money 10 to 20 fold. I was in Los Angeles about the same time. It had a serious reaction after a sudden boom. It was a little place, not one-tenth its present size. It seemed like a doomed city. An investment of \$500 then in out-lying acreage properly, I am told, would be worth \$500,000 today. So nobody can tell what may be the fortune of Seward Cordova, Anchorage, or in fact any of the new, wideawake cities of Alaska. All of them are nearly new and all from Ketchikan to Nome, have hopes.—Leslie's

**TOOK FLYING LEAP**

Soo Switch Engine Ditched and Crew Had Close Call

The Soo switch engine in the local yards at Hankinson took a flying leap from the end of the D-rail at 2 o'clock last Monday morning turned completely over, wrecking the cab and otherwise damaging the engine and a car of merchandise to which it was attached. The locomotive buried itself four feet in the soft clay beside the track, and Engineer Roy McMillan and Fireman Corrigan had an almost miraculous escape from death or serious injury. Both escaped by jumping. The accident occurred in the yards east of the depot. The switch light had blown out in the high wind, and brakeman Helms failed to notice that the D-rail had been opened behind the engine. He gave the signal to move and the engine was traveling at a good rate of speed when it left the rails.

The wrecking crew from Enderline spent the greater part of two days in cleaning up the wreck, and the locomotive has been sent to the shops for repairs.

**TOTTEN GETS REHEARING IN ELECTION CONTEST**

Bowman, N. D., Nov. 11—E. P. Totten, whom the supreme court recently declared had forfeited his title to the office of county judge of Bowman county because he pledged to the people of the county the return to the county treasury of a portion of his salary if elected has been successful in obtaining a rehearing before the supreme court and arguments on that new feature of the case will be made the latter part of the week.

Mr. Totten, in his rehearing petition, maintains that J. Diehl, the former county judge, who successfully maintained the suit against Totten was without right to contest the position, and that he is not legally a hold over officer and cannot now hold the position. The feature was not presented to the court in the previous submission of the case.

**PREVENT WINTER PASTURING**

Stock pasturing on alfalfa in the fall and winter often causes winter killing. The growth of alfalfa is needed to hold snow.

**DEPUTY TO SERVE 20 FEDERAL WARRANTS**

United States Deputy, Marshal Cameron left Fargo, Wednesday night armed with 20 warrants for the arrest of men on the Fort Berthold reservation, who it is alleged have introduced liquor into Indian allotments. Many of the men for whom the warrants were issued are said to be farmers and while some do not live in the Indian territory, the liquor which they had shipped to them, passed thru the Indian country. Agents of the Soo railway at Makoti, Parshall and Van Hook have been subpoenaed as witnesses to prove that shipments were made.

**ACTION OF SINGLE SPOONFUL SURPRISES MANY**

Wahpeton people who bought the simple mixture of buckthorn bark, glycerine, etc., known as Adler-ka, are surprised at the INSTANT effect of a SINGLE SPOONFUL. This remedy is so complete a bowel cleanser that it is used successfully in appendicitis. Adler-ka acts on BOTH upper and lower bowel and ONE SPOONFUL relieves almost ANY CASE of constipation, sour or gassy stomach. ONE MINUTE after you take it the gasses rumble and pass out. Henry Miller & Co., Druggists.

**Why Not Say "Good-bye, Sir?"**

THE telephone "Hello" has fallen into disfavor because it is not only useless and meaningless, but is a rather ungraceful and rude little word. It is fast becoming obsolete.

The telephone "Good-bye," however, is well worth preserving, even in these days of economy and efficiency. It gives that personal, friendly touch to business or social conversation which makes for better relations.

The cheery "Good-bye" over the telephone is just as potent as the cordial "Good-morning" with which you greet a friend on the street. Over the telephone it averts the feeling one sometimes has of being cut off abruptly.

Say "Good-bye" over the telephone as if it were really a part of your conversation and not merely a regrettable habit of speech.

Remember—

"The Voice With the Smile Wins."

**PLAZA SMITH IS OUT FOR GOVERNOR**

Bismarck, N. D., Nov. 11 Candidates for state offices are bobbing up aplenty these days. Two appeared here today. They are George A. Smith, the Plaza newspaper man, for governor, as a radical Republican. The planks of his platform will be announced later.

Besides W. E. Hoover of Fargo and N. C. MacDonald of Valley City, who have been announced, Andrew Mevig, superintendent of the city schools of Mohall, has announced his candidacy for state superintendent of public instruction.

**MR. WORKING MAN HOW LONG DO YOU EXPECT TO STAND FOR THIS?**

Thanks to an investigation of the Bethlehem Steel Co.'s strike in 1910, information is available as to the conditions of labor in the armor-making concern's plant. The inquiry was made by the United States Bureau of Labor in 1910, under the direction of Ethelbert Stewart, a special agent of the Labor Bureau at the time who bore the reputation of being one of the most experienced economic investigators in the country.

When this strike began there were no labor organizations in the plant; the company would not permit them. It was the higher grade workmen who led off in the strike. Many of the highest-grade men had approximately a 12-hour day. But they were frequently being required to work overtime on week days and to do additional work Sundays. Fearing that the encroachments of overtime and Sunday work were leading to a 12-hour and 7-day schedule for the whole force, they there fore protested. Therefore the protesting committee was discharged; therefore the strike.

The Government investigation revealed this:

Out of every 100 men—29 work ing days every week; 34, includ-

ing these 29, working some Sundays in the month; 51 working 12 hours a day; 25 working 12 hours a day, 7 days; 46 earning less than \$2.00 day.

These are the grim figures which the United States Bureau of Labor gives us the working shifts of the Bethlehem Steel Co. as drawn from the company's own time books. This is the manner in which the concerns which the United States Bureau of Labor gives us the working shifts of the Bethlehem Steel Co. as drawn from the company's own time books. This is the manner in which the concerns that have drawn down \$175,000,000 of the people's money were treating their employees in 1910. Since that time considerable 8-hour day legislation has been passed and there is no record of the number of 12-hour shifts now in force.

Workmen of the Nation, are you willing that your government shall continue to give contracts running into the millions annually to firms that have mistreated and underpaid their employees as have protest against war-traffic-ing concerns? If you're not will ing, then protest against it. But let me assure you at the outset that one protest will not be sufficient. The chances are you will have to speak loud and often before your voice will be heard in far-off Washington.

**GRINDING GRAIN FOR DAIRY CATTLE**

In a test to determine the need of grinding feed for dairy cattle it was found that cows fed whole corn passed 23 per cent of it whole in the droppings, heifers 11 per cent and calves 6 1-3 per cent. When fed whole oats the cows passed 12 per cent and the heifers 5 1-2 per cent and the calves 3 per cent. When whole oats and corn were fed together the cows passed 26 1-2 per cent, the heifers 17 1-2 per cent and the calves 6 per cent which indicates that the dairy cow needs her grain ground but that calves waste very little when fed whole grain, with beef cattle grinding corn has not been found to pay.
