Combing Won't Rid Hair Of Dandruff

The only sure way to get rid of dandruff is to dissolve it, then you destroy it entirely. To do this, get about four ounces of ordinary liquid arvon; apply it at night when retiring; use enough to moisten the scalp and rub it in gently with the finger tips. Do this tonight, and by morning, most if not all, of your dandruff will be gone, and three or four more applications will completely dissolve and entirely destroy every single sign and trace of it, no matter how much dandruff you may have. You will find, too, that all itching and digging of the scalp will stop at once, and your hair will be fluffy, lustrous, glossy, silky and soft, and look and feel a hundred times better. You can get liquid arvon at any drug store. It is inexpensive and never fails to do the work.

Ringworm—Scalp Sores

If you want speedy help try D. D. D. Prescription. So easy to apply, not messy or noisy. It washes into the scalp and the relief is instant. Try it today. We guarantee the first bottle, 50c, 60c and \$1.00.

WOULD ENCOURAGE BUSINESS METHOD

Grain Dealers, Millers, Seed Companies, Bankers and Others Offer Prizes to Farmers.

Encouragement for business methods on the farm is offered in the form of cash prizes from a number of sources, among them being the Northwestern Grain Dealers' association. The offers include prizes for the best kept and most accurate farm records, and for the best organized farm shown by the records and also provides a sweepstakes prize of a trophy to cost \$100. The announcement of the prizes was authorized yesterday by H. N. Stockett, secretary of the Northwestern association. The executive committee which has charge of this consists of W. T. Greely, J. A. Moore and Dan R. Fisher. The announcement made by Secretary Stockett contained the following statement:

"The Northwestern Grain Dealers' association desiring to encourage the farmers of the state in obtaining more satisfactory results in the growing of grain thru the efforts of the Montana Farm Management association, hereby subscribes \$50 as a prize to be offered to them for the best kept and most accurate farm records.

"The list of prizes, from various sources are as follows:

"Best kept and most accurate farm records:

Northwestern Grain Dealers association, \$50; Local Milling company, \$25; The Montana Farmer, \$10; Bozeman Milling company, \$10.

Best organized farms as shown by records:

Great Western Sugar company, \$50; Barkmeyer Grain & Seed company, \$25; The T. C. Power company, \$15; Bozeman Canning company, \$10.

Sweepstakes combination prize:

State Bankers' association, \$100 trophy.

CHARGE OF FRAUD IN CIVIL ACTION

Jury Will Return Verdict This Morning in Case of Schultz Against King.

Judge J. B. Leslie's department of district court was occupied yesterday with the trial of the case of Emil M. Schultz against Rufus L. King, which grew of a real estate deal between the parties. The purpose of the suit was to obtain cancellation of a transaction in which Schultz traded 320 acres of land and personal property of the value of \$2300 to King for Fort Benton property known as the Fort Benton Sanatorium. Schultz alleged fraud against the defendant. The jury retired to consider the evidence at the conclusion of the afternoon session.

Schultz was represented by W. S. Towner and L. L. Callaway and H. S. McGinley appeared for the defendant.

Let Us Tell You About the Universal Pipeless Furnaces

At this season of the year you should begin to make your plans for the installation of a furnace for next winter. We have some very interesting facts to tell you about the UNIVERSAL PIPELESS FURNACE and we will be very glad to explain why this furnace uses less fuel and gives a greater circulation of warm air than any other.

PIPELESS FURNACE FACTS
The principle of the "pipeless" furnace is as old as the world. But, like the "wireless" telegraphy, it is only recently that men have learned how to apply it perfectly and successfully. Until Marconi's genius found an easier and a better way, builders of telegraph lines thought they must use wires, strung at great expense, and subject to innumerable accidents. And until comparatively recently furnace builders knew of no way of getting heat to all parts of a house except by carrying it thru metal or wooden pipes. Now we know that just as Nature is able to carry messages thru the air to great distances without wires, so is it a simple matter to carry heat thru the air to all parts of a house, without pipes. There is nothing complicated about a pipeless furnace. In fact it is the simplest of all forms of successful heating. The marvel is that the world did not sooner discover and apply it.

THE LAW OF HEATED AIR
The pipeless furnace is constructed according to the well-known natural law that warm, or heated air, is light and rises, while cool or cold air is heavy and descends. It is well known that the warmest part of any room is near the ceiling. The warmest room in a house—if there is opportunity for air to circulate—is usually upstairs. A common complaint in a poorly heated house is that the floors are cold. Simply because cold, dead air—air that is not in motion—lies along the floor; while the warm air rises to the ceiling, usually too high to create warmth for the occupants of the room. A pipeless furnace sets all this air in motion, thus carrying the cold air to the furnace to be warmed and moving warm air thru the room to take its place. In the UNIVERSAL Pipeless Furnaces this circulation of air never ceases.

Burns Any Fuel

The UNIVERSAL Asbestos-Insulated Pipeless Furnace burns any fuel—coal (both anthracite or bituminous), wood or gas, even rubbish and straw have been used in an emergency.

Fuel Expense Vastly Reduced

Your UNIVERSAL Pipeless Furnace will practically "Buy Itself." It will save you so much on your fuel bills that in a short time you will have saved the price of the furnace.

Many users have gotten from 33 1/3 per cent to 50 per cent reduction on their fuel costs. Some report even more, but we do not wish to over-state the saving. Much depends on the way in which the house is built, the price of fuel, and other circumstances.
