If an election is called it is believed Edwards would probably win out as that section of the county has the majority of votes.

According to those who have investigated the matter of the unemployed in the state is becoming a serious problem. The drought in many sections of Harard has to the number of those seeking work. Many of the men have come to Gallatin county with the expectations of getting work. They have heard of the hundreds of thousands of dollars set aside by the county for road improvements. None of the work has begun and as far as can be learned no bids have been sought. "Speeding up the good roads program through the state is looked upon as the solution of the problem," said Mr. Harard. He has sent a communication to Governor Sanders asking him to use his influence in bringing such effects as are possible. He has also sent a communication to M. L. Wilson, United States extension service, stating the conditions and urging him to take up with the federal bureau of good roads. The county is making bids for work on the West Gallatin road. IF THIN AND NERVOUS, TRY PHOSPHATE

Nothing Like Plain Bitro-Phosphate to Put on Firm, Healthy Flesh and to Increase Strength, Vigor and Nerve Force. When one stops to consider the host of thin people who are searching continually for some method by which they may increase their flesh to normal proportions by the filling out of ugly hollows, the rounding off of protruding angles, with the attainment of a healthy and attractiveness, it is no wonder that many and varied suggestions along this line appear from time to time in public print. While excessive thinness might be attributed to various and subtle causes in different individuals it is a well-known fact that the lack of sufficient phosphorus in the human system is very largely responsible for this condition. Experiments on humans and animals by many scientists have demonstrated beyond question of doubt that a body deficient in phosphorus becomes nervous, sickly and thin. A noted author and professor in his book "Chemistry and Food Nutrition," published in 1914, states that the amount of phosphorus required for the normal nutrition of man is seriously underestimated in many of our standard text books. It seems to be well established that this deficiency in phosphorus may now be met by the use of an organic phosphate known throughout English speaking countries as Bitro-Phosphate. Thru the assimilation of this phosphoric content when absorbed in the amount normally required by nature soon produces a welcome change in our body and mind. Nerve tension disappears, vigor and strength replace weakness and lack of energy, and the whole body soon loses its ugly hollows and abrupt angles, becoming enveloped in a glow of perfect health and beauty and the will and strength to do a day's work. CAUTION:—While Bitro-Phosphate is unsurpassed for the relief of nervousness, general debility, etc., those taking it who do not desire to put on flesh should use extra care in avoiding fat-producing foods.—Adv.

Thompson; officer of the guard, Charles Preist; color sergeant, Robert C. Brennan and Leonard Sheffield; chief musician, Avery Kemp. Farmers of Harlem Country Raise Fund to Provide New Roads

Special to The Daily Tribune. Harlem, June 18.—A. A. Boisvert and R. J. Niewoebner, who have homesteads northwest of Havre, have been appointed a committee by the people in that section to get some better roads. In fact there are no roads at all now, but thru their persistent efforts there will be a road out that way before long. Owing to the fact that the county commissioners had no funds available to do this work they set out to raise some money of their own and in a very short time had \$750 in cash subscribed. When this fact was put up to the commissioners they agreed to put that much more into the fund, so there is now about \$1,500 available for the work. The committee has 17 miles of roads laid out that it wants improved, and the problem now is how to make the money stretch over such a long distance. Quite a number of those living along the road have signified their willingness to donate some labor also. It is expected to let a contract for the work after a preliminary survey is made.
