Blood-Iron Phosphate For Weak, Thin Folks

Weak, thin, nervous people almost invariably owe their condition to lack of phosphate in the nerves and lack of iron in the blood. One of the surest, quietest and safest ways in which to make up the deficiency is to take with each meal a five-grain tablet of digestible phosphate and iron known among druggists here as Blood Iron Phosphate; because it supplies iron to the blood as well as phosphate to the nervous system. People who have tried it say that one five-grain tablet taken with each meal quickly restores depleted nervous energy, enriches the blood, increases strength, vitality and endurance, and those who are too thin usually put on pounds of solid stay-there flesh in a short time. Inasmuch as the Great Falls Drug Co., Cascade Pharmacy and Model Pharmacy and all other druggists are authorized to sell Blood-Iron Phosphate under a guarantee of satisfaction or money back, every thin, weak, nervous or anemic man or woman should give it a trial without delay. Important—Blood-Iron Phosphate is sold only in original packages, containing enough for three weeks' treatment, at \$1.50 per package—only 50 cents a week.—Adv.

SOUTH BUTTE BANDIT IS WANTED ON COAST POLICE ARE INFORMED

California Bank Robber Believed to Be Man Who Held Up Montana Concern.

Special to The Daily Tribune. Butte, Sept. 16.—While police officers here have been unable to find any trace of him, the man who robbed the South Side bank in Butte a week ago of more than \$5,000, is wanted in California, according to advices received here from San Francisco. Two weeks ago a California bank was held up by two men, who made their escape. They were traced to Salt Lake, where they separated from two women companions. The women returned to San Francisco, where the women were arrested upon their arrival, and where they still are in custody, as associates of the two bank robbers. The report goes that when the men left the two women in Salt Lake they came to Butte. A description of the men has been received from San Francisco, and the description of one of these men is said to tally closely with the man who held up the South Side bank in Butte in such a daring manner just before noon, taking the money while he had the cashier and the clerks shut in one of the vaults.

MONTANA BUSINESS STANDING UP WELL SAYS DUN MANAGER

State Manager for Mercantile Agency Asserts Trade Volume Exceeded Expectations.

Special to The Daily Tribune. Butte, Sept. 16.—A generally satisfactory business condition throughout the country is reflected in the August report of R. G. Dun & Company. Montana was possibly not so favored as some other states, but the failures chronicled in the state during August were very few, and of comparatively small importance, and many wholesale houses report business during August exceeding expectations, according to Philip S. Rush, state manager for Dun's. August did not bring a new record in number of commercial failures, but it showing closely approximates that of July, for which there is no precedent. With 468 insolvencies in the United States, exclusive of banking and personal bankruptcies, last month's exhibitors that of any preceding month, except July, when only 452 defaults were reported, and the \$5,922,393 of liabilities in August, although about \$400,000 above those of July, are less than in any other month in nearly two decades. On but half a dozen occasions since monthly returns were compiled, in fact, has so small an indebtedness been shown, while June, July and August of this year are the only two months in which the number of failures has fallen below the 500 mark, says Mr. Rush. The high-price agitation is reaching out into textile channels. Because of the uncertain conditions, sellers who are called upon to price products for future delivery are hesitating, and there is a disinclination to further advance prices at present, and in Dun's list of wholesale quotations this week, for the fifth consecutive week, declines are in majority. Whether the price upturn has merely halted, or whether the turning point has been definitely reached, is not clear at the moment, but opposition to high prices is spreading, and in some quarters, at least, the peak seems to have been passed. With suspension of strikes and an acceleration of production, the era of general price adjustment that must inevitably follow would be brought measurably nearer.
