

Studebaker Company Sues Wilber Transfer

The Wilber Transfer company was made defendant Thursday in a district court action in which the Studebaker Corporation of America demands damages in the amount of \$4,698.52, alleged to have been sustained through the negligence of the defendant company in storing 27 automobiles left in its care. It is set out that because of the Wilber people's alleged failure to properly store the cars, parts and fixtures of the value of \$1,698.52 were lost and that an expenditure of \$3,000 was necessary to repair other injuries to the machines, resulting, it is alleged from their exposure to the elements.

The lighthouse of Madras, India, 125 feet high, can be seen from a ship's deck fifteen miles at sea.

MILLING IN TRANSIT RATE HELPS STATE FLOUR MILLS

Lower Freight Tariff on Wheat From North Dakota Also Granted by Railroads and Will Enable Idle Plants in Montana to Again Operate.

Authorization of a special rate for the milling companies to bring wheat from North Dakota for grinding at the Great Falls plants has been granted by the railroad administration, the rate being that asked by the traffic representative of the milling companies. The order announcing the rate also gives a milling in transit rate for all wheat handled from Nebraska, Kansas, Wyoming, South Dakota and Colorado, and with the two it is understood that it will mean the continued operation of local mills at least on a considerable percentage of their normal capacity.

The special rate for wheat from North Dakota to Great Falls is a decrease of approximately 20 per cent. This arrangement is made especially to take care of the output of the mills demanded for consumption in Montana and according to a representative of the one the mills will serve the purpose for which it is intended.

Transit Rate Helps.
The milling in transit rate from the state mentioned on the east and south and also from Idaho, Washington and Oregon, will give the opportunity for getting the raw material for mill operation for the market demand and, according to statement made some time ago by the management of the Royal Milling company, may mean at least the operation of one of its twin mills in this city. The Montana Flouring Mills company's plant in Great Falls has been out of operation for some time and it was stated some time ago by a representative of that company that it had not been decided what policy would be pursued until the rates and the source of possible supply could be studied. They operate plants at Lewistown and Harlowton.

The effect of the special rate, illustrated by a specific point would mean that wheat shipped from Antlers, North Dakota, would now come at a rate of 32 1/2 cents while under the old rate the freight was 41 cents a hundred pounds which, reduced to the bushel of wheat would be approximately 20 cents a bushel in freight and applying that to a barrel of flour, allowing 4 1/2 bushels of wheat to the barrel, the freight for getting the raw material to the mill would thus be 90 cents a barrel.

Grind It In Route.
In the milling transit rate which will be operative on all wheat hauled from the west coast states as well as from Kansas, Nebraska and states east and south of here, the miller will be permitted to bring the wheat to the mill, grind it and then send the manufactured product on to the coast or east, as the shipment may require, by paying a slight added charge per hundred weight over the normal freight rate. The miller thereby gets the advantage of the mill feed and the cleanings from the wheat handled as his consideration for the extra charge and in such cases as the present year he gets the further advantage of keeping his mills going on part capacity while he probably has to sacrifice some of what would otherwise be his profits, he is at least in position to retain a grip on his usual

Many Seeking Aid of Salvation Army Since Cold Snap

Cold weather has brought a rushing business to the Salvation army. During the past two days that institution has received a number of calls for clothing, most of them being from farmers. Over 40 garments have been given out for this purpose. As the cold weather advances the army expects to have many more calls and unless more clothing is donated to it, it will be almost impossible to fill the demand.

The army has now about 300 garments on every farm this work. Records of clothing given out to destitute families in former years exceed that two or three times. Adjutant and Mrs. L. M. Isaacs will gladly call for any clothing if the persons wishing to donate will notify them.

NO TRAIN DELAY DUE TO STORM

Snowfall General All Along the Line With No Low Temperatures.

Great Northern trains were little affected Thursday by the snowstorm which seemed to be general throughout the state. Messages received by the Great Northern dispatchers reported a general storm at all points along the line and from six to eight inches of snow in the mountain territory.

At Havre, Glasgow, and points farther north the temperature was about the same as that of Great Falls and vicinity. Everywhere the storm seemed to be just one of those good old-fashioned snows that every farmer likes to see, as insuring a good start for next year's crop.

Train No. 44 was three and one-half hours late into Great Falls Thursday morning but this was not due to the snow. All local trains arrived on time and the freight trains were delayed but a very little.

MOTHER WILL TRY TO KEEP CHILDREN

Mrs. Nipple Granted Time in Which to Prepare Case Against Petition for Writ.

A decision in the habeas corpus case, initiated in district court Wednesday by Alfred Eymes of Portland in an effort to obtain custody of his minor daughters and set for hearing Thursday, will not be forthcoming until Monday. The children and their mother, Mrs. Emma Nipple of 1811 Sixth avenue north, were in court Thursday pursuant to an order signed the day before. H. R. Eickmeier, attorney for Mrs. Nipple, asked that the petition be quashed, but was overruled and a continuation until Monday was ordered to permit the defendant to prepare her case. Mrs. Nipple's former husband was present with his attorneys, H. G. Bennett and F. A. Ewald.

It is reported that Mrs. Nipple will make a strenuous fight to retain custody of her daughters, who are seven and eight years of age. She was granted a divorce from Eymes at Portland last April and a short time later, at Calgary, Canada, was married to Nipple. After the decree had been entered Eymes, who it is said, made no appearance in the divorce case, obtained a court order in which he was granted temporary custody of the children and it is to obtain enforcement of this ruling that he filed his petition for a writ in the local court.

Six Inches of Snow Falls Around Butte

Butte, Oct. 23.—The snowstorm which began yesterday throughout the mountain range section surrounding Butte and which has continued more than 26 hours, still is in progress with light snow falling. The fall in Butte now equals six inches, while in the mountain peaks it is much heavier. There is no noticeable change in temperature from yesterday, when it went as low as 20 degrees above zero.

Ticket Sale Begins on Saturday at Noon
Tickets will go on sale Saturday at noon for "Fair and Warmer" the rollicking farce that is to be presented at the Grand opera house Sunday and Monday evenings. This is Avery Hopwood's greatest offering in the line of pleasing entertainment. The mail order business for this show has been good.

Chateau Is Thriving Says R. P. Reckards
Everything about Chateau looks encouraging for the future, according to R. P. Reckards, president of the American Bank & Trust company, who returned from the Teton county capital Thursday after a two days visit there. He went to Chateau to be present at the organization of the Stockmen's State bank. He says the snow there was equally as heavy as in Great Falls and the farmers who were in town were enthusiastic over the storm, believing that it presages well for next year's crop. Mr. Reckards returned to the city over the Great Northern road at 11:30 Thursday morning.

Substantial deposits of mozanite, used in making gas mantles, have been discovered in Ceylon, Brazil and the United States heretofore having been its chief producers.

CASCADE COUNTY TO VOTE ON DROUTH RELIEF BONDS

Proposed Issue Before People Tomorrow, Saturday, Is for \$250,000; Whatever Portion Is Needed Will Be Used to Help Stricken Farmers Secure Feed and Seed.

Cascade county will vote on drouth relief bonds tomorrow, Saturday. The issue which it is sought by the commissioners to have authorized by this vote is \$250,000, but it is announced by the board that only such amount as may actually be needed will be issued, the figure being fixed high enough at this election to take care of any need that may arise, rather than indicating known needs. The commissioners do not anticipate that the total will reach anywhere near the authorization of the bonds. They have checked rather closely the apparent needs and they feel, with their knowledge of the situation in Cascade county, there is not any likelihood of the call exceeding their estimate.

The money to be provided by bond issue is not to be made a general fund to be drawn upon by anyone who may feel he would like to borrow money to sow a crop of wheat. The law makes stringent provision for its distribution by the commissioners to those who are to benefit by it. No one who has credit at a bank or who has means of securing a loan on his own resources has a chance at the funds which will be available from the bonds to be voted upon, assuming that the bonds are authorized.

Who May Benefit.
The primary essential for one to secure a loan from this money is to be able to show that he has no available credit source and that he has ground that is in proper state of cultivation for seeding to wheat and that he needs the money for the purpose of securing seed and providing feed for his teams and food for his family during the time when the crop may be raised.

There is a large registration entitled to a vote in the coming bond election, but whether there will be a large vote is purely problematical. There has not been any great interest shown in the election. Those business men who have discussed the matter have taken the position that the commissioners should know, because of their source of general information on the needs of the country, what

PAY WAS EARNED COMPANY AVERS
Interstate Realty Demands \$1000 of Mrs. B. W. Pugh as Sale Commission.
S. H. Haas and Theodore Mellum, doing business as the Interstate Realty, have brought suit in district court to recover \$1,000 alleged to be due on a contract entered into between the company and Mrs. B. W. Pugh, the defendant agreed to pay a commission of five per cent on the sale price of a parcel of Great Falls real estate in case they obtained a buyer and that the commission became payable incident to negotiations begun when they produced a buyer.

The demand for \$1,000 is based on the allegation that this sum would have been earned on a sale involving \$20,000, the amount mentioned in the complaint as being the consideration which the defendant would have received had the deal matured.

Red Cross Seeking These Lost Trails

The Home Service section of the Red Cross would like to get in touch with the following men or with their relatives or friends:

farmers will all be favorable to the issue.
The call for the election was made on the filing of numerous petitions asking for drouth relief funds until the total far exceeded the \$10,000 which might be granted without resorting to a special election. The polls will be open at every one of the usual voting precincts of the county on Saturday from 8 in the morning until 6 in the afternoon, and all persons registered to vote at any general election will be eligible to a vote in this election. There is no property qualification required now, nor is there any special registration essential to voting Saturday.
