## TAXPAYERS WILL PAY \$750,000 INTO COUNTY STRONGBOX TODAY

Window Opens for Last Time at Treasurer's Office Before Books Close; Nearly Half a Million Will Be Received in Seven Payments; Great Northern's Check Will Be Largest.

Anyone practical in the art of wishing can today, Saturday, consistently employ his talents while accumulating over what Cascade county's income will be between the hours of 9 a. m. and 5 p. m. Over three-quarters of a million dollars will be received at the office of county Treasurer Fred C. Andretta before the cash window closes, which, it is submitted, should be enough to occupy the attention of those who have the habit of "wondering what it would seem like," etc.

Up to Friday evening \$729,397.23 had been received in taxes, but \$1,844,000 is to be collected and this is the last day on which payments can be made before the books close. Treasurer Andretta estimates that not more than five per cent of all taxes will become delinquent, which would leave something more than \$750,000 to be paid before the cash window closes.

**Record Exceeds Last Year.**  
 The record to date is an improvement over last year, when \$908,546 had been paid when the office closed on the next to the last day.

Despite the volume of cash to be

handled it will be possible for the treasurer's office to handle the business. This will be due to the fact that a great proportion of payments will come in large amounts. Treasurer Andretta Friday night found that \$441,923.04 will be received in seven checks. Only one bank in the county had paid its taxes Friday, which leaves a big source of revenue open to the county from that class of business. The Northern Pacific railroad sent in a check for over \$11,000, but the Great Northern, which pays more taxes than any other firm or individual in Cascade county has still to remit.

**Some of the Big Ones.**  
 The Great Northern's assessment this year totals to the very respectable figure of \$152,911.06. The second largest taxpayer is the Anaconda Copper Mining company, which pays \$135,038.48. Then comes the Great Falls Power company with \$74,224.13 and the Great Falls Townsite company, with \$46,803.20, the Montana Power company, with \$19,247.66 is also listed among the big ones. The Montana Flour Mills company pays \$8,881.14 and the Rocky Mountain Fire Insurance company, \$4,107.37.

## U. S. WILL KEEP WATER RIGHTS

Renew Appropriation of 1500 Feet in Sun River and Muddy Creek.

**Dam 90 Feet High Planned, and Big Pumps Are to Be Installed.**

The government's appropriation of 1500 cubic second feet of water in Sun river and Muddy creek, sufficient to irrigate 75,000 acres of land, was renewed Friday by Project Manager George O. Sanford, who made necessary filings in the office of County Clerk John E. Moran. One thousand feet of the water is to be diverted from Sun river and 500 from Muddy creek. The water to be taken from Sun river will be lifted into a canal by means of pumps, but a dam 90 feet high will be constructed to create a storage reservoir on Muddy creek. Two projects will be organized on Sun river, the district being known as Sunnyside division. On the left bank water will be taken out at a point in section 32, township 21 north of range 2 east, and on the right bank it will be diverted in section 35 of the same township.

**Have Big Canals.**  
 Canals will be six feet deep and 25 feet wide at the bottom, each capable of carrying 500 cubic second feet of water.

Land coming under these canals is located in township 20 north, of range 2 east; township 21 north, of range 2 east; township 20 north, of range 3 east; township 21 north, of range 3 east; and township 21 north, of range 1 east. The Muddy creek project, known as the Vaughn division, will be formed to irrigate land in township 20 north, of range 3 east; township 21 north, of range 1 east; township 21 north, of range 2 east; and township 21 north, of range 3 east. Twenty-five thousand acres are described in the Vaughn division and 50,000 in the Sunnyside division.

**Must Renew Locations.**  
 The appropriations are made under the act of June 17, 1902, which permits the federal to file on water for irrigation purposes, but the locations must be renewed at stated intervals. No intimation is given as to whether the work of completing the projects is to be undertaken in the near future, but in view of word recently emanating from Washington, it is considered probable that no federal funds will be available for new development during the coming year.

## STOLEN HORSE SOLD IN CITY

Valuable Animal Taken From Field Near Choteau; Suspect Glen Betts.

Teton county officials have for the past week been searching for Glen Betts. He is charged with the theft of a valuable saddle horse from a pasture near Choteau, and a warrant is out for his arrest. The horse was located in Great Falls several days ago by Deputy Sheriff Reiquam, who traced it here after its disappearance was discovered. The animal was sold to a south side livery stable for \$40. Deputy Reiquam stated that the same firm made the owner an offer of \$200 last summer without success.

The theft was accomplished in broad daylight, it is believed. The thief entered the field, caught the horse, cut the fence, led the horse through, repaired the break and rode away. Deputy Reiquam learned. Man and horse were seen at different places between Choteau and Great Falls, the trail disappearing six miles from the city. The horse was located through search of the south side stables.

After disposing of the horse, the rider said he was going to Spion Kop, but investigation has shown that he left the city in a different direction.

## Galbraith Company Ships More Cattle

Another stock shipment totalling 30 cars was made out of Browning Friday by the Galbraith Cattle company. This firm is moving a large number of cattle from the Blackfeet reservation to Texas this fall, the shipment being the third so far sent out. The stock was imported from the south last spring. Another consignment of 28 cars was loaded at Browning Friday by different owners, this lot being billed to Nampa, Idaho.

**FIVE WRECK VICTIMS FOUND.**  
 Sault Ste. Marie, Nov. 28.—The bodies of five men, believed to be members of the shipwrecked steamer Myron, have been picked up between Iroquois Point and Saultston.

## BRING SEAPLANE HERE, NAVY PLAN

Recruiting Officer Views Broad-water Bay, Says It's Good Landing Place.

It may be possible that during the coming spring months residents of Great Falls will be privileged to view the flight of a naval seaplane on the waters of the Missouri river, says Lieutenant W. J. Walker, U. S. N., who is here from Salt Lake City to stimulate naval aviation recruiting.

Lieutenant Walker has petitioned the navy department for the use of a seaplane to use in recruiting and if his request is granted with the Great Salt Lake as a base he will fly overland to points in Montana and adjoining states where it will be possible to effect a landing in the water. Lieutenant Walker visited Broadwater Bay Friday and declared that with the rising of the waters next spring it would be a very desirable place for a demonstration.

The N-C 4 seaplane that is now being exhibited at points along the Mississippi it has been rumored is billed to give a demonstration at Helena.

Opportunity for advancement and pay are exceptionally good in the aviation department of the navy. The pay of an enlisted man ranges from \$32.60 to \$111.50 a month when he is first recruited. The case of Lieutenant Walker is a proof of the rapid advancement that may be made if the recruit applies himself. Lieutenant Walker enlisted in April 1917 in the medical corps. In February 1918 he was transferred to the aviation branch and on January 1, 1919 he was promoted to first lieutenant.

The seaplane which will probably be used by Lieutenant Walker, will be the Curtis Hispania Suiza N-9, accommodating one passenger and the pilot.

## D. J. RYAN HEADS TRAINMEN LODGE

B. R. T. Elect Corps of Officers for 1920 at Annual Meeting.

D. J. Ryan will serve as president of Sun River lodge No. 405, Brotherhood of Railway Trainmen, during 1920. Mr. Ryan was elected to that office at the annual meeting of the brotherhood, succeeding G. W. Sheets, who now assumes the title of past president. Other officers and committee members were: Peter Nissen, vice-president; P. E. Lamere, secretary-treasurer; J. J. Stillman, journal agent; F. W. Kraft, chairman local committee; F. S. Smith, secretary local committee; H. E. Germain and R. H. Vinson, committeemen; Dr. R. E. McCarten, medical examiner; William Duckett, conductor; C. O. May, chaplain; W. C. Minshall, outer guard; C. E. Melly, inner guard; J. T. Matari, warden.

The lodge will give its annual ball Feb. 12. Committees have already been selected to make arrangements for this event and definite announcement will be made concerning details during December.

## SUES TO COLLECT ON NOTE

J. W. Hoyt has brought suit in the district court against Arthur C. M. Anderson and Hulda A. C. Watson to compel payment of a note for \$140 alleged to have been given at Monarch August 1, 1919, to mature November 1. It is the plaintiff's allegation that the entire amount is due, with interest.

## Saves Flour Gold From River Sand Inventor's Claim

Believing that they have succeeded in developing a machine which will prove a great boon to the mining business in the recovery of flour gold from sand, the Hanssen-Haug-Darby company is having a machine built at the Wood & Safford machine shop on which they have asked for a patent.

They feel certain that there has been no infringement of idea, as they believe their machine is an original idea in the work of recovering flour gold from the sand. They call it the Centrifugal Amalgamator and it involves the mercury process.

The inventors of the new machine are Ralph Hanssen, Peter B. Haug and Martin E. Darby. Mr. Hanssen is president, Mr. Haug, vice-president and treasurer, and Mr. Darby secretary of the company. The machine, when completed and ready to operate, will handle 20 tons an hour, and the inventors make the claim that it will make possible the profitable handling of sand which would not otherwise be possible to handle.

## EXPERTS TO TALK ON DUST BLASTS

Menace of Elevator and Mill Explosions Subject of Lecture at Rainbow.

In the palm room of Hotel Rainbow this Saturday afternoon, a lecture will be given on the subject of "Dust Explosions" with special reference to such explosions in mills and elevators. The lecture will be copiously illustrated by means of moving pictures and other demonstrations and there will be numerous facts given intended to help the general public fully understand and appreciate the dangers of dust explosions and the means by which they may be guarded against.

The speakers will be Dr. H. H. Brown and David J. Price of the chemistry bureau of the United States agricultural department. They are sent to Great Falls by the department of agriculture at the request of the federal grain corporation. The aim of the campaign being carried on is food conservation. During the last two years there have been several fires in mills and elevators directly traceable to dust explosions and much grain has been destroyed which otherwise would have gone into food channels.

This lecture will be open to the public without charge and both men and women are invited to attend.

## TWO FINED FOR DRUNKENNESS

William Blake and Ed McGert finished a small celebration early Friday morning in the city jail, both coming into disfavor with the police through the consumption of liquor. They were arrested on charges of drunkenness. Each paid a fine of \$10 in police court Friday morning.

## Will Return to Find His Wife Has Divorce

A divorce decree was signed in the district court Friday by Judge J. B. Leslie in the case of Margaret Green against Fred Green, in which testimony was taken November 13. Desertion and failure to provide on the part of the defendant, who made no appearance, were found by the court to have been proved. It is noted in the decree that the present location of the husband is not known. The Greens were married at Glasgow, Mont., May 30, 1916.

## Stage Coach Days

Our forefathers selected their own glasses. They also traveled in stage coaches. They did both for the same reason—there was no other way.

Today stage coaches are a curiosity—their utility has passed with the invention of more modern methods, just as "selecting your own glasses" has given way to scientific eye testing.

Our methods of testing are the latest and most scientific known and we make the glasses.

See us because we are right in our own shop.
