Great Sale of Men's Neckwear

50c Value For 25c

Best ties ever sold for a quarter is the super news our men's store greets you with for Tomorrow and Saturday. When a maker sells ties to a retail store he shows the buyer samples of silks and then makes up the ties from silk similar to the samples the buyer selects. After he has taken his season's orders, the samples are of little use to him and he makes them up into ties together with the short ends of silk he has remaining. It is from such silks the ties in this sale are created and that's why we can sell them for a quarter. Included are: Matisse, Armoires, Taffetas, Bengalines, Baratheas and Peau de Soles in spots, figures, squares, stripes, etc., in all shades, including changeable silks and plain blacks and whites. We place no limit on quality, you'll surely buy a half-dozen at least when you see them, for they are the grandest value ever offered in this town for 25c

WILL MEET TO DECIDE ON ROADWAY

Chihuahua Hill Property Owners to Discuss Proposed Street Widening.

Property owners whose property abuts on the proposed new roadway along Chihuahua Hill have agreed to hold a meeting on Saturday evening to decide whether they really want the proposed roadway, if so, where it is to be run and to discuss generally the details of the proposition to improve the present trail through the district named. The place of the meeting is assigned as the council chamber in the city hall. W. B. Cleary has agreed to address the meeting on behalf of the promoters of the scheme.

It will be remembered that the proposition to widen and grade Chihuahua Hill trail, from a point at its juncture with O. K. street to Young Blood Hill was recently put before the property owners in that section of the city in the form of a petition. Those residing, or owning property on the lower side of the trail were unanimous in their approbation of the scheme, but the petition met a snag when presented to the owners of property on the upper side of the trail. This latter division demanded that before signing the petition the city should survey the proposed roadway and arrive at the exact location of the lines of the proposed roadway. This met with prompt refusal unofficially on the part of Acting Mayor Hughes and Councilman Morris, who both took the stand that the city would by such action be incurring an expense which might prove to be useful in the face of future developments.

Undaunted by the obstacles presented, Chairman Thompson, of the committee on better streets of the Chamber of Commerce, and B. Carretto the men who have had the project in hand since its inception, again went to work on the property owners with the result that Saturday night's meeting will be held.

In the election of Attorney W. B. Cleary to address the meeting the promoters of the project are to be congratulated, as this gentleman is a forceful, eloquent speaker who will bring the matter before the property owners in a light that will be nothing if not fairly presented and intended for the best interests of all concerned.

It is expected that the meeting will be attended by nearly every property owner on Chihuahua Hill who might possibly be benefited by the proposed roadway and the meeting promises to be a most enthusiastic one.

Should the property owners decide to ask as a body the city for the survey there is little doubt that the project will be promptly made and the project set on foot at the earliest moment.

GOLDENBAGEN COMMITTED SUICIDE

Hanged Himself in His Cell in Jail at the End of Heavy Bed Chain.

Crazed with excessive drinking, and determined for the last few days to end his own life, George Goldenbagen finally succeeded in doing away with himself in the county jail yesterday morning at about six o'clock.

George Goldenbagen is the same man who wandered in from the hills, around Lowell, on Tuesday morning at 4 o'clock, and told Joseph Barr, the night bartender at the White House saloon, that he had tried to commit suicide the night before while out in the hills. At that time Goldenbagen had a cut right in the middle of his throat, which he said he had inflicted with a piece of a broken bottle. Barr took him to Dr. Godfrey and had the wound dressed. After leaving the doctor's office, Goldenbagen showed signs of insanity, and was taken to the county jail by Deputy Sheriff George Humm.

He had been in jail since Tuesday morning, and although he had been acting very queerly, none of the officers looked for him to attempt his life again. Goldenbagen was confined in the upper part of the jail, in one of the steel cages, and was to have been taken before the Probate Judge in Tombstone, to be examined as to his sanity.

When Deputy Sheriff Doyle arrived at the jail yesterday morning at 6 o'clock to feed the prisoners, two of the prisoners of the upper part of the jail showed him the body of Goldenbagen hanging from the top of his cage. The prisoners told the officer that they had noticed that Goldenbagen was acting queerly the night before, but thinking that he would soon get tired and go to sleep, they paid no more attention to him.

When Gallagher, one of the prisoners, awoke at 6 o'clock, he looked through into Goldenbagen's cell and saw the body dangling from the top of the cage. He immediately awoke the other prisoners, who were astonished when they saw the body.

Doyle immediately notified Coroner Murphy, who proceeded to the jail. The following jury was impaneled: Joseph Hughes, T. P. Frazer, R. H. Elliot, George Bunker, Daniel McGillis and A. J. Holland.

Goldenbagen had hanged himself by means of a chain which is used to suspend the cots from the roof of the cell. He had loosened the chain from the cot and wrapped it around his throat. He then dropped the full weight of his body, and hung there until death resulted from strangulation. So quietly had he accomplished his purpose that he did not awake the prisoners in the next cell. The body was not yet stiff when the coroner arrived, indicating that he could not have been dead very long.

That Goldenbagen was insane is evident from the incoherent statement which he wrote on a piece of manila paper found in his clothing. The statement reads as follows:

"C. & A. Company have made an agreement with banker in New Braunfels, Texas, that I gave orders 4 of my brother's property and spent it on drunken rows in Bisbee so if they kill me they can make arrangements."

The meaning of this statement will probably never be known, but in view of all the circumstances connected with Goldenbagen's recent actions it seems to mean that he wants to tell the C. & A. Company, by whom he was employed until last week, that he has made an agreement of some kind with some banker in New Braunfels, Texas, his former home. He next says that he gave four orders on his brother's property, evidently for money, and then goes on to say that he "spent it on drunken rows in Bisbee." Then he talks of "their killing" him, evidently thinking that his brothers are going to kill him for robbing them. This statement Mrs. Hartje showed people for the past week that there were a hundred men who wanted to kill him. Evidently, in his demented condition, Goldenbagen thought that he would cheat those who he thought were going to kill him by committing suicide.

Goldenbagen was 30 years of age, and came to Bisbee from New Braunfels, Texas, a few months ago.

SOUTHWEST'N TO ABANDON ALAMOGORDO NEW MEXICO

Shops of Phelps-Dodge System Will Be Moved to El Paso, Texas.

Work definitely commenced this week proves what has long been rumored—that Alamogordo will soon cease to be a terminal on the eastern division of the Southwestern, and that Carrizozo will be the new terminal.

Work started yesterday at both Carrizozo and Alamogordo shows that the change is to be made and that as soon as possible, at Alamogordo workmen yesterday commenced tearing down the roundhouse. In preparation, it is said, for moving it to Carrizozo, while at the latter place a grading outfit is at work leveling off the land for the necessary side tracks, buildings, etc., necessary for the terminal, says the El Paso Herald.

By this change, the eastern division will be divided into two runs, almost exactly of the same length, while formerly they were of very unequal size. Under the old arrangement, Alamogordo at the end of the first half of the run to Santa Rosa was only 86 miles from El Paso, while the latter half of the run was 192 miles in length, making a very unequal distribution of the distance between El Paso and Santa Rosa.

Under the contemplated arrangement, Carrizozo, marking the end of the first run, will be 144 miles from El Paso, while from Carrizozo to Santa Rosa, the end of the eastern division, will be 134, thus making the divisions almost exactly the same length.

Definite announcement as to the date when Carrizozo will officially become the new terminal, has not been made, but from all indications it will be just as soon as the facilities can be prepared for use.

SUN PREDICTS FIRE DEPARTMENT HELD IMPORTANT SESSION LAST EVENING

Chief Henkel Is Presented With Beautiful Token by City Friends.

Last night's meeting of the Bisbee Fire Department was one of the most enthusiastic sessions that that body has held for many months.

The matter of vast improvements proposed for some time to the end that Bisbee may have a better fire fighting machine consumed the greater part of the evening's work.

Estimates and plans, prepared by a committee from the department, Superintendent Sherman and Chief Engineer McBride, of the Copper Queen, were submitted and approved by the department. They will be presented by a committee from the fire department to the City Council at next Tuesday's meeting of that body.

The plans call for the installation of ten-inch mains throughout the city and the erection of a series of five 200,000-gallon tanks on one of the hills of the city for water storage to be used exclusively in case of fire.

The department further has prepared a petition to the City Council which also will be presented next Tuesday, asking that the Gamewell fire alarm system be installed in the fire house, horses and apparatus added to the present equipment, and provisions made for manning the house with resident members of the department rooms for whom will be furnished by the city. The city will not be asked for a paid department as yet, but the matter of such a provision in the near future at a time when the city is able to bear the expense, was gone over and will be taken before the Council.

The committee to whom this work was assigned is composed of George Buxton, J. E. Thompson and M. Newman.

The committee was instructed to take up with the council the cost of the proposed improvements and point out to the city fathers the statement made by J. E. Thompson and H. J. O'Reilly that fire insurance premiums would be cut at least in an amount represented by one-third of the proposed cost.

A fitting ending to the proceedings to the meeting came in the shape of a presentation to Chief Henkel of the department, of a beautifully engraved gold and silver trumpet, the gift of the people of Bisbee in appreciation of his faithful services rendered to the property owners of the city in the past.

Mr. Henkel responded feelingly to the presentation which was a complete surprise to him.

Chief Henkel has worked earnestly and ably in the interests of the property owners of Bisbee and notwithstanding the fact that he has been handicapped by the inefficiency of the

GERMAN ENGINEERS INDORSE BUILDINGS OF STEEL FRAME.

SAN FRANCISCO, July 26.—Three prominent German engineers and builders, Karl Eckermann, of Leipzig, and L. Von Frege and Joseph Stulz, of Berlin, have been studying the effects of the disaster, with the intention of making a report to several German scientific societies, especially concerned with building propositions.

"We have found," said Eckermann, "that your structural steel frame, or class A building, successfully withstood the shock and meets all requirements from the earthquake standpoint.

"In our report we shall so set forth the truth and clear away a lot of false impressions on that subject, now carried in Europe."

Secretary Root must assure the Rio conference that "hands across the border" are not reaching out for territory.

fire system, has never failed to check any fire that has over attacked the city. The property owners showed their full appreciation of his labors in last night's token. The trumpet was made to order in New York and is a gem of the engraver's and silversmith's art.

UNKNOWN ATTACKS MRS. HARTJE.

(Continued from Page 1.)

told him that Mrs. Hartje had declared to her that she was sorry she had returned to live with Hartje when he asked her to go back to him. At this statement Mrs. Hartje showed more astonishment than she has exhibited at any of the testimony hitherto.

In cross-examination, the letter which Ashby had written to Mrs. Hartje was placed in evidence. In it he told Mrs. Hartje that if she could "pay Blanche for speaking for her, Hartje could do the same." This took some of the wind out of the sails of the Hartje side, as all testimony on that point had been to the effect that Ashby had written that if Mrs. Hartje could pay Blanche for "lying," Hartje could afford to pay for the truth.

One of the closing events of the trial will be to show how, there and when the Madine love letters were secured. This, it was reported this afternoon, would be done tomorrow.

E. TINKER DIES AFTER LONG FIGHT FOR LIFE

E. Tinker, aged 23 years, son of Mr. and Mrs. H. B. Tinker of D avenue and Fifteenth street, died at his home last evening at 6 o'clock after a lingering illness of several years' duration. He had been very sick for a day or so previous to his death which did not come unexpected. Funeral services will be held this afternoon at the Christian church at 3 o'clock.

His parents, who have a store at the corner of Fifteenth street and D avenue, and a sister, who is a nurse at the Calumet hospital, survive the deceased. Mr. Tinker was a very bright young man who had an exceptionally large number of friends here, at Bisbee and at other cities where he lived. Formerly he taught a branch of the commercial department of the Bisbee public schools and later taught in the district schools of Cochise county.

HEAVY DOWNPOUR.

Bisbee was visited last evening shortly before midnight with a heavy downpour, accompanied by thunder and lightning. While the lightning appeared to strike in close proximity to the city, no damage is reported.
