

LOCAL-PERSONAL

Leaves for Summer.
Miss Baird, one of the popular grammar school teachers of Bisbee, left yesterday for Nogales, where she will visit for several days with friends and then go to Los Angeles to be the guest during the summer of her sister.

In From Valley.
Wm. Withrall, formerly well known timekeeper in the district, but now tending Sulphur Springs valley soil, is in town on business. He reports conditions in his section of the valley to be very satisfactory.

Is Recovering.
Miss Maud Johnson is recovering at her home from an operation recently performed at the Copper Queen hospital for the relief of throat troubles. Her friends hope to see her about soon.

Fever Unbroken.
Ole Olsen, well known salesman with Schwartz Bros. & Co., continued at the Copper Queen hospital in little changed condition. His fever was thought the latter part of last week to have run its course, but this week it was found to be incorrect. Yesterday it was said that while resting as easily as could be expected, his fever continued and early abatement was not looked for.

Goes to Coast.
Assistant Cashier Williams of the Bank of Bisbee left yesterday for a vacation at Los Angeles and beach points.

Teachers' Examination.
The regular quarterly examination for teacher's certificates will be held in Tombstone June 2nd and 3rd, in the office of county school superintendent. Applicants for certificates should be present promptly at 8:30 a. m. Paper, pen, ink, etc. will be supplied by the county superintendent.

Charley Moore Returning.
Charley Moore, for some years foreman with the Water company is expected to arrive this morning to assume his old position. Mr. Moore returns from Hutchinson, Kansas where his family remains until he determines whether climatic conditions will permit his continuing in the district. Mr. Moore was obliged to leave business because of a physical breakdown and upon his departure was not expected to make recovery. In his old home in Kansas however, he improved steadily and comes back greatly restored in health a fact that numerous friends will be pleased to learn.

Get in Cheap Car.
The Bisbee Auto company yesterday received a shipment of Metz cars. They are a small machine sold at around \$500. They have a 22 1/2 h. p. engine, four cylinders, and high tension friction drive.

Cattle Shipments.
A car of cattle from Phoenix was received yesterday by the Johnson Meat Co. A car of milk cows was received by Sam Medigovich and will be pastured on his ranch over the divide.

New Sewer Line.
The sanitary department is building a new sewer line on Youngblood hill. It will be 600 feet long and serve a dozen houses. Besides this line, new lines are contemplated on Opera Drive and Jones Hill. Survey for both have been made.

Health Campaign.
Active work continues in the sanitation campaign. Yesterday a supply of meat was condemned at a lunch stand and a number of premises inspected.

From Globe.
Dr. R. Ferguson, of the Copper Queen, returns today from Globe, where he attended the Arizona medical association meeting, being elected third vice president.

Must Have License.
The health board has announced that all persons in the district who sell milk must first procure a license. This is being done so that the board can keep an accurate tab on milk sold.

Hearing This Morning.
The five men held on charge of conspiracy to violate neutrality laws will appear for hearing at 10 this morning before U. S. Commissioner Taylor. The case will be conducted by Assistant U. S. Attorney T. O. Hickey.

Successful Dance.
At the Socialist dance Wednesday night there were upwards of seventy couples on the floor and a highly enjoyable time had by all attendants.

Returns to Stay.
Mr. and Mrs. D. J. Kennedy, late of Phoenix, have taken charge of the Boyle house at Upper Lowell. Mr. and Mrs. Kennedy were formerly of Bisbee. They are back to stay and the everybody else are enthusiastic over the Warren district and its splendid condition.

Smelter Reopens.
Strike troubles which for some time prevented the El Paso smelter except for ore shipments have been disposed of, at least to extent of permitting operation, and shipments are again being forwarded to the smelter on contracts. The fact has helped with activity at Courtland and in a number of smaller camps making production of custom on ores.

To Tell of Convention.
Miss Carolla Moore, secretary of the Y. W. C. A., announced yesterday that she would deliver an address next Monday afternoon at 3 o'clock at the Y. W. C. A. rooms in which she will relate the interesting details of the International Convention at Richmond, Va., to which she was a delegate. All interested in Y. W. C. A. work are invited to attend and will doubtless find the address interesting and profitable.

Big Picnic Program.
The program for the Eagles-Redmen picnic at Lewis Springs on Sunday, June 8, has been turned into the printer and will be issued probably the latter part of next week. The program is the most ambitious ever issued for a picnic event. About 100 events are on the bill and the promise of something doing every minute is abundantly made good.

Stock Is Going.
Judge S. W. McCall, well known as a stockman during many years in Arizona grazing country, was in the city yesterday from Sulphur Springs valley on business. Mr. McCall says that both cattle and horses are rapidly disappearing from the valley, making way for the farmers. Horses just now are particularly hard to get. Those who have them are holding on to the steadily rising market.

Taken Ill on Visit.
John McGeary, well known miner, left last night with his two daughters for Colorado, where they were summoned by a telegram announcing the serious illness of Mrs. McGeary with pneumonia. Mrs. McGeary has recently been at the former home of the family on a visit. The many friends of this estimable family in Bisbee hope that there may be early news of improvement in the sick woman's condition.

Arriving yesterday from their Michigan home, were the mother and sisters of Captain John C. Greenway, of the C. & A., who will visit at his home at Warren for a time.

W. H. Reno was a business visitor in town yesterday from Douglas.

W. H. McNeill of the 4 Bar ranch is among visitors in the city.

John Wishon and Scotty McCloud are in from their ranch in Sulphur Springs valley.

Miss Elizabeth Grenier, principal of Warren school, left yesterday afternoon for San Diego, where she will spend her vacation.

Dr. and Mrs. Chester A. Morris are in the city from the Huachuacs.

BENEFIT DANCE.
For Phelps Dodge Bull Team, Saturday, May 24th, Odd Fellows hall. Everybody invited.

Need Glasses? Call on Dr. Schell, optician of Tucson, today, at Copper Queen hotel.

ANONA CLUB BANQUET WAS BRILLIANT EVENT

Sixteen members and 14 guests sat down to a splendid banquet at the Copper Queen hotel last night. The affair was that of the Anona club, and it was one of the most brilliant and delightful in the history of this or any other social organization in the history of the district.

Adjournment was taken at 11:30, following the dinner and responses to a number of toasts. Those present concluded the occasion with unanimous expression of charm with it and of pleasure had.

TELEGRAPHY SCHOOL TO OPEN IN THE CITY

C. W. Ochs, Western Union manager, has concluded that with a sphere as useful as that in which he holds his job and the larger demand that is being made for others to come to Western Union service, it is a matter of doing justice to the community to offer facilities for the learning of telegraphy. In pursuance of this idea, Mr. Ochs announced yesterday that he would open night classes at the Y. M. C. A., beginning at once. Any person desiring to learn telegraphy can arrange to do so by seeing Mr. Ochs at either the Western Union office or the Y. M. C. A. Incidentally it may be said that Mr. Ochs is an expert in his profession and that those who may study under him will have the advantage of a skilled tutor as well as one familiar with openings in the business. At this time the latter are more numerous than in many years, by reason of the greatly increased demand that institution of wireless stations has made. Mr. Ochs gives instructions in the latter as well as in the general line.

FINISH FIGHT CHANCE-- QUESTION; WILL THEY?

Will the backers of Freeman and his enthusiastic friends get together and take advantage of opportunity to put the classy Bisbee middleweight through a fight program that the way is now open for at Naco, Sonora, at the "will of right folk"? The question is one that has been buzzing around the district the last week and is the liveliest local sport matter of interest.

It has been learned that a fight can be held at Naco, Sonora, whenever there is a program arranged by Bisbee sports. There is an enclosed corral there, surrounded by houses and affording fine amphitheater facilities, which can be had, in Bisbee fight circles this has been known the last week and there has been talk about it and enthusiasm in the word column, but no deeds.

Should matters take shape, a special train will probably be brought up from Douglas and a special run down from Bisbee. Between the two there is every reason to believe that presentation of a good program will gather to a crowd of several thousand people. Meantime it is up to the sport fans to get busy.

TODAY LAST DAY.
Dr. Schell, optician of Tucson will remain at Copper Queen hotel all day today. Call on him if you need glasses. Open until 8 this evening.

A Night Telegraph Class IS BEING STARTED AT THE Y. M. C. A. By G. W. OCHS, Manager Western Union Telegraph Co.

Since all vessels at sea are compelled to be equipped with wireless there has been an ever increasing demand for telegraphers. Railroads and the large telegraph companies are unable to get all the telegraph operators they need. Good positions with unlimited chances for promotion can be secured. Young men and young women will be enrolled in his class. For further information inquire of G. W. Ochs, Manager, Western Union Telegraph Co.

WINNIFRED GREENWOOD GETS STAGE FRIGHT

Altho' Winnifred Greenwood, one of the most popular leading women with Selig organization, was "born in a dressing room trunk" as the saying goes, and led her own stock organization for many years, playing hundreds of stage heroines during her successful career she has never forgotten how to blush and is still subject to stage fright. Two weeks ago she happened to be an innocent spectator at the Parkway Theatre, in Chicago, where the Selig pictorial was being shown. "Pauline Cushman" was the feature. Manager Neilson recognized her and led her reluctantly to the stage where she was introduced to the crowded house. There were vociferous calls for "speech, speech." This was something new to Miss Greenwood. All at once the heroine had three varieties of stage chill, including an attack of "tongue-tiedness." She finally managed, however, to stammer her thanks and then dodged a shower of bouquets, that adoring women in the audience heroically and impetuously sacrificed to honor the actress who so splendidly portrayed the heroine in the story which had earned the singular distinction of being made a "major" for gallantry in the great Civil war.

In addition to this greatest of all masterpieces "Pauline Cushman" the Lowell presents other corking good photo plays intermingling as they do, pathos, comedy and education. "Mine-Rescue work" is a most interesting subject and one that should prove highly interesting in this locality. "A Matter of Matrimony" is a corking good comedy from the Vitagraph company. "Jan Vedder's Daughters" is a splendid drama by the Edison company.

It seems a great pity that so great a program cannot be continued for more than two days as it will be impossible for all the Warren district people to attend in so limited a time. We would advise everyone to make arrangements to see this wonderful photo-play as they may never have the opportunity of seeing this greatest of all civil war dramas reproduced in any form. To much credit cannot be given the management of the Lowell for securing for its patrons such wonderful works as these. It appears that they are striving to out do all previous efforts on each and every program and as stated by the management, "Just as long as the public give us such generous patronage there is nothing too good for them in the moving picture world and I am here to tell you that I will get for my patrons the cream of all productions." Tonight is the last night of presentation of the Cushman pictures. Don't miss them.

COURTLAND MIGHT BE BETTER, BUT IS GOOD

W. G. McBride, formerly with the Copper Queen Engineering staff but now superintendent with the Great Western Copper Co. at Courtland, was a visitor in the city yesterday on business, returning to Courtland in the evening.

"Not quite as lively as we might like it, perhaps, but still moving along steadily," said Mr. McBride in response to query as to conditions at Courtland. "Shipping continues at about the same rate as for some time past and we fall to see discouragement on the horizon. Courtland is in fact looking very well and as in very good form all things considered."

NEW GAS FROM SMOKE, LATEST

Persons possessing expert knowledge of automobiles and chemicals much interested in an aspect of the fuel problem—now agitating the motor-car world—which was brought out by Henry L. Doherty recently, at a dinner in London. Mr. Doherty made the suggestion that some 12,000,000 gallons of benzol, a substitute for gasoline, which has made an excellent showing abroad, could be recovered from the "town gas" of London each year. By this we mean that the process of "scrubbing" the gas, that is, separating it from oily constituents and other impurities, the benzol could be obtained. In the production of ordinary illuminating gas there is scrubbing, but to obtain the great amount of benzol which Mr. Doherty suggested the process would have to be carried much farther than at present, according to expert opinion obtained yesterday. To prove enough material from gas to produce the amount of benzol proportionately which Mr. Doherty figures call for would be

For Women Only

We say—"women only" because we realize that to women is generally conceded greater refinement, taste and delicacy than to gentlemen. We are sure that every woman will be particularly pleased with our

Cream Supreme

For the many uses to which cold cream is put Cream Supreme will fill every requirement. Every girl, intelligent who enters into its manufacture is selected for its high quality and purity. Cream Supreme keeps indefinitely. It is fine as a clean-up after exposure to wind and dust. It is elegant as an application for chapped hands. For its softening and soothing properties it is without an equal. The woman of discernment will not be denied such a toilet necessity as Cream Supreme when once she has used it. Per jar—25c.

to rob Peter to pay Paul, it was said would increase the supply of benzol; but would impoverish the gas in other words.

William H. Cradley, chief engineer of the Consolidated Gas Company, said that Mr. Doherty's figures were too high, even for London, where more coal gas as compared with water gas was used in New York.

"It is well enough to talk of obtaining benzol from coke ovens, he said, but to take much more of it from illuminating gas, such as we use here, would be to rob the gas of much of its luminous quality and some of its heating value. Moreover, the figures for London's possible benzol production is not correct, according to my estimate. London's annual output is some 25,000,000 cubic feet of gas. This would hardly yield more than 5,000,000 gallons of benzol. The normal yield of benzol would not be much in excess of one-tenth of a gallon for each 1,000 cubic feet. From heating gas somewhat more might be taken, and from coke ovens there is no doubt that much benzol could be derived. But to derive benzol for motor fuel from illuminating gas, as is ordinarily used in cities, would not be an attractive economic proposition with one-tenth of a gallon from a thousand cubic feet of gas and at 80 cents or 91 per thousand feet."

Carleton, Ellis of Montclair, N. J. put the case somewhat differently, although in the main his views coincided with those of Mr. Bradley. "Under present methods," he said, "not much more than 3,000,000 to 4,000,000 gallons of benzol could be produced from the illuminating gas of this country annually. This amount can be produced without affecting the luminous qualities of the gas. Much more could be obtained, of course, if the luminosity were lowered, and this is entirely practical; the gas could still be used for lighting, but not as an ordinary flame. A mantle would be necessary, since much of the yellow color would have been taken from the flame. By more or less of revolution in gas lighting methods a quantity of benzol would undoubtedly become available."

"There is one line along which I believe Mr. Doherty's suggestion might bear fruit, and I am sure I will welcome it if he does. I refer to the drawing of a sharp distinction between the manufacture of illuminating and heating gases. We now manufacture a vast quantity of gas and enrich it for lighting but use much of it for heating; a form in which it does not need this enrichment. This is a good idea. By the further removal of benzol from the gas existing quantities might be reduced from say, 600 as expressed in thermal units per cubic foot—the normal figure for city gas to perhaps 450. The gas would still be useful for heating, however."

Mr. Mills is not of those who be-

Before You Start On Your Journey See The New Line Of Suit Cases And Bags We Are Showing

We wish to call particular attention to our big assortment of styles in all the new model suit cases and bags which we are showing this season. We have among this big variety a number of suit cases that it would be well for you to consider. This special line ranges in price from \$6 to \$10.00

Priced From \$2.50 And Up

For Summer Comfort Wear B. V. D. Underwear--Light, Airy & Cool

It's rather a pleasant anticipation to know that during the hot summer months you can be perfectly cool and comfortable. And so you can if you will but wear B. V. D. underwear. These garments are made of soft nainsook Egyptian plaid and fine soisette. They are light, loose and airy. Shirts cut coat style. No sleeves and knee length drawers. We also have the Union Suits in nainsook or Egyptian Plaid. Your size is now in stock, so come and get it today.

FRECKLE-FACE

Sun and Wind Bring Out Ugly Spots. How to Remove Easily.

Here's a chance, Miss Freckle-face, to try a remedy for freckles with the guarantee of a reliable dealer that it will not cost you a penny unless it removes the freckles, while if it does give you a clear complexion the expense is trifling. Simply get an ounce of othine—double strength from Central Pharmacy and a few applications should show you how easy it is to rid yourself of the homely freckles and get a beautiful complexion. Rarely is more than one ounce needed for the worst case. Be sure to ask the druggist for the double strength othine as this is the prescription sold under guarantee of money back if it fails to remove freckles.

London advices say that the failure of the Brazilian loan of 11,000,000 was due to the fact that the Rothschilds counted too much upon their own prestige.

The Safe Place

During the rushing hours of business, you'll find foot comfort in this Panama.

The Panama model just about meets the ideas of a good many men as to what a shoe should be.

The high, rounded toe certainly does mean comfort to a superior degree and the "rocker" or spring sole makes for easy walking and also prevents the leather over the toes from wrinkling deeply and causing blisters.

The Panama has a handsomely modeled broad toe and a high arch and heel.
