

A Copper Mine--Not a Prospect

One Dollar Per Share **Pinal Development Company** *One Dollar Per Share*

SUBSCRIPTION BOOKS OPEN MONDAY, JUNE 19, 1916

Only a limited amount of stock will be sold. Books will be closed without notice

LOCATION OF PROPERTY

The property is the well known Renfro group of mining claims consisting of 43 claims, or an area of about 860 acres, and is located in Ray, Arizona, the great mineral belt, and is near such big producers as Ray Consolidated Copper Co., Globe, Miami, Superior and other big dividend payers. This property is four miles from the Arizona & Eastern R. R., and fifteen miles from the smelter of the American Smelting & Refining Co. at Hayden, and the ore can be mined at an exceptionally low cost per ton.

The Pinal Development Company is a copper mine that has already passed the prospect stage. Development work is down to approximately 1180 feet. The main tunnel is now opposite the ore zone. High grade ore has been cut with intermediate tunnels, and shipment to the smelter will shortly begin.

Considering the Price of this Stock, it is Absolutely the Best Investment in Arizona Today. Fortunes Are Made Not Saved. A Lifetime of Saving Will Not Make As Much as One Good Investment

ECONOMICAL MANAGEMENT

The management of the property is in the hands of very capable and efficient mining men. J. C. Devine is president and manager and C. T. Carpenter is secretary. Mr. Devine is one of the best known mining men in the district and was for a number of years assistant superintendent of the Ray Consolidated Copper Co., which position he recently resigned to devote all of his time and attention to the Pinal Development Co's property, thereby assuring the stockholders of economic management.
