

MOBILIZED ARMY BIGGEST COST OF HOLLAND IN WAR

Over 370,000 Men Kept on Front by Little Neutral Country, as Cost of Remaining at Peace

THE HAGUE, Netherlands.—(Correspondence of The Associated Press)—Interesting information as to what has been accomplished in preparing

the Dutch army for modern warfare in the twenty-three months during which it has now been on a war footing was contained in a statement presented to Parliament by the Minister of War, Major-General N. Bosboom, when he asked for a fresh appropriation of \$10,000,000 to cover mobilization expenses.

Even a partial demobilization is still out of the question, according to the War Minister.

Answering the question whether the Dutch army was adequately prepared for war and whether the material and equipment fulfill modern requirements, he said that although it was inadvisable to make public information which might benefit a pos-

Charles E. Townsend.

In a recent speech Senator Townsend of Michigan declared that the mobilization of the national guard was ordered for political purposes only. Townsend is a Republican.

able enemy, there was no doubt the Dutch soldiers could face the prospect of war with confidence.

In August, 1914, the material and equipment left much to be desired. The workshops of the kingdom were not ready for mass production. These shops have to be enlarged and a hundred factories have been equipped for the production of war material. There is a great supply of hand grenades, in the use of which the troops have been trained. Gas masks, steel helmets, modern engineering material, trench shields, barbed wire, and protective material have been made in large quantities.

Searchlights for coast defense, land positions, and field troops have been increased. Automobile stations for wireless telegraphy have been formed. The army has at its disposal a great number of motor lorries for the transport of troops and wounded. The number of aeroplanes has been largely increased. These are provided with bombs, machine guns and quickfiring and, as regards speed and raising power, they have been brought up to the standard prevailing abroad. Private industry has cooperated in the building of new aeroplanes, although Holland remains dependent on foreign countries for motors.

As regards the medical service the reserve hospital accommodation has been increased by arrangements with 150 civilian nursing institutions. Moreover, an institute of military dentists has been established. Vaccination against smallpox, typhus and meningitis is being carried out.

An unfavorable comment on the relations between commanders and men in the Dutch army is the fact, now made known, that many thousands of soldiers persisted in going on furlough at Easter, when leave was refused to them owing to the special circumstances that made the position dangerous for Holland. Severe punishment has been meted out to the men concerned. Incidentally the Minister mentioned that there were 52 suicides in the army at the beginning of mobilization.

No special announcement is made regarding the number of trained men which the country now possesses, but former Minister of War, Mr. H. Colyn
