Iowa democrats have committed themselves to free and unlimited coinage of silver. Let the good work go on.

Great Heavens! Can it be possible? Cleveland has stated positively that he will not be a candidate for a third term.

It is said that the cruiser Olympias appears to be top heavy. This is possibly caused by the swelled heads of her new officers.

Memphis is a large city but it had to encroach on its suburbs to accommodate the crowd that attended the free coinage convention last week.

Harlem Canal, the great ship waterway connecting all the great lakes with the Atlantic Ocean was opened with a grand naval display on Monday last.

Only by remonetization can our grand and noble yeoman rise from the dust in to which they have been cast by the weigh'y hand of the gold bug plutocracy.

Ex-Governor Boice, of Iowa, has come out unqualifiedly for the free and unlimited coinage of silver, without waiting for the consent of other nations.

The only Grover has gone to Buzzard's Roost where he will have a bulkhead put in the back of his neck to keep his brains from slipping down into the call of his legs.

The Express says that some youthful minds in Los Angeles need a broad eisted slipper. Either the Express is mistaken or the youthful minds are not in the right place.

Ohio will present this year one of the prettiest little fights for governor that has ever been witnessed in the Buckeye state. The issue will be fought on the lines of silver and gold or on the single gold standard.

Wilburforce University, the oldest negro educational institution, the other day conferred the degree of LL. D. on pre-ident Cleveland, but the president declined the honor. There is no metallic ring in LL. D.

Spain is realizing the fact that there is a revolution in Cuba and proposes to crush it at one fell swoop. Twenty-five thousand troops will be sent to the island to eat up the revolutionists who are now taking snap shots at the government troops.

Now New York democrats are considering the advisability of passing their opinion on the currency question. Of course, we cannot expect them to see the matter in the light of independent action by this country on the silver question, but will try to pull the wool over the eyes of the voter by an international proposition.

Marion Butler, senator from South Carolina, at the Memphis convention said that he was a populist, but that if the democrats of the west carried the national convention next year every man who loved his country would be found rallying to its support. This is the right kind of talk. Let no party stand in the way of our great interest.

Grover Cleveland, by the grace of the people of the United States, president, has fired bodily from the Auditor's office of the Navy department one C. B. Morton. Mr. Morton's offense was that of having written uncomplimentary things of the president. No one need apply to Grover for office who is not heart and soul bound up in his excellency The Fat.

Next week we will give a map of the United States showing the effect of one year of the gold standard. The article is from the Atlanta Constitution, one of the ablest exponents of the silver cause in the United States. Read the article carefully on its appearance and send it to your friends in the east that they may learn the lesson taught.

The mint should stand on both metals.—Thomas Jefferson.
I am certainly of the opinion that gold and silver, at rates fixed by Congress, constitute the legal standard of value in this country; and neither Congress nor any State has authority to establish any other standard, or to displace this standard.—Daniel Webster.

To annul the use of either of the metals as money is to abridge the quantity of circulating medium, and is liable to all the objections which arise from a comparison of the benefits of a full, with the evils of a scanty circulation.—Alexander Hamilton.

The Los Angeles Herald says that if W. J. Bryan would keep his reputation he will keep clear of the merciless logic of John G. Carlisle. The Herald editor clearly does not read the press reports or he would have noted the fact that Carlisle has crawled into the hole he has made in the treasury sack to keep out of the way of the brilliant Nebraskan. Carlisle's "merciless logic" consists in selling government bonds worth \$1 24 at 1 03 3/4. His merciless logic is the baseless fringe of a dream.

Irish Americans throughout the country are preparing for an active campaign against England. They propose to free Ireland by force of arms if necessary. If they only succeed in killing off a few hundred of the money changers of London they will have accomplished a world of good.

"New" Preacher Now.

Now we have the "new preacher," for as the old-fashioned women have passed away, so also have the antique clergymen, who formerly talked about the golden seats in heaven and the roaring fires of an eternal hell. One of the new preachers in this end of the universe is the Rev. Frank E. Mason, of Brooklyn. At the First Church of Christ the other night, Dr. Mason spoke in answer to the question, "Is there a hell?" and this is what he said: "Yes, if you make one. There is no local hell. Hell and heaven are conditions of mind, not locations. Hell is the abridgement of power. It is the shriveling of the mind. Man carries his own brimstone in the pocket of his thought. It is set on fire by the friction of negative ideas. The pessimist relegates his heaven to futurity. The optimist enjoys it on earth. The one who is continually singing, 'Earth is a desert drear, heaven is my home,' lives in perpetual hell. He is suffering from ecclesiastical dyspepsia. He has eaten the forbidden apple and can not digest it."

Notice.

All those indebted to the late firm of Crozier & Mackenzie are requested to settle their accounts immediately with the undersigned. All unsettled bills will be placed in the hands of attorneys on and after January 1st, 1895.
SAM'L CROZIER.
Kingman, Dec. 10, 1894.

Health Broken

Bad Cough—Weak and Thin—After the Grip

Took Hood's Sarsaparilla and Now Feels Well.

Mr. J. C. McCabe, of Chama, New Mexico, is a well known locomotive engineer. He is a member of the Sierra Blanca, Div. No. 209, Brotherhood of Locomotive Engineers. His occupation being such as to expose him in all kinds of weather, he was an easy prey for the grip, followed by a severe cough. He fell off in strength and weight as well as in flesh, and in fact was feeling miserable. He took Hood's Sarsaparilla, and what it has done for him is told in his own words: "C. I. Hood & Co., Lowell, Mass.: "Last November I was seized with the grip and for some time lay around with a severe cough. I was unable to follow my occupation, that of locomotive engineer. I was prevailed upon to try Hood's Sarsaparilla, and since taking the medicine, I have gained in weight and I also

Feel Splendid. Out of one-half dozen bottles, I have taken four, and it has benefited me greatly. I can highly recommend Hood's Sarsaparilla. Several of my neighbors are now taking the medicine and speak favorably of it." J. C. MCCABE, Chama, N. M.

Hood's Sarsaparilla Cures
Hood's Pills are hand-made, and perfect in proportion and appearance. 25c. per box.

An Automatic Typesetter.

A new typesetting machine, called the Plectrotype, for which wonderful qualities are claimed, is announced from Berlin. Its operations are automatic, the copy being fed into it in the form of a specially prepared slip of paper. A small electric motor drives each machine, which easily turns out 20,000 ems an hour. An ordinary compositor seldom sets more than one-tenth of this amount. A single boy can attend to several of these machines at once, as his duties are merely supervisory. Not only does the strip operate the keys of the machine, but the spacing is also done automatically, so that the lines come out exactly even, or justly, as a printer would say, without manual labor. The type, after being used, is distributed automatically. Copy for the plectrotype is prepared on a typewriter, which punches in the paper holes something like those required by the Wheatstone and other automatic systems of telegraphy; and corrections may be made in the matter by the editor before it goes to the machine. However, this punching of a tape is handwork, and can hardly be performed any more rapidly than the operation of one of Mergenthaler's linotypes by an expert. In both cases there is the same limitation—a human operator's skill at a keyboard. The Mergenthaler machine (an American invention) casts a line of type from little brass moulds, which are assembled by touching the keys; the new German apparatus sets old-fashioned type. It is claimed, however, that the latter machine will handle all of the ordinary sizes of type equally well, while a Mergenthaler is specially manufactured to mould brevier, minion, nonpareil or agate, and separate machines are therefore required for the various styles.

While in Topeka last March, E. T. Barber, a prominent newspaper man of La Cygne, Kan., was taken with cholera morbus very severely. The night clerk at the hotel where he was stopping happened to have a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy and gave him three doses which relieved him and he thinks saved his life. Every family should keep this remedy in their home at all times. No one can tell how soon it may be needed. It costs but a trifle and may be the means of saving much suffering and perhaps the life of some member of the family. 25 and 50 cent bottles for sale by H. H. Watkins, Druggist.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease, and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease, and, therefore, requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from ten drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials. Address, F. J. CHENEY & CO., Toledo, O. Sold by druggists, 75c.

Notice to Our Customers.

When sending orders intended for us be sure and write the address Gaddis & Perry. Mail sent to Gaddis & Co. goes to another firm, although intended for us. Bear in mind our firm name is GADDIS & PERRY.

Notice.

Notice is hereby given that neither the Ora Plato or Mariposa mines, nor the owner thereof, will be responsible for any debts contracted by the lessees thereon in working said mines.
