A report comes from Prescott that the wets are preparing a petition to the legislature praying that the operation of the prohibition measure be held up until 1916, to allow all in the business time to get out without loss. This is reasonable, but it is thought that the law will be held up by the courts, on account of the variance of the enacting clause of the measure with the constitution of the State. The constitution says that an amendment to the constitution shall become law on the proclamation of the governor and not otherwise, while the amendment says that "This amendment shall take effect on, and be in force on and after the first day of January, 1915." The amendment cannot change the constitution that makes possible the amendment. But on the other hand such an attempt to have this amendment become effective at a later date than contemplated by the governor's proclamation, must be incorporated in the body of the amendment itself, and not otherwise. This is indicated in Article IV, sec. 5, of the Constitution of the State of Arizona.

Last Monday U. S. Marshal J. P. Dillon arrived in Kingman and during the day sold at execution sale the property of the Exterprise Mining, Reduction and Improvement company to Ralph A. George, of San Diego, who held judgment in the sum of more than 20,000\$ against the company, and with the interest and costs added brought 23,575\$. The suit was brought in the United States Court, before Judge Sawtelle, the plaintiff, George, being a citizen of another state. The Exterprise mine is situated about eighteen miles east of Kingman and for many years was under the management of W. A. Mensel, now living in Pasadena, Cal.

An indication of the importance of Kingman is recognized in the erection here of big oil tanks by the Standard Oil and Union Oil companies. These concerns sell an immense amount of oil in this county, Kingman being the distributing point.

Allen E. Ware, manager for Tarr & McComb and one of Kingman's most prominent business men, was over at Oatman this week. Mr. Ware and Mr. Chas. Granger went over Wednesday with Mr. Chas. Grimes, president of the Tom Reed mine.

Charles Ridenour, the well known merchant of Hackberry, was a Kingman visitor Wednesday last, coming to the county seat on business connected with the business of W. L. Kayser & Co., of which he is a member.

A little child of J. A. Carrow, reported to be ill with scarlet fever, is reported to be getting along nicely, and that while symptoms of that disease was apparent it did not develop.

Dr. W. H. Bucher went over to Oatman Wednesday last, where he performed several minor operations on ailing residents of the big gold camp.

Superintendent P. C. McDonald, of the Telluride Mining, Milling and Development company, was over from Oatman Friday.

Gore, Ga., P. A. Morgan had occasion recently to use a liver medicine and says of Foley Cathartic Tablets: "They thoroughly cleansed my system and I felt like a new man—light and free. They are the best medicine I have ever taken for constipation. They keep the stomach sweet, liver active, bowels regular." Foley Cathartic Tablets are stimulating in action, and neither gripe nor sicken. They are wholesome and thoroughly cleansing, and keep the liver active. Stout people like them. H. H. Watkins druggist.

Robert Meara Killed.

Last Thursday morning Robert Meara fell from his wagon, about eight miles from Fort Mohave and was instantly killed. He and J. B. Wilson were loading timbers on the running gear of the wagon and were engaged in tying the lumber on when Meara lost his footing and fell to the ground on his head. Wilson, who was on the wagon, but with his back turned to Meara, heard him cry out and turned in time to clutch him with his left hand and fell to the ground with him. Meara was unconscious when Wilson tried to raise him up, and although he worked over him for some time he was unable to bring him to. Seeing that he could do nothing by himself he got one of the horses and rode to the Fort, where he obtained the services of Dr. Merriwether and went back to the place where Meara lay. The doctor found that Meara was dead and had probably been instantly killed. Coroner Smith was notified and in company of Under Sheriff Foster and undertaker C. R. Van Marter left Kingman early yesterday morning for Fort Mohave, where the remains had been brought from the place of death.

An inquest was held and the jury returned a verdict of accidental death. The body was brought to Kingman and is being held here until friends can be communicated with before burial.

Robert Meara has been a resident of Mohave county about forty years. During that time he had engaged in cattle raising and mining, and at the time of his death was improving lands on the Colorado river for the purpose of engaging in farming. In this he had entered into partnership with J. B. Wilson, who was with him at the time of his death. He had many friends through the hills that will regret his untimely death. He was aged about seventy years.

All Officers Re-elected.

Yesterday the stockholders of the Telluride Mining Milling and Development Company held their annual meeting in Kingman. The old officers were all re-elected, the stockholders being perfectly satisfied that they were conducting the affairs of the corporation in an efficient and conservative manner. As the company now stands the officers are: J. E. Rose, president; Wm. Mattie, vice-president; N. E. Scott, secretary and treasurer; P. C. McDonald, superintendent. Directors F. A. MacNull, Wm. Mattie, P. C. McDonald, N. E. Scott and J. E. Rose. This company owns a very valuable property in the Tom Reed section, and considerable development work has been under the efficient management of Superintendent McDonald.

Rich Molybdenum Ore.

Great development is now taking place at the Whale mine, under the efficient management of R. C. Jacobson. There are 1500 tons of ore in sight which will average 62\$ per ton and the saving of only 54 per cent of the molybdenum in the ore. It is believed that quite an additional saving can be made by a method now under consideration. The Whale is certainly good property and it is probable that there will be quite an output at an early date. This property is situated a short distance only from Yuca, the nearest railroad point, which gives adequate transportation facilities.

John Hart, a well known miner of the Cerbat section, died last Thursday morning at the Kingman Hospital from a complication of diseases. He had been operated on for appendicitis several days prior to his death in the hope that his life would be saved, but the ravages of the disease had done its work too well. Deceased was a warm hearted fellow and had many friends throughout the mining camps of the county. He was a member of the local lodges of Odd Fellows and Moose, under the auspices of which orders he will be buried this afternoon.

Your Cold is Dangerous Break it Up—Now

A Cold is readily catching. A run-down system is susceptible to Germs. You owe it to yourself and to others of your household to fight the Germs at once. Dr. Bell's Pine-Tar-Honey is fine for Colds and Coughs. It loosens the Mucous, stops the Cough and soothes the Lungs. It's guaranteed. Only 25c. at your Druggist.

Operations in Cuprite District.

A Goldfield, Nev., dispatch says: Work was started last week on the Jupiter property, in the Cuprite district, 14 miles south of Goldfield, where Manager W. S. Evans has lately completed the erection of necessary buildings for an extended campaign of development. It is the intention of the management to sink without interruption to a depth of 500 feet and to prospect the surrounding territory by laterals from the 200-foot level downward. Ore of high grade, many of the samples assaying over 100\$ per ton, has been found in seams appearing at the surface, and the property is traversed by strong and highly mineralized veins. Surface conditions here are pronounced to be identical with those of the Bisbee, Ariz., district.

On the Kurigen-Smith-Evans property, which has been under process of development for some time past and in which ore of shipping grade has been exposed on the 180-foot level, preparations are being made to sink the main shaft another lift of 100 feet and to prospect the ground at this depth. The property was examined recently by a prominent mining engineer and geologist, who stated in his report that there was good promise of finding deposits of pay ore in considerable volume at greater depth, at or below the permanent water level, which is estimated to be at a depth of from 200 to 250 feet.

Mr. Evans has just sent out a load of supplies for the two camps and is having mine timbers hauled to the Kurigen-Smith-Evans property with which to timber the shaft another 100 feet. Sinking on both properties will proceed with all possible dispatch and development will be conducted on a comprehensive scale, as all the men interested are confident of success.

One of the saddest events that Kingman has witnessed in many years was the death of little Eva May Lasley, aged between eleven and twelve years. The mother is in the hospital very ill with typhoid fever, while two brothers are being cared for at home with the same dread ailment. The little one was given all the care that medical skill and scientific nursing could give, but after nearly a month of suffering the Death Angel called and took her spirit to the beyond. The family had just come here from Los Angeles. The mother and two boys are still in a precarious condition. The funeral of the little girl took place from the Kingman Undertaking rooms Thursday afternoon, quite a number of neighbors and friends following the remains to the grave.

Tom McNeely, owner of excellent mining property in the Mineral Park section, visited with his family in Kingman this week.

Keep It Handy for Rheumatism.

No use to squirm and wince and try to wear out your Rheumatism. It will wear you out instead. Apply some Sloan's Liniment. Need not rub it in—just let it penetrate all through the affected parts, relieve the soreness and draw the pain. You get ease at once and feel so much better you want to go right out and tell other sufferers about Sloan's. Get a bottle of Sloan's Liniment for 25 cents of any druggist and have it in the house—against Colds, Sore and Swollen Joints, Lumbago, Sciatica, and like ailments. Your money back if not satisfied, but it does give almost instant relief. Buy a bottle today.

Advertised Letters

The following letters remain uncalled for in the Postoffice at Kingman, Ariz., for the week ending Dec. 5, 1914. If not called for within two weeks will be sent to the Dead Letter office, Washington, D. C.

Felix Pacheco Melomio, Mrs. R. S. Teeple, Fred Jackson, Mrs. Mabelle Johnson, Kid Allen.

Parties calling for letters please say advertised.

Several of the big mining companies are having statistics prepared showing the name and the nationality of all of the men at the present time upon their pay rolls. It is understood that this action is being taken as a result of the recent adoption by the voters of Arizona of the so-called 80 per cent law.

At several of the mines men are at present going through the offices and plants taking down the names and nationalities of the employees. The lists are being very carefully prepared and checked up in order that no mistakes may be made.—Miami Silver Belt.

Prompt Action Will Stop Your Cough.

When you first catch a Cold (often indicated by a sneeze or cough), break it up at once. The idea that "It does not matter" often leads to serious complications. The remedy which immediately and easily penetrates the lining of the throat is the kind demanded. Dr. King's New Discovery soothes the irritation, loosens the phlegm. You feel better at once. "It seemed to reach the very spot of my Cough" is one of many honest testimonials. 50c. at your Druggist.

Notice to Creditors.

Estate of JOSEPH A. CARROW, deceased. Notice is hereby given by the undersigned, Administrator of the estate of Joseph A. Carrow, deceased, to the creditors of and all persons having claims against the said deceased, to exhibit them with the necessary vouchers, within four months after the first publication of this notice to the said Administrator at Kingman, Arizona, the same being the place for the transaction of the business of said estate, in said County of Mohave.

S. D. STEWART,

Administrator of the estate of said deceased. Dated this 27th day of October, 1914. First insertion Oct. 31-28 Nov.

The shaft of the Hackberry mine has reached the vein, but owing to the inrush of water nothing has yet been ascertained as to what the character of the vein is at that point. It is said that the flow of water is now under control and that within a short time the level will be exploited.

Although the United States refines more nickel than any other country, practically all the ore used comes from Ontario and New Caledonia. It is there reduced to matte, according to the United States Geological Survey, and then shipped to this country for further reduction to metal. The only domestic nickel produced is a small quantity obtained from blister copper as a by-product in electrolytic refining, and even this small quantity is so mixed as to source that what part of it is of domestic origin and what part is of foreign origin can not be determined.

Sick Headache.

Sick headache is nearly always caused by disorders of the stomach. Correct them and the periodic attacks of sick headache will disappear. Mrs John Bishop of Roseville, Oh'o, writes: "About a year ago I was troubled with indigestion and had sick headache that lasted for two or three days at a time. I doctored and tried a number of remedies but nothing helped me until during one of those sick spells a friend advised me to take Chamberlain's Tablets. This medicine relieved me in a short time." For sale by all dealers.
