He Served the Papers.

Deputy Sheriff H. B. Abila returned Sunday from the Castac country, where he had been for several days serving papers in the case of the people against Chornicle and Gardner, who are to be tried next Monday on the charge of murder. This is the second trip Mr. Abila has made for this purpose. He says the rains of last winter played the mischief all along the valley of the Santa Clara river. The railroad company has 300 Chinese at work repairing the damage on their line. In dozens of places the stream changed its course, cutting a new channel and carrying away all obstacles in its course. At the Camulos ranch the Del Valles lost eighteen acres of excellent land, much of it planted to vineyard and orchard.

During his trip Mr. Abila was fortunate in being an esteemed personal friend of the host of the Camulos ranch, where he visited, and was treated in that princely hospitable style for which that place is noted among all who are so happy as to have the entree.

CATARRH, THROAT DISEASES, ASTHMA, BRONCHITIS AND CONSUMPTION, TOGETHER WITH DISEASES OF THE EYE, EAR AND HEART, SUCCESSFULLY TREATED BY

M. HILTON WILLIAMS, M.D. M. C. P. S. O.

By His Hot Air Medicated Inhalations and his COMPOUND OXYGEN TREATMENT.

ASTHMA

It is a common error to suppose every disease which is attended by oppressed breathing to be Asthma or Phthisis. We have shortness of breath in Consumption and Pneumonia just as we do in Asthma, only that in these diseases it is always present, whereas in Asthma it occurs in paroxysms.

Asthma is a spasmodic disease of the lungs, which manifests itself in periodic attacks or "fits." It comes on suddenly and is attended with great difficulty of breathing while it lasts, but when the attack is over the patient breathes almost as well as in health.

Nervous Humid and Dry Asthma are names given to different forms of this disease. Emphysema is another and more inveterate kind of Asthma, while Hay Fever or Rose Cold is a peculiar variety of Asthma which occurs at certain seasons of the year. Each of these forms of disease differs somewhat from the others in symptoms, but practically these distinctions are of very little value. It does not matter to the patient which form of Asthma he has, since his sufferings are the same in all. In one case the expectoration becomes yellow, and we call it bronchial. In another it is light, and we call it dry. When he coughs up clear water, with a white froth on the surface, we say he has Humoral Asthma. In Nervous Asthma there is very little expectoration of any kind. Hay Fever always begins as a crying cold in the head or influenza, and a clear water runs from the nose and the eyes before the Asthma fit comes on. In Emphysema the expectoration is generally thick, and continues so in the interval between the fits, while the shortness of breath is increased on the slightest exertion.

Without courage and perseverance nothing is curable. But with the steady use of proper and skillful treatment, Asthma can be cured even after the lungs are extensively diseased.

Persons desiring to be treated by this system of practice can use the remedies at home as well as at our office, and which will cause no inconvenience or hindrance from business whatever. Every case of Asthma is curable. Eastern visitors and invalids will be wise in being cured before they return home.

Those who desire to consult with me in regard to their cases had better call at the office for an examination, but if impossible to visit the office personally can write a list of questions and circular, both of which will be sent free of charge. Address

The Natick House.

NEW MANAGEMENT.

The Natick House, one of the oldest and best known hotels in the city, has lately changed hands. M. S. Rowell has retired from the management, and the House will hereafter be conducted by Mr. H. A. Hart, a Hotel man of experience. Mr. Hart has already made a number of changes which will prove of benefit to his patrons, and adds very much to the convenience and comforts of the House. The Table and Dining Service especially has been greatly improved.

During the past few weeks the Natick has been in the hands of the painters and decorators. A commodious office is one of its good features. Electric Bells with return call and Fire Alarm have also been added, and altogether the House is in better condition than ever before for doing business.
