A butcher named W. C. Baker called at the police station yesterday afternoon for medical treatment, the fingers of his left hand having been almost cut off by an accidental cut with a cleaver, while chopping a piece of meat. His wound was attended by the police surgeon.

P. Ballade, the well-known French saloonman, was arrested by Detective Bosqui yesterday afternoon on a warrant issued by Justice Owens, charging him with having violated the Sunday closing ordinance. He was, however, released from custody upon depositing bail to ensure his appearance in the police court today.

Tumble Weeds Stopped the Train. Probably most of the readers of the Oregonian have seen or heard of the tumble weed, but for the benefit of any who have not it may be said that it is a bushy plant, growing eighteen inches to two feet in height, having a small root and the branches all curving inward at the top, giving the full-grown weed a globular shape. These weeds grow and flourish on summer-fallowed lands, in parts of Eastern Oregon, and especially along the line of the Oregon and Washington Territory railroad between Hunt's Junction and Pendleton. In the fall, when the summer-fallow is seeded, the harrows tear up these weeds, but as they are tough and wiry and are not broken up much, they lie around on the fields like balls. The first wind starts the balls rolling, and away they go for the first fence or railroad cut. The line above mentioned is not fenced, and a short time ago these weeds piled into the cuts on it about Helix, in some places as high as the height of the engine, and on account of their being crushed under the wheels and "greasing" the track they held a train loaded with stock all night on the line. A gentleman who was on the train says that the weeds coming skipping over the banks into a cut in the dusk of the evening looked for all the world like a band of sheep following their leader into the cut.—Portland Oregonian.

CATARRH, Throat Diseases, Asthma, Bronchitis and Consumption Successfully treated by M. HILTON WILLIAMS, M. D. M. C., P. S. O., 137 S. Broadway, Los Angeles, Cal.

By his Aescra system of practice, which consists of proper Medicinal Inhalations and COMPOUND OXYGEN TREATMENT. Probably no system of practice ever employed has been so universally successful as the Aescra system of practice as introduced by Dr. Williams for the cure of Catarrh, Throat Diseases, Asthma and Consumption.

Catarrh is often regarded by the patient as a cold in the head, and he often expresses his astonishment at his remarkable tendency to contract fresh colds. Indeed he declares that he is scarcely free from one cold before he takes another, and he is always exceedingly careful; it is also a matter of surprise to him that the cold always seems to settle in the head and throat.

At times many of the symptoms of catarrh seem to abate, and the patient is led to hope that the disease is about to wear off; but another class of symptoms soon appear and he returns to his horror, that instead of recovery from the disease, it is somewhat changed in its character and has extended to the throat. A sense of weariness is sometimes felt in reading, speaking or singing; hoarseness at times occurs, a sensation of dryness is felt in the throat, or it appears that some foreign substance, as, for instance, a hair, obstructed the throat; there becomes a sense of languor and fatigues; the breath becomes a little exertion, a short, hacking cough, a peculiar sound in clearing the throat, a feeling as though there was much room to settle in the chest to breathe; these and other symptoms occur after the disease has made considerable progress. Then it is a time when consumption is about to begin its dreadful work. Up to this time the progress of the disease may have been slow and the patient may in expressing his confidence hope that it will "wear off," declare that he has had the catarrh for years and has not seemed to become much worse, and trusts that he will "by and by" recover. But this delusion is the grand error which has peopled our cemeteries with consumptive forms, as all forms of catarrh end finally in consumption.

Consultation and one application at the office. Those who desire to consult me in regard to their cases had better call at the office for an examination, but if impossible to visit the office personally, can write for list of questions and circular, both of which will be sent free of charge. Address M. HILTON WILLIAMS, M. D., 137 S. Broadway, Los Angeles, Cal. Office hours—From 9 a. m. to 6 p. m. Residence—119 South Grand avenue.
