NERVES WERE UNSTRUNG.

Until She Used the Great Remedy—Paine's Celery Compound.

The Burden of Housekeeping Falls Heavily on Mothers.

Housekeeping is growing less simple and more and more complex each year. A housewife professes to be well regulated today is far more difficult to manage than was the same kind of a home 50 or 60 years ago.

Upon the woman falls the burden. Many work themselves into nervous exhaustion. Men and mothers grow so fatigued that they faint at times. If guilty, fearing that their disease—if it is a disease, and a most dreadful one—may result in affecting the otherwise sunny disposition of their children.

What pain is to the broken limb, such is nervous irritability to the exhausted brain. One is as real as the other.

But thousands of irritable, nervous, tired and broken down women have found their health and strength, and regained their even tempers, through the use of the greatest remedy the world has ever known, the remedy first prescribed by the eminent Prof. E. E. Phelps M. D. L. D., of Dartmouth College.

Let every woman read the following voluntary testimonial from Mrs. E. E. Short, a highly respected resident of Haverhill, Mass., and learn of the thousands of wonderful cures that are wrought by Paine's celery compound. "Though never very strong, I was always well until I was married. I was 19 years old then and am 28 now and the mother of four children. I got frightened just before my little girl was born, and I have never wholly recovered from it. I have taken medicine enough to swim in. I have been so nervous that I did not dare go out in the back room after dark unless some one went with me for fear I should scream.

"I have been very thankful that I used Paine's celery compound, for as a result I can now go out evenings and not feel so awful. Every one tells me how well I look. I do my work all alone, and people ask me how I do so much, and I tell them because I used Paine's celery compound. "My husband has spent enough money for me for doctors, nurses, and medicine to pay for a year, and he is very thankful that I took Paine's celery compound."
