TRIPLE AFFLICTION.

Lost Her Husband Recently and Yesterday Two of Her Children Die, Only a Few Hours Apart.

On April 28 last David S. Hughes fell dead at his work in the Dickson Manufacturing company's shops. He left a wife and a large family to mourn his sudden demise. Yesterday death made a double visit to this family, and removed therefrom two more of its members. Jeannette, aged 10 years and 6 months, and Della, aged 5 years and 4 months. Both children were bright little girls, and have been ill but a short time. They died but a few hours apart. The mother, already heavily afflicted, is nearly prostrated with grief, and the friends and neighbors are full of sympathy for the bereaved family. The funeral services will be held at the family residence on Saturday afternoon in all probability, and interment will be made at the Washburn street cemetery.

The funeral of Martin Moran took place yesterday morning from his home on Oak street. Religious services were conducted at the Holy Rosary church by the Rev. J. J. O'Toole. BAKING-POWDER SECRETS.
Some of the Things Which Every Good Housewife Should Know.
Our grandmothers did without baking-powder, and were not sensible of any difficulty in preparing quick doughs. Mrs. Ella Morris, Executive in the September Woman's Home Companion, "But one wonders if results were not oftentimes richer, because of the nice care necessary in using soda. In fact, there are certain cases where it is better to use cream of tartar, muriatic acid or sour milk, and the proportion must be exact or the mixture will be either acid or alkaline. "Pure baking-powders are simply a mixture of bicarbonate of soda and cream of tartar in the proper proportions, with perhaps twice their combined weight of rice-flour, corn-starch or plain flour to insure their keeping. If really pure they cannot be called injurious, the danger lying in the use of cheap or adulterated ingredients of which quantities are doubtless sold daily. So sensible have housekeepers become of these adulterations that many are going back to the use of soda and cream of tartar, the use of which, as indicated, requires both intelligence and care. If one is dependent upon the average cook a standard baking-powder is the safest reliance. "In the making of quick doughs (by use either of baking-powder, or soda and cream of tartar) there are two points not given in any cook-book, so far as the writer knows, which add greatly to perfection in results. To make such doughs proceed as follows: "Into one quart of flour (measured before leveling) put one level teaspoonful of salt and two heaping teaspoonfuls of baking-powder—or one level teaspoonful of soda and two rounding ones of cream of tartar—mix thoroughly with the hands, and then, if necessary, next add a heaping tablespoonful of butter (or butter and lard mixed), rub up lightly with the hands, and again put through the sieve, pressing the last, heavier part through with the fingers or back. Now toss the mixture lightly about as when first putting in the baking-powder, and it will be found that the shortening is distributed with perfect evenness through the flour. Have ready a scant pint of sweet milk in a bowl, and into this put one half of the flour. Beat hard for a few minutes, when the mixture will be as smooth as satin; add rapidly the rest of the flour, roll out quickly, cut (if for biscuits), and bake at once in a rather shallow tin.

"Some flours require more wetting than others, but the rule for guidance is 'a dough as soft as can be handled.' A little flour, more or less, will not spoil the general result if other directions are carefully followed."

FATALITIES IN WAR.
Deputy Commissioner of Pensions Says It Is Generally Overestimated.
Washington Letter to the Chicago News. The deputy commissioner of pensions was commenting today on some of the inaccurate statements made on the occasion of the Hancock statue unveiling of the number of Union soldiers killed in the Gettysburg engagement. Said he: "One authority stated Hancock's command furnished 4,000, or about half the dead, at Gettysburg. The records show that only 2,534 Union soldiers in all were killed in Gettysburg. This is only one of the inaccuracies of which those who have not made an examination of the records touching the number killed in battle during the war of the rebellion are likely to fall. The fatality in battle is usually considered much greater than it really is. If any one should answer offhand the number he believed to have been killed on the Union side at the battle of Gettysburg he would almost invariably fix the number at once as from 8,000 to 12,000, and he would go about as much over the mark touching any other battle of the late war concerning which a similar question might be propounded. "At the battle of Gettysburg the number of Union soldiers killed was 2,110; the confederates, 3,500. First Bull Run, Union killed, 481; confederates, 269. Second Bull Run, Union, 500; confederates, 700. Chancellorsville, Union killed, 1,512; confederates, 1,581. Chickamauga, Union, 1,644; confederates, 2,389. Gettysburg, Union, 2,534; confederates, 3,500. Shiloh, Union, 1,735; confederates, 1,728. Stone River,

Union, 1,633; confederates, number of killed not given separately, but killed and wounded amounted to 9,000. Battle of the Wilderness, Union killed, 5,597; confederates, 2,900. "The total number of Union soldiers killed in the battles during the entire war of the rebellion was 59,860; while the number of confederates killed was 61,425, or a grand total of 111,285, out of something like 3,000,000 engaged, and covering a period of over four years."

Weak On Geography.
Little things illustrate certain Englishmen's knowledge of American geography very picturesquely. An Englishman who had taken the Pacific express at Philadelphia called out on going to bed before the train started: "Portah! Portah!" The porter came. "What is it, sir?" he said. "Please wake me up when we get to San Francisco, you know," said the Englishman.—Pittsburg Bulletin.

Rheumatism Cured in 24 Hours.
T. J. Blackmore, of Haller & Blackmore, Pittsburg, Pa., says: "A short time since I procured a bottle of 'MYSTIC CURE.' It got me out of the house in twenty-four hours. I took to my bed with rheumatism months ago and the 'MYSTIC CURE' is the only medicine that did me any good. I had five of the best physicians in the city, but I received very little relief from them. I know the 'MYSTIC CURE' to be what it is represented and take pleasure in recommending it to other poor sufferers. Sold by Carl Lorenz, druggist, 418 Lackawanna ave., Scranton."

Globe Warehouse

The choicest textile products of two continents await your inspection every day this week in our great Dress Goods Departments, and, as usual, you are heartily welcome to come and look over the most important

Semi-Annual Exhibition of Dress Goods
that occurs in this state, Philadelphia excepted. Your presence on such an occasion does not signify your intention of buying. This is mutually understood, therefore ladies need have no hesitation whatever in coming in to see what they will undoubtedly wear later in the season.

Imported Fashions, as Popular Priced Importations
illustrated in the new weaves to hand are remarkable chiefly for the admirable manner in which high art, good taste and common sense thrive are combined. With one or two exceptions there is not a new weave that does not possess all the essentials of this peculiar and we might add happy triple alliance. The exceptions to this rule are found in what may be described as odd fads, their claims for attention resting chiefly on their extreme originality.

The Domestic Productions
continue to show a marked improvement in both style and finish, and point clearly to the not far distant time when imported novelties will be a thing of the past. Knotted Weaves, new Pine Stripe and Brocade Creations, Crochet Weaves in many ways, Raw Silk Random Chevrons are the most notable things, while, of course, we've all the staples in Serges, Henriettas, Cashmeres, etc., etc.

The Leading New Weaves
from abroad are two tone whip cords; changeable covers in faint, dark mixtures; undressed twist tweeds and worsteds; velvet, whip cord and twill briges; mosaicette cloth (an entirely new fabric, with molkskin finished back, fine twill face and storm proof); clay worsteds; solid shade granite cloths, etc. Also extreme novelties in Moire Broche and Velour effects; Metallic Ripples, Jacquard Ripples, etc., etc.

Checks and Plaid Materials
are as popular as ever in their own special lines, and the new Basket Weaves, Reps, Twills, etc., bring them out to much advantage. It is impossible to say much about the immensity of this display in the limited space at our command, but when you look it over, you'll readily admit that it is the most complete exposition of the textile art that has ever taken place in this city.
