## BOARD OF TRADE MEETS.

**E. T. Craven, of Honesdale, Told the Board He Would Like to Bring His Factory Here.**

The West Side board of trade held its regular monthly meeting in its West Side bank quarters last night. President Holmes presided over the deliberations of the board. The minutes of the last meeting were read by Secretary Oliver and approved. No particular business of importance came up under the several heads until the order of business of parks was reached. P. J. McCann, park commissioner, was introduced and made an interesting address. He outlined the acquisition and resultant care and expense of parks, as dealt with by a city's councils through its ordinances. The Nay Aug and Connell parks were then touched upon and his statements probably opened up a line of thought not given much consideration by the public. Both these parks are well taken care of, considering the lack of available funds and would be more so, but for the feeling apparently existing against any great expenditures or even a moderate increase thereof. To Nay Aug park is appropriated \$2,000 and to Connell park \$1,000. Of course, Nay Aug park is the larger of the two, and requires more funds.

President Holmes made a short report in reference to the decision of the projectors of the new factory, who located in Petersburg, Messrs. Billing and Schoen had been favorably impressed with both sites, especially that situated on the Fairview tract, but were afraid that the proceeding of labor would bring about a clash with the silk mills across in South Scranton.

E. T. Craven, of Honesdale, was introduced. Mr. Craven is the proprietor of a shirt factory located at Honesdale with a branch mill at Susquehanna. He was looking for a factory site in this city, with a view of transferring both plants here. The question of sufficient employees was his trouble, there being none available from a desirable standpoint. His orders are large and increasing both factories running constantly.

Mr. Craven's plant is capitalized at \$15,000 at present, and in bringing the plant to this city, he seeks a desirable site, the erection of a building 50x100 in size, and \$20,000 increased capitalization. He will give employment to about 400 hands and run the year round. To investigate the matter and place the board, in a position to consider the matter intelligently a committee was selected consisting of President A. B. Holmes, William R. Williams, E. B. Clarke, Edwin G. Hughes, William Blume, and Hon. John H. Fellows. This committee will visit the plant and report at the next stated meeting. The session then adjourned.

## TO CURE DYSPEPSIA.

**A New Remedy Which Will Do It.**  
Chronic dyspepsia is considered by many people to be nearly if not quite incurable. No good reason can be given why they think so except that perhaps they have tried various remedies without much, if any benefit. But the progress in every branch of medicine has been such that among other things a lasting cure for indigestion in its chronic form as well as temporary has been discovered and is now placed before the public strictly on its merits as a permanent cure for all stomach troubles or difficulties with the digestive organs.

This new treatment is called Stuart's Dyspepsia Tablets, being put up in tablet form so as to be easily taken and also to preserve its good qualities for an indefinite length of time. This remedy has such far reaching effects in the various forms of indigestion, and in many cases where ordinary remedies failed to give even relief, Stuart's Dyspepsia Tablets have fully cured.

The splendid results from using this preparation are owing to the fact that it is prepared and intended for Dyspepsia and stomach troubles only. It is not a cure-all like so many advertised remedies, claiming to cure everything under the sun, but it is claimed that it is a certain cure for Dyspepsia and is derived from any form of indigestion cannot fail to get permanent relief and cure from its use.

It is so prepared and the ingredients are of such a nature that when the tablets are taken into the stomach they digest the food no matter whether the stomach is in good condition or not. You get sustenance and strength to mind and body by reason of the food being properly digested and at the same time the much abused stomach is allowed to rest and recuperate.

Notwithstanding the great benefits to be derived from Stuart's Dyspepsia Tablets, the price is but 50c. for full sized package and all druggists sell them.

A little book on Stomach Diseases mailed free by addressing the Stuart Co., Marshall, Mich.

## NEED OF EXERCISE.

**Preserves Health and Makes Man Better Mentally and Physically.**  
Nature preserves health by simple processes. A few contrivances serve her for its preservation; nor are the causes of disease many. There are many things which, though they appear to have little influence in the healing of disease, possess untold weight of power. Of this kind are the following: Exercise, air, food, rest, sleep. The intelligent application of these may be of the greatest service in the art of healing.

Let us see the necessity of physical exercise. The muscles contribute four-fifths of the heat necessary to maintain life; the muscles form about one-half of the substance of the body. Heat is necessary for the nutrition of the body; cold has a depressing action on nutrition. By heat every organ of the body is stimulated and at the same time put into healthy action by the exercise that generates the heat. The question arises: How can a man keep up the healthy equilibrium between muscles and organs; how shall he keep up the tone of the body.

By intelligent exercise he can accomplish the above in a short time. It is wonderful the great curative power of exercise on one of the greatest infirmities of the age, sleeplessness. It is a forerunner of the most serious consequences; it is generally associated with an overtaxed condition of the brain. Exercise should be taken that would cause the patient to perspire. Neck, chest and arms should be sponged in tepid water; the skin should then be rubbed with a rough towel. With this treatment the most obstinate cases will be cured. The Young Men's Christian Association gymnasium opens on Sept. 20.

**GAMBLE, THE ALLEGED BIGAMIST.**

# A Thrilling Rescue.

## A YOUNG LIFE SAVED IN A REMARKABLE MANNER.

### Florence Sturdivant, of Grindstone Island, Saved from an Untimely Death—Her Dangerous Predicament.

From "On The St. Lawrence," Clayton, N. Y.  
prostrated. At this time we called an eminent physician, who agreed with the diagnosis of our physician. He prescribed a course of treatment, she followed it faithfully for three months, but instead of improving, Florence failed.

"A brother of my wife, who resided in Canada, had been visiting us in October, 1890. After using the pills a short time we could see an improvement. Her strength began to return and her appetite was restored. When she had taken one box the pains in her back and stomach ceased and her recovery seemed certain.

"We eagerly purchased a second box of pills and watched with delight the change for the better that was being wrought daily. Florence finally became strong enough to walk a little. She gained in flesh and strength rapidly. By the time she had used three boxes of the pills she was evidently well. We continued the treatment using another box, the fourth, to prevent the possibility of a recurrence of the difficulty.

"We cannot praise too highly the value of Dr. Williams' Pink Pills. I am positive that without their use our child would have been a confirmed invalid. Dr. STURDIVANT, (Signed) WILLIAM H. STURDIVANT, Subscribed and sworn to before me this sixth day of April, 1907.

## WE SELL SEWING MACHINES

Oh, no; ours is not the only first-class sewing machine on the market. There are others just as good, but none better.

The Truth is

## Globe Sewing Machines

embody every valuable improvement to be found in any other machine, no matter what its make or name may be. While we can safely say that they are the best machines that inventive genius, skilled labor and money combined can produce, and the only difference between Globe Machines and those sold at more than double our prices through special agents, lies in the price. We sell sewing machines for what they are actually worth; agents sell them at figures that allow them to pay immense profits to solicitors, collectors, etc., besides allowing for interest on outstanding accounts that run on for years, and providing a margin to cover the bills that are never paid.

These facts account for the fancy figures charged by manufacturers who sell through soliciting agents while the prices charged by us represent the intrinsic value of the machines, or what they are actually worth in the regular line of legitimate selling.

## Globe Sewing Machines

Have all the important improvements to be found in any first-class machine, no matter what its name or make may be. It is light running, automatic in action wherever such is possible, light running and almost noiseless.

The cabinet work comes in a variety of different woods, and the finish and decorations are highly artistic throughout.
