PIGGERIES CLOSE TO WATER SUPPLY

Owners Must Remove Them or the Swine Will Be Confiscated.

COMPLAINT MADE TO BOARD OF HEALTH ABOUT THE FERTILIZING APPARATUS AT STOWER'S PACKING CO.'S PLANT—SCRANTON STREET NEEDS A SEWER AND SO DOES THE SOUTH SIDE—THE COW STABLE NUISANCE DISCUSSED. MONTHLY REPORTS OF OFFICERS.

The regular meeting of the board of health was held last night. Dr. Payne, Dr. Allen, M. J. Kelley, Dr. Bentley and Attorney George S. Horn were present.

Stower's Packing company will be visited by a committee consisting of Dr. Payne, Dr. Bentley, Dr. Allen and Captain Burke, with the purpose of stopping the fertilizing plant that sends its disagreeable exhalations over the vicinity.

Dr. Allen reported the presence of several piggeries along the tributaries of the city's water supply. He visited them and found that there was only one place that ought to be retained. That was the establishment of a man named Wheeler in Elmhurst, within fifty feet of the stream, and right next to the school house.

Dr. Allen said the place is outside the jurisdiction of this board, but he is deputy inspector of the state board, and in that capacity proposes to act. He took advice from Dr. Benjamin Lee, of the State Board of Health, who instructed him to serve notice on the owner to remove the sty in five days or else the pigs will be confiscated and driven to the county poor house for the use of the poor. Dr. Allen and Captain Burke will attend to the case this week.

CONDITION OF SOUTH SIDE.

Complaints are frequent. Dr. Allen said, from the South Side after a heavy rain storm, the sewage is being washed down from high places. Nothing will remedy it except a sewer. The Beaumont street stagnant pools are at high water mark now, he said, and the streets ought to be graded. Scranton street, from Chestnut street to the river, is a sewer in name, but it is not connected with the sewer. The closets at the rear of lots and not connected with the sewer. The secretary was instructed to communicate the fact to councils.

Another subject, he said, causes frequent complaint. That is stabling cows next door to residences. The exhalation coming from a stable may be very injurious to health, but it is not the most delightful thing in the world. Captain Burke has more than he can attend to in visiting these places every ten days and making the owners keep them clean.

Dr. Bentley brought up the subject of the stream in the Second ward which is little better than an open sewer. He and Dr. Allen and Captain Burke were appointed to modify the residents who use it as a sewer that there is no excuse, as there is a sewer draining that territory, and they must connect with it. The plans for the repairs on the crematory have not arrived and when they do a special meeting will be held to consider them.

REPORTS PRESENTED.

Food Inspector T. N. Cullen's report showed that he did good work in May. He made 574 visits to stores and markets, and 262 milk inspections with the lactometer and 30 Babcock tests. He also inspected 30 barrels of oysters, 13 barrels of clams, 3 crates of strawberries, 3 crates of cucumbers, and 7 bunches of bananas to the crematory to be destroyed. He found only one case where the milkman increased his supply from the hydrant. Out of 20 samples of milk found only an average of 12 1/2 per cent. of butter and 3 1/2 per cent. of fat.

Superintendent D. O. Thomas of the garbage crematory reported that 1,527 barrels of garbage were consumed during May, and 13 dead dogs and 2 cats were cremated. It required 10 tons of coal to keep the fire burning.

Plumbing Inspector M. F. O'Malley made his first report. It showed that he made eight water tests, four smoke tests, made five inspections of old buildings, ten re-inspections, twelve visits to new buildings, and examined and approved two sets of plans.

Secretary Murray's report summarized as follows: Total number of deaths for May, 121, of which 64 were males, 57 females, 43 were married, 69 were single, 12 were widows and 5 were widowers. Births during the month were 7, still births were 3. The actual mortality for the month was 103. The contagious diseases reported numbered 15, and 2 of them died. There were 14 marriages.

REPAIRING OF ASPHALT.

Scranton by Securing a \$366 Portable Plant Can Save 40 Cents on Every Square Yard.

While Scranton's councils are trying to figure out how they may please all the contractors who want to secure the privilege of repairing the city's asphalt pavement, St. Louis is operating under a system which puts the usually progressive Electric City to shame.

St. Louis does its own repairing with a portable plant which costs complete, including hauls, \$366. Blue prints and specifications in support of this statement have recently been received by City Engineer Phillips. The plant has a capacity of from sixty to ninety square yards per day. Last year St. Louis in doing its own repairing saved forty cents per square yard and a total of \$4,900.
