PROF. COLES FOR JULY

The Coal Trade, He Predicts, Will Take on New Life--Money to Be Made Out of the War.

From Storms and Signs.

Rejoice and be glad, for earth is again in the "House of Life." In a good and fruitful "sign," and swiftly turning onward toward the "House of Fortune," away from the evil influence of the great planets Saturn and Uranus, and safe in the arms of prosperity, the coal trade and manufacturing industries of the present generation of the United States will spend one million dollars a day for war expenses and get two million dollars a day in return. The evil influence of the great planets will all be centered upon Europe and Asia this month, and new complications in the war situation will arise and give us much alarm for a time. Either Germany or England will receive our affliction, and the state of affairs at the Philippine islands will take a sudden turn. Watch out for an epidemic of evil doings that will run riot throughout America and the old country.

THE STORMS AND SIGNS.

The great sea of gaseous matter is still passing over the sun, cutting off the regular supply of electrical currents in some sections of this country and pouring down an excess in other sections; this means extreme heat for the latter, and cold weather with frost and perhaps snow for the former. Cloud-bursts, hurricanes, cyclones and floods will make a bad record in some of the western and southern states, and violent hail, wind and rain storms will flood the Eastern States. Phenomenal electrical storms will sweep over the Eastern States and all cities situated within the eastern electrical belts, (Scranton, etc.) and better watch out for an electrical bombardment. If a break does not occur in the gaseous matter, now passing over the sun, and cause fearful storms and floods, then several earthquake shocks will be felt and large meteors will fall in many sections of the country.

IN THE MICROBE WORLD.

The army worm and the locusts made their appearance last month, as we predicted, and we have good reasons to believe that several new forms of microbes will put in their appearance this month in some localities and make an attack upon grain and vegetation, and that thousands of acres of rye, oats and wheat will be destroyed.

all the present orders will be retained. It was decided to have a nine-months' school term as last year. Mr. George B. Holloran, of Marshwood, stated that for several years he had acted as assistant assessor in that district without a settlement with the board. The secretary was instructed to draw orders for the same. A special meeting of the board will be held soon to take action in regard to building the annex to the Fourth ward building, and on Saturday the board will inspect the different schools of the borough.

Myriads of magnetic microbes will fall in showers in some localities and vanish away at the sight of the sun.

Watch out for one of the most brilliant displays of yellow lightning ever seen in the heavens; also for one or two awe-inspiring sunset scenes. The comet that we predicted the great telescopes would sight last month, was found by the "Lick" Observatory on the 14th inst. Another and larger comet is coming toward the earth and will be sighted this month by some one of the big telescopes. It is now just outside of the orbit of Jupiter. This makes the fourteenth comet that we have accurately forecasted their approach earthward. Watch how the bright star in the golden west will sparkle on the evening of the 19th inst. If the clouds roll away in time to get a good unobstructed view of it.
