

The Missouri river has opened for itself a new outlet into the Mississippi. On Saturday week it succeeded in cutting a new mouth, or debauch, into the Mississippi, across the point of land lying about half a mile above where it has run of late years. It now strikes the Mississippi in a direction which is likely to prevent the washing of the Illinois or eastern shore, to an injurious extent. At the last accounts, two steamers had passed through the new chute, and this may now be regarded as the main channel of the Missouri.

Miss Araminta, daughter of Mr. Fielding S. Ragan, of Harrisonburg Va., aged about fourteen years, went to sleep on the 31st ult., and has continued in that situation, with scarcely any intermission ever since. The Register says she has eaten nothing of consequence since the appalling stupor came over her senses—and has spoken but once or twice since she went to sleep. Once, on the first day she was taken, animation seemed entirely suspended. It is with extreme difficulty she can be aroused from her slumbers, but when awakened, she seems to know her friends and acquaintances, although the power of speech seems to be destroyed.

The wheat production of Ohio is estimated to average 25,000,000 bushels per annum, of which 13,000,000 are surplus. It is said that only about one-fifth of the land in the State is under cultivation. While some of the premium crops exceed 50 bushels to the acre, the average yield of the State will not exceed 16 bushels.

The Erie Railroad, with its equipments, cost twenty-five millions of dollars, and employs two hundred locomotives.

RODMAN M. PIERCE, of Newark, has been nominated by the New Jersey Local State Convention, for Governor.

Fruits of all kinds are said to be unusually abundant in Iowa this year.—Peaches and apples are selling in that State, it is said, at 40 and 50 cents per bushel.

### DR. J. LANTZ, DENTIST.

Has permanently located himself in Stroudsburg, and moved his office next door to Dr. S. Walton, and nearly opposite S. Melick's Jewelry store, where he is fully prepared to treat the natural teeth, and also to insert incorruptible artificial teeth on pivot and plate, in the latest and most improved manner. Most persons know the danger and folly of trusting their work to the ignorant and folly of trusting a traveling dentist. It matters not how much experience a person may have, he is liable to have some failures out of a number of cases, and if the dentures live at a distance, it is frequently put off until it is too late to save the tooth or teeth as it may be, otherwise the inconvenience and trouble of going so far.—Hence the necessity of obtaining the services of a dentist near home. All work warranted.
