POETICAL.
THE BATTLE CRY OF FREEDOM.
BY J. PUGH.
We're the Grant and Sherman boys, we've marched the country through,
Shouting the battle cry of freedom;
Shenandoah some have seen, where Phil Sheridan
Shouting the battle cry of freedom.
CHORUS.
The Union forever, hurrah boys, hurrah!
Down with the traitor, up with the star;
While we rally round the flag, boys, rally once again,
Shouting the battle cry of freedom.

While at Gettysburg we routed the invaders of our
Shouting the battle cry of freedom;
Grant took defeat Vicksburg, his army and its spoil,
Shouting the battle cry of freedom,
The Union forever, &c.
Lookout Mountain saw us rise, like eagles through
its clouds,
Shouting the battle cry of freedom;
Driving traitors from its heights down to death and
bloody shrouds,
Shouting the battle cry of freedom.
The Union forever, &c.
The West we soon had conquered, for Grant gave
his word,
Shouting the battle cry of freedom;
Then he led us on to Richmond, beat Lee with all
his art,
Shouting the battle cry of freedom.
The Union forever, &c.

Great Ulysses is our man, he was earnest in our
cause,
Shouting the battle cry of freedom.
And we'll rally where he leads, for the Union and
the law,
Shouting the battle cry of freedom.
The Union forever, &c.
With ballots as with bullets, the Rebels will defeat,
Shouting the battle cry of freedom;
Making Liberty and Union, for each and all complete,
Shouting the battle cry of freedom.
The Union forever, &c.

The Insanity of Politics.
Under this caption, the Philadelphia Ledger, usually known as an independent journal, but with Democratic prejudices, printed editorially, a few days since, the annexed dignified and candid protest against the revolutionary policy of the Democratic party. Showing, as it does, the occasion for serious alarm, and as bearing cogent testimony to the correctness of the interpretations which the friends of the Union have placed upon the recent Democratic avowals of principles and intentions, the Ledger article deserves a thoughtful perusal. It says:

Every good citizen must look with profound regret upon a great deal that is now going on in the Southern States. There was room for this grief after the rebellion was suppressed, and when the Southern people were brought face to face with the widespread ruin that was wrought upon them by that "gigantic blunder," as some of their statesmen called it, and crime, as the nation regarded it, that they would never more give up the struggle to restore the Union to its former condition, and to wipe out the stain of rebellion from the pages of our history.

Notwithstanding the bitter experience of the past seven years, that fruitful section of our country is still cursed with the influence and the active agency of the same evil influences. It is still the belief of an unquestionable majority of the people of the old free States, that the planters, farmers, merchants, manufacturers, and all others in the South, engaged in industrial and productive pursuits, were heartily sick of all the memories of the late rebellion, and of the horrors that it had inflicted upon the South, and that they might get their business affairs into successful action once more, and go on with the necessary operations of life. There can be but little doubt that such was the case, and we cherish the belief that it still remains true to the masses of the people of that section of our country.

The friends of the Union, who are the friends of the people, are not satisfied with the present state of affairs in the South. They are not satisfied with the present state of affairs in the South. They are not satisfied with the present state of affairs in the South.

Gurowski on Grant.
The late Count Gurowski was one of the shrewdest observers and one of the best judges of men, and during the war was constantly at Washington in the highest society, and with every opportunity of learning the truth. March 24, 1861, the following striking allusion was made in his diary to the camp and field. All Grant's predecessors in command of the Army of the Potomac—several commanders of the corps, divisions, brigades, and regiments—in one word, many officers, and even the rank and file, came to grief and were ruined by Washington influences in Washington, provided that there was anything whatever to be ruined in McClellan. When with the army the thought and mind of Grant's predecessors were not in the camp, but in Washington, in its various attractions and intrigues. The commanders and generals, &c., visited and visit Washington when they can; its various attractions ruin them.

The Remembrance Aerolite in Tennessee.
An account of the aerolite which fell in Tennessee recently has already been given. A correspondent of the New York Times writes from Cheatham's Cross Roads, under date of August 19:

"The place where it struck remained hot three days, but a copious shower of rain having fallen, which temporarily swelled the streams and water courses, a large flood poured down on the place from the neighboring hills, sending up a constant and immense column of steam. The earth around the place for several yards was quite hot. This gave us the idea that the aerolite which struck must be of a great size. The column of steam continued to ascend all night, and presented a weird and awful appearance in the silent depths of the woods. It could be seen from the surrounding hills, like a tall ghost, changing its position between and its form, and gradually, as morning approached, melting away in the light of the rising sun. At 10 or 11 o'clock that day the aerolite was seen to rise from the ground, and in the silent depths of the woods, it could be seen from the surrounding hills, like a tall ghost, changing its position between and its form, and gradually, as morning approached, melting away in the light of the rising sun. All's Well that Ends Well.
Not a great while ago an Irishman was employed, in a village where he was well known, to dig a well, "pro bono publico." The contract was made that he was to be paid a certain sum per foot and warrant a free supply of water. At it he went with a well and his dirt and coal, he carefully watched by interested parties, and he late he delved away faithfully, deep down in the earth, full of confidence in the speedy completion of his labors.
