A "Perfect Pit" In Chlengo-The Tea Drinking Habit-When Baby Outgrew His Curls-Women Who Run

Elevators-How to Rest. The Philippine war has made not only Kansas heroes, but Kansas herotues too. Widle Funston and his friends are fighting in the Philippines their wives and sisters and sweetbearts are proving their toyalty to love and country in a notel and most reone limble way.

They have taken the place of the men at the plow, on the harrow and on the mowing machine. Common as field work is among the peasantry of Europe, if has been almost unknown in America till new.

The singular part of it is that these women are not poor and they are not msed to work. They are women whose husbands and brothers own the farms, ghandoned for the war.

Mrs. Mary Semple, who is working a 250 acre farm 15 miles south of Wichita. Is the mother of Corporal Frank Semple, who swam the Marilao river with Functon when that daring colonel of the Twentieth Kansas regiment (won victory and fame by his brilliant) act. Semple was wounded in the head hard to kill a Kansan they say at Ma-

His mother is a widow, but she urged ther eldest son to join the army and serve his country. His sister Jennie

while he was away at the war. And she has kept her promise to the letter. Jennie Semple is the prettlest girl in Kansas, and she is so proud of her big brother that she willingly left school to take his place at the plow this

A year ago she was thinking only of dancing parties and a trip to New |York.

1"I don't mind it a bit," she says now, "so long as it lets brother Frank fight for his country." Another of these brave, high hearted

thereines at home is Miss Lulu Funiston, consin of Brigadier General Funston, the hero. She is now overseeing his farm in Allen county and actually plowing and planting.

applauding General Funston's dash and bravery in the faroff Philippines she has been quietly at work helping to carry on the work on his farm. She thas shrunk from even being mentionall when you know how. Dangerous? ed. All she wants is to have people overlook her and praise her hero-her

And these are only a few instances of women's patriotism and devotion which may now be found all over the state of Kansas. It is beroines' work, and nothing

daunts them from a 500 acre unplowed field which must be tilled, to the buil-Ing of a load of hay.-New York Jour-

A "Perfect Fit" In Chicago. The buds and matrons have discovered a wonderful man here in Chicago. His coats and gowns-ah, how they do lat! Taking up the raw cloth, this man of original ideas holds it against the figure which is to be fitted, precisely after the manner usual with artist de signers of his kind. Then the gown is made, fitted and almost finished when the new and original scheme is brought into play.

The customer is wrapped in long, wet towels-technically they are known as "sheets"-and the new tailor made gown is put on. Then over and over the hips and shoulders and around and around the waist and up and down in carefully acceptuated lines goes the hot iron. Instead of being pressed on a board, the suit is pressed on the lady herself. Oh, yes, to be sure, the hot vapor arises, and the poor lady often cries out in alarm lest she be parboiled then and there, but what matters these trivial things if one's gown is to st sublimely and beautifully and to have a style that is actually heart wringing? The costume is literally molded to the figure inside it. The woman is instructed that she must continue to keep the dress on until the seams are squite dry.

The man who is responsible for this new and startling departure in the way of gown fitting is a Swedish Englishman. He claims that the Princess of Wales was his inspiration for the initial attempt along this line. When fitting a gown for her one day, the idea occurred to him to try press ing it upon the figure.

"Why not try it?" exclaimed the gracious and kindly princess, of whom the artist designer is never tired of speaking.

The experiment was a great success. After that the gowns and outer gar ments pressed in this way for English ladies were many. About a year ago the young man who had origit ated the tilea came to Chicago to put it into practice-here. In Chicago it was Mrs. Richard Harding Davis, then Miss Cecil Clark, who was the first woman to selle upon the opportunity of outshining her sister women in this manner. Adjusting a garment to her tall. svelte figure, the tailor requested the privilege of trying his cherished inspiration. Once more it proved a delightful success, and so great has the fad become already in Chicago that there are sometimes as many as 20

women waiting for their turn to b "pressed."-Chicago Times-Herald. The Ten Drinking Habit. The recent death of a man from too much tea drinking has called forth renewed discussion of the tea habit, but thus far the ground gone over is not new, and the conclusions reached have been attained before in these disenssions. Tea properly brewed and dounk not with meals, but at a time when the system feels the need of a slight stimulant, is, to the normal indivisital, beneficial rather than harmful. The custom of 5 o'clock tea is a rational one, because at that hour in the afternoon the system feels the strain of the day's occupations, and the slight stimulant of the tea is grateful. "In the case of a person who is not in the habit of taking ten regularly," a physician said recently, "I know of no better reviver or temporary tonic than a cup of freshly and well brewed ten. In cold weather it will often tone up the system at a critical moment and ward off a cold. In hot weather a cup of hot. tea is particularly beneficial, not only for its reviving effects, but because it

induces relieving perspiration." Iced ten the same physician con demns in strong terms because it is rarely properly made. Most iced tea consists of a strong decoction in which the tannic acid is thoroughly released. This is diluted with melted ice, oversweetened with sugar and then made usually too acid by a strong flavoring of lemon. It might even then be taken

in more, at our name it is usually guiped down by the gobietful at luncheou urriedly eaten in the course of a business day. When it is carefully made in the first place and chilled to the drinkable stage, but not made leg, withdrawn. The question whether but tes should be used with cresm or without has again been raised. The weight of colnion seems to be in favor of the latter plan, but expert opinion to the contrary is not wanting. The milk, it

When Baby Outgress His Curls. There are many mothers whose hearts will echo the feelings of the Chicago mether who felt so bad when the time came to cut off har baby boy's curis. She says:

"His curis were beautiful, so golden and shimmery, and I loved every one that fell about his pretty pink shoulders. But he was growing up and he hated the curls, as do all boys when the other bigger ones tease them and enil them girls and babies and little sisters. One morning he came to me, his eyes bright and flery with indignation and his cheeks aglow. Some playmate had chided him for his girlish hair, and he could endure it no at that time, but he wasn't killed. It's longer. He stood as firm as a rock, with feet wide apart, and commanded me to cut them off. This has happened often of late since he has been strutting about in his cumping little trousers. His grief was real, and 1-I felt sorry for him, as I did for myself. I got out the big shears, and as the first long, beautiful ringlet of spun gold as fine as spider web fell into my hands he gave a little shrick of happi-

lown me cheeks.

"When the deed was done, he rushed out of the door and down the street as fast as his precious, fat little legs could carry bim, and I saw him plump his fists in his absurd little peckets as he stood-with the dignity of a hero-before his termentors. The selfishness in my heart at losing my baby made me almost forget his happiness, and as I went back to the curis the tears streamed faster than before. My baby had gone from me when those curis had dropped into my hands. My little boy was there-and sweet, lovable, manly little fellow he is, with strong small arms that eling close about my neck-but he isn't my taby any more. All my life have I laughed at the foolish mothers who tried to keep their children from growing out of their babyhood and baby ways-but I know now why this

Women Who Run Elevators. The elevator, a province over which man seemed to hold undisputed sway. has recently been invaded by woman. In one of the office buildings of the city, says the Chicago Chronicle, a lit tle woman yesterday aroused consider able enriosity among those who had not before seen her at her nost. Those

who belonged to the building and were

recustomed to the sight seemed rather

surprised that any one should question "I sometimes run it for a week to re-All the while the country has been lieve my husband and give him a holiday," said the woman. "You see, it is onous, and, of course, he gets tired of it, so he taught me, and I don't mind. It's easy as fun-no knack at

> No. not a bit." At one of the North Side hotels the proprietor hired a girl who had been working in the kitchen to run the elevator. She did the work easily and was more satisfactory than the boys, who frequently went to sleep between calls, but she soon tired of it and left, saying it was too easy. Of course, the elevator was not very large or heavy. At the Young Women's Christian as-

sociation, on Michigan avenue, a young lady runs the elevator up and down the seven stories with perfect ease. While walting for passengers she finds time to study and read, and the hours do not hang on her hands, although she beeing her work prospally early. She is under the direction of the engineer, who taught her to manipulate the machine. She speceeded a young girl who while acting as "elevator man" fitted herself for a clerical position, passed the civil service examination and is now doing responsible work in the Public Illuary.

Medical men assert that no period of the year is more full of real danger than the vacation season. During that period the tendency of Americans to rush from one extreme to the other is proverblal, and for two or three months the struggle for pleasure is made as intense as is the struggle for life during the rest of the year. The nervous wear and tear of trav-

eling, care of baggage, etc., are not sufficiently taken into account. Dr. Fordyce Barker said that the details of travel make or mar a vacation, for good or evil.

The choice of a place is also of great practical importance. A complete change of environment is most beneficial, such as changing sea air for dry and the reverse. Gaslight, drinking, dancing and late hours must be avoid-

The chief point in a vacation is to take a vacation from yourself-to have a change of natural surroundings and of intellectual life. A week of this complete newness will

be the beginning of a vacation indeed. A month of it will do mind and body more good than all the medicines in the

Above all one must adhere strictly to personal habits and the general laws of health. No imprudences are so dangerous as those committed in the careessness of vacation. The detail of drinking water, for instance, should be looked to carefully; morning and evening exposures should be carefully guarded against; in fact, there must be no such thing as carelessness or indif-

The Hats Off Habit. Besides the houseful of untidy heads

that the bats off habit at the theater has engendered there is another result of the practice almost as unfortunate. From removing her hat at the theater, a woman wants to remove it at all times. This has nothing to do with the summer practice of going bareheaded; it is a winter tendency, and it manifests itself in various ways and upon various occasions. A woman finds her hat a burden while shopplag; in traveling, no matter how short the trip, she has the longing to lay it aside and often does so. At concerts and lectures, where there is no spectacular necessity for removing bonnets, she finds herself Instinctively taking out her hairpins. Church and women's club meet'ngs are, in fact, the only shown itself to a marked degree and at the former it is already recommend ed, while at the latter the fact that such a proceeding would strike at the very roots of the club institution must be accounted as the true and only reason for the omission. Women find themselves on the lookout for two nttributes in a new hat-lightness and an unnamable attribute requiring no blessing and may be not; it is, however, logical.-Philadelphia Times.

ent head of the Cook County Normal

the college and will be given wide pow ers in establishing an institution un der the broad ideas that have been developed during his long career as a

teacher of teachers. Mrs. Blaine's great aim is to benefit the poor and not to pauperize them. Emmons Rlaine and Anna McCormick were married at Richfield Springs Sept. 26, 1880. He was 33 and she 23 and the possessor of \$3,000,000. Emmons was the favorite son of the late James G. Blaine and was the pick of the flock. He was educated as a lawyer, but afterward went into the rallroad business and became general freight agent of the Santa Fe road at Chiengo. He died June 18, 1802. His widow has been faithful to his memory. - He left one son, McCormick Blaine, the apple of his mother's eye.

The Pentagen Club.

The Pentagon club of Boston is so named because it is made up of women of five professions-doctors, lawyers, ministers, teachers and journalsts. It prides itself upon having no constitution and no officers. Its 20 or 30 members meet and dime together once a month at the United States hotel, for the sole purpose of having a good time. The evening is devoted chiefly to telling funny stories. The Pentagon has hitherto been unlane among women's clubs, but the junior editor of The Woman's Journal, who s a member, happened to mention the plan of the Pentagon in conversation with friends attending the recent national woman suffrage convention in Grand Rapids, and the idea so de lighted a woman lawyer of Detroit and a woman doctor of Cincinnati that they went home each with the purpose of starting a Pentagon in her

own city. A Good Substitute For Feathers. Feathers and down are expensive, but if you know a bank where the cattail grows you can have down pillows galore for the more making. You must know that the fluff of the ripe cattail, which may be gathered in July or August, makes a pillow equaled only by down itself. So be provident this year. and if you live near a lake or pond get you a learnest of cattalls for future use You will find them the most inexpensive and satisfactory material you can employ for this purpose. If it should be your fate to live in a section of the country where cattails do not grow, then substitute the silk from milkweed pods. Gather the pods in the fall of the year, hang them away in paper bags to dry, and they will burst open before the winter is over and can be made up into pillows in the early spring.-Woman's Home Companion.

Her Generous Gift. Helen C. Juilliard gave \$32,000 toward building the new floating hospital for children just launched at New York. The boat is more than 250 feet long. The first crib on board has been endowed by a society of little Brooklyn girls. At the launching, as the vessel sped down the ways, a wire cage decorated with flowers opened, and out of it flew six of the Vermont's arrier pigeous, used in the naval service. They carried the news of the innehing to the Brooklyn navy yard. Miss Catherine C. Dodge severed the cord attached to the basket and christened the vessel Helen C. Jull-

Girls With Thin Arms.

Thin arms should be carefully concealed. They have an impoverished look that robs their owner of some o her dignity. If the arms are unduly long, as they occasionally are, the effeet may be neutralized by wearing wide bands of black velvet fastened with pretty butions or clasps or buckles. This reduces the apparent length of the arms. "Thin arms," says M. Charles Blanc, the great French authority on dress, "denote had bealth and an enfeebled race." The best remedy is to wash the arms with a fine lather of soap at least twice a day and to dry them thoroughly and rub them vigorously. This treatment brings the pores into action and induces a healthy condition of the skin. Rubbing with a soft chamois leather is excellent for the skin, giving it both smoothness and gloss.-Mrs. Humphry in Ladies' Home Journal.

A Top of Cakes. Queen Victoria did not limit her birthday party refreshments to one cake with 80 candles. She commanded the royal confectioner to make no less than 20 cakes, each to weigh 100 pounds, and all of them were duly consumed at Windsor by the crowd of grandchildren and great-grandchildren assembled there on her birthday.

A controversy of ten years' standing was settled by the Catholic Knights of America a few days since at Kansas City, when the annual convention voted to admit women to the order. The women, however, will be permitted to carry but \$1,000 insurance, or one-hal the amount allowed to men.

An English woman has started a new line of remunerative business, the cleaning of bicycles. She has her regular customers, to whose houses she goes at stated intervals for about 12 cents a visit.

The oldest queen of Europe now is mirror in the putting on and taking off the queen of Hanover, who was 81 of the article. All of which may be a years old in April. Queen Victoria comes next, being 80, while the ex-Empress Eugenie is 73.

Rev. Auna H. Shaw, before sailing for Europe, insured her life for the benefit of the woman suffrage cause.

A MYSTICAL NUMBER.

OMNIPRESENT SEEMS TO BE THE FATEFUL SEVEN

From the Diblical Story of the Creation Down It Plays a Mighty Part

Unclear by twos, The dove in the heavens Is the one that I choose.

But not only do the bird auguries go by sevens; the number plays a mighty part in folklore, tradition and his tory. Six days made the world, and God rested on the seventh day and hallowed it. In the seventh month Noah's ark touched the ground; in seven days a dove was sent out on the face of the waters. Abraham pleaded with God seven times for Sodom's sake before God smote the city of wickedness to her undoing.

Seven days Jacob mourned for Jo seph and would not be comforted; sev en years and seven Jacob served for Rachel, and in Joseph's governorship of Egypt the chief butler and baker freamed dreams wherein seven fat oxen and seven lean oxen, seven ears of full corn and seven ears of mildewed corn played a prominent part and foreboded the 14 years of plenty and of famine that were in store for the Land of the Two Crowns, even the land of the iouse of bondage, the land of Egypt. Every seventh day the law was read to the wandering children of Israel, and Jericho, the strong city, fell, wall and

tower, when seven men had paced around it for seven days. Solomon was seven years building the splendid temple, with all its glories of gold and cedar wood, turquoise and terebluth. There were seven lamps in the tabernacle, and the golden candlestick had seven branches.

Naaman washed bimself seven times in the river Jordan before the healing water cleansed him of his leprosy. The Apocalypse is full of the mystic number, and on the cross our Saviour bung for seven hours, and from the cross our Saviour spoke sev en times. The seventh son of a seventh son

a born doctor, according to Irish bellef, but be must never take money for the cures he achieves, and to insure recovery he should be sought before sunrise or after sunset on Friday. "It is manifest by experience that the seventh male childe, by just order (never a weach being born between), doth heal only with touching, through a natural gift, the king's evil; which is a speciall gifte of God, given to kinges and queenes, as daily experience doth witnesse." There were seven wise men and seven wonders of the world; while the ancients not only noted the suportance of seven as an astronom ical period, but also connected the seven metals then known with the seven planets and the seven colors.

Thus copper belonged to Venus, and the color green; lead to Saturn, and the color blue; gold and reliow to the sun, and so on. The seven days of the week are con

nected with the seven pleiades, of

For seven years the mischievous sprife, Friar Rush, lived with | dirt" in a day.-Cincinnat) Enquirer. tue Seeland monks, beguiling the time by cutting only cudgels, which, when struck on the ground, turned into soldiers armed cap-a-pie, and for seven years Prince Charming looks for his lost bride, or Cap-o'-Rushes works disguised in the kitchens of the palace, or the forsaken princess tries to climb the glass mountain which lies between her and her lover, who has drupk of the water of forgetfulness. The seven deepers are famous, and the number seven even comes into the employ of folk medicine. Water taken from seven streams where cresses grow will cure the jaundice, and seven twigs of aspen put under the patient's pillow will recover him from paralysis, and seven leaves of Ivy will bring a careless lover back to your side and keep him there, and seven corns of wheat, eaten fasting, will heal you of the falling sickness, which is epilepsy, and seven mistletoe berries put in a bag of red silk and bung round your neck will protect you from sunstroke and elf bolt and preserve your feet from blisters, bowever far you walk.

It is not spring until you can put your foot on seven daisies at one and the same time, and seven hairs will keep the evil eye off children, according to an old Indian superstition, only the hairs, to be of any avail, must be plucked from the tall of an elephanta difficult, a delicate and even a dan gerous proceeding. At 7 years old all eats become possessed of witch's pow ers, and woe betide those who ill use or frighten puss when once she has nequired power of mischief! But let this not discourage the lovers of the nine liced one for-

Wherever the cat of the boose don't lack For seven years blow white, blow black, The lasses of lovers shall have no lack, Seven years of ill fortune, according to a Sicilian superstition, follow her or him who kills a cat: therefore it were well to treat your feline followers gently, even though you love them not. But might go on till the "seventh day from Latter Lammas" and still have something to tell. So here I make an end.-Nora Hopper in Illustrated Lon-

don News. Snek and Bac. The Pittsburg Chronicle tells of a woman who dearly loves to use big

words, and she does not always use The other day a neighbor complained of incessant pain in her back, whereupon the user of big words said: "I would consult Dr. Pellets for pains in the back. He's the finest barteriologist that I know of."

A ROPE OF WORMS.

The Curious Procession That May Be Seen in Norway Forests. In the deep pine forests of Norway the woodcutters sometimes find a ser pentine object nearly 50 feet long erawling slowly over the ground. If they did not know that it was made up of millions of little worms, they might be frightened by its peculiar appearance. These worms, called the sciara, gather during July and August in large numbers preparatory to migrating in search of food or for change of condition. When setting out on this journey, they stick themselves together and form a huge serpentlike

between 40 and 50 feet and several inches in thickness. As the sciara is only on an average about three thirty-seconds of an inch in length and barely wider than a fine needle, the number required to compose a line of the size above mentioned is enormous. Their pace is ing. "I think it is a shame the way very slow, and upon meeting an obstacle, such as a stick or stone, they will either writhe over or around it. ometimes breaking into two bodies

mass, often reaching a length of be-

for this purpose. M. Guerin-Meneville, a celebrated French naturalist, says that if the rear portion of this wonderful snakelike procession be brought into contact with the front part and a sort of circle formed the insects will keep moving round and round in that circle for hours and hours without apparently noticing that they are not getting on in their journey. If the procession fore a Hoosier justice of the peace the be broken in two, the portions will reunite in a short time.

The Norwegian pensants, when they following impartial verdict: "We the meet one of these trains, will lay some | jury agree to find judgment for neither article of their clothing, such as a belt | plaintiff nor defendant and find that or handkerchief, on the ground in each pay half the costs." It is said the front of it. If the procession passes | verdict struck every one as being so over it, it is regarded as a good sign; unusually fair that even the parties to but if it makes a way round, the rette action were satisfied.—Case and terse is believed.—Chicago Record.

pear Ichang, in the province of Hupeh, "Others, though, walt till the last each year gold has been washed from minute, then come bustlin along as if the banks of coarse gravel on both they was too rushed to buy a ticket sides of the river Han, and in the or as if they had one in their pocket. midst of the auriferous district there Why, I've even been asked by 'em to is an ancient town called Li-klu-tien, row 'em out to a ship after she'd got which means "gold diggers' inn." Its lear out into the stream. If a shipper nhabitants subdivide the gold bearing appens to be good natured, he'll slack ground among themselves annually, up an take passengers aboard. An staking out their claims with partiafter all that bother I've had to bring tions. They pay no royalty and apem back again, for pary a red did they pear to earn no more than a bare subsistence. But this may be doubted, as "This class of deadheads is gen'rally

John Chinaman is an adept at "layin supplied with clothes, gripsacks, hat-The annual river floods bring down las, cameras, foldin chairs an somemillions of tons of mud and sand from times a servant." the mountains, and this mud and sand,

hate to tackle a woman." "Women stowaways?" give up milk and eggs as a diet," said was on, I used to bring in as many

girls-little slim things, goin to the ley gold mines with no more outfit than the thin clothes they stood in. in makin an escape is the gittle aboard Nobody knows who's who the day

people who were beginning to find a ship's leavin port. If she's crowded stair climbing difficult and who were so much the better. The stow can losing their elasticity much benefited hide in the hold without bein spled by eliminating these articles from their But it's mighty hard to git past the diet. "There has been a great increase Heads, for by that time the ship's in the duration of life below the age of been searched an the stows vanked out 50. statistics prove." he said. "but beon dock " yond that period there has been no Captain Jack spoke truly. The stowaway who passes the Heads has

run the gantlet safely-unless an incoming vessel be at hand to convey child just beginning its struggle with the lutruder back again. When the final gong has been sound

ed, the warning "All visitors ashore!" given, the gangplank withdrawn, the last rope loosened and the screw turned, the vessel's luterior is care fully explored. Meanwhile Captain Jack's weather beaten boat is speed ing in its wake. If a stowaway be discovered a signal is sent from the pilot's bridge and Captain Jack is quickly alongside. A rope indder is note gently on this instrument than it | lowered, and toward it the purser or other officer and his aids excert the discomfited "stow."

man's Life, it is easy to verify it, if "Every day," continued Jack, " git away. They're broke, an thought on to make a note sound, they may be they'd try their luck in some other place. I lump most of 'em off at Meiggs' wharf. It's a heap easier for me an for the stows. There's more lumber there an fewer folks to stare pounds is thrown upon a single key to | Some of 'em turns out all right, an some is afterward fished out of the bay. Then they go to the coroner A dead man, it seems, is worth more

The average "tonnage" of an hom's ant girl wears a simple crown of myr playing of Chopin's music varies from tle with her national costume-varying with the district, but always charming -and pots of myrtle are carefully In the main hall of one tenement, on cherished by girlish bands through the the ground floor, we counted 17 chillong winters in anticipation of the dren, says Jacob A. Rlis in The Atlan-

Backache and kidney ache are twin You can't separate them-

If they are not strong and healthy you ) may expect aches and pains and sicknesses of all sorts—

If the kudneys are well and strong the
rest of the system is pretty sure to be in
vigorous health—

Doan's Kidney Pills make strong, healthy kidneys—not now and then, but every time—no matter what the trouble is, if it's from the kidneys, Doan's Kidney Pills will cure it.

ASTOWAWAYSLEUTH

ODD VOCATION OF AN OLD SAN FRAN-

He Runs His Prey to Water Instead

This weather hardened, wrinkled man would be stowaways. He is known as Captain Jack, but his name has half a Wounded (officers). dozen variations, all of which smack of Wounded (men) ... the salt, salt sen. These are some of Missing his allases: Wharf Rat, Water Fowl, Sea Dog. Whiler, Old Man Jack and tion of the Fourth appears to have been

shrewdness in "spotting a stow" and a greater, and it is exaggration to say that battered but seaworthy old boat which | the disasters sustained on the American through successive sensons. The town's by the casualty record of a single Indoattractions do not lure him from his pendence day celebration. stand aside.

ods. Some langs round the docks nfore a ship sails, offerin to lend a hand, or proposin to work a passage somewheres. When they find this don't go the way they want it to, they ommence to talk big-inquire bout time it takes to git to the islands or Alaska or Panama. They're always just a goin to make the trip. But sick an tired lookin about 'em that it been drivin' to dis station fo' 'bou gives 'em dead, away-lenstways it twenty years, sah.

The Chicago Tribune has kept account f the Fourth of July accidents and publishes a casualty list, including return from 250 cities and towns. Some of the figures are as follows:

fured by cannon crackers njured by powder explosions ... ninred by toy cannon...

Hil by stray builets. This is only a partial list. If full returns were at hand, the probability is that the number of dead and injured would be found to be at least 50 per cent. in exense of the Chicago estimate. All told, the casualties are equal to average spatained in a pitched battle. In all the engagements of Shafter's army in Cuba the losses were as follows:

below the Santiago record, but the num-His stock in trade consists of his ber of the wounded is considerably When it comes to Fourth of July patriotism, the actualities of war must
