CHAMPIONS DOWN GRIFFITH'S MEN

Hughes Easy for His Former Team Mates.

FAST GAME AT ST. LOUIS

Twelve Innings to Decide—Comiskey's Warriors Trim Napoleon Lajoie's Men.

NEW YORK, April 16.—The Boston champions played all around the New York team today, beating it by a score of 12 to 6. Hughes, the former Boston pitcher, was in the box during the first four innings, and his former club mates batted him heavily. Putnam relieved Hughes in the fifth and pitched effectively. The holding of the visitors was almost perfect throughout, the infield plays being particularly snappy. The score:

Table with columns: R, IB, PO, A, E. Boston vs New York.

Batted for Putnam in ninth inning.

ST. LOUIS, Mo., April 16.—Smartering under the trouncing they received in the opening game with the Detroiters, McAleer's band of Brown Sox went into the game this afternoon with a win-or-bust air of determination, but they failed. Score:

AGUR CAPTURES CANARIS STAKES

Never Headed After the Quarter Pole.

SILVER DREAM A WINNER

Garson's Horse Medium of Plunge Play by Big Bettors in Rockaway Event.

NEW YORK, April 16.—A crowd of 15,000 people viewed the races at Aqueduct today. The feature event of the card was the Canaris Stakes for two-year-olds, and it was won in rather hand fashion by James R. Keene's St. Leonard's colt Augur, who took the lead at the quarter pole and was never afterward headed.

BUREAU'S BANQUET A GREAT SUCCESS

Eight Hundred Guests Cheer Winners—Prizes Distributed to Best Men in All Classes.

The Bureau Bowling Club last night held a reception at Washington Light Infantry Armory hall in honor of having won the championship of the Departmental League. The event was by far the largest and most successful ever held by a bowling club in this city. Over 800 persons were in attendance.

The reception, while given under the auspices and expense of the Bureau Club, was really an affair of the Departmental League. Prizes for the season were awarded to the winning club and all the players of the league who led in their respective averages.

Joseph Hardie, of the Bureaus, landed the most prizes, winning four first individual prizes and a second. The Bureau was formally presented with the cup for the best club. The Bureaus were honored only after a close fight, beating out the Interiors, which, last year, won The Washington Times cup.

The individual prizes which were awarded are as follows: Highest individual average—First, Joseph Hardie, Bureaus, 230; second, Brozman, G. P. O., 210 order. Highest average in strikes and spares—First, Hardie, Bureaus, 104; second, Brozman, G. P. O., 103. Highest average for strikes—First, Crist, Navy Yard, 104; second, Hardie, Bureaus, 103.

Young Corbett and Harry Pollak, his manager, sailed for Europe today, on what they announced was simply a pleasure trip, and with no fights contemplated. Corbett said that he wished to escape the hot weather, and would probably remain abroad for three months, traveling through all parts of Europe during that time.

While Young Corbett may not at present have any match in view, it is likely that he will be asked to meet Ben Jordan, the English featherweight, and if sufficient inducements are offered it is probable that a match will be arranged to take place in June.

A very curious application of ozone to the laundry business has been recently made in Paris under the auspices of the city government. A location in the St. Honoré market was given for the purpose and the entire plant will revert to the corporation at the expiration of twenty-five years, during which period the entire works are to be open to inspection by delegates and students of hygienic methods of laundering.

The method is such that articles pass rapidly through the various processes from the first reception to the final delivery. The electric current destined for lighting the establishment, and for the "ozoners," which are actuated by eight motors, is developed in vertical cylinders of fifty-five horsepower each, coupled directly to two dynamos of thirty-seven kilowatts each, a total of seventy-four kilowatts. The "ozoners" are located in a special room expressly guarded against possible intrusion, because of the danger from the high potentials utilized for the work.

A package of soiled apparel on arriving is at once marked with a designating tag, which remains attached through the various processes up to delivery to the couch part of others, has a comfortable resting place on the edge of his grain field, from which vantage ground he can watch the various exercises, feathered and otherwise, that infest the country.—Scientific American.

London Idler relates the following: "When Chauncey Olett was in Ireland he visited the Washing Well at Killarney with two plain, elderly spinsters. Beside the well sat an old Irish woman, who looked up into Mr. Olett's handsome face and asked, 'What are you wishin' for? 'What do you think I wish for?' he good-naturedly inquired. 'Och, thin, for a beautiful young swateheart, of course,' said she. He pointed to the two spinsters, who stood at a little distance, and said: 'Don't you see I have a wish for me? 'AB, thin, it's the grace of God you'll be wishin' for!' replied the sympathetic old woman.

EASTERN EASY FLAG WINNERS

Certain to Get Pennant in Railway League.

BOWLING SEASON IS PASSING

Whitney Will Again Carry Off Individual Honors—Roadways Have Gained on Northerns.

In two more weeks the 1903-04 bowling season will come to an end with the closing games in the Railway Relief Association League. The rivalry of the season is so near and the Easterns have such a large lead over the other clubs that they are almost certain to win the championship.

The Roadway team gained on the Northerns in the past week, and it is probable the former will wind up in second place. Whitney will again carry off the individual honors, repeating his performance of last year. He is by far the best bowler among the Railway men, and has a substantial lead over Stab, who in turn far outclasses the others.

The standing of the teams and individuals follow: Club Standing. Club. Games Played. Won. Lost. Pct. Eastern, 61. 36. 15. 706. Roadway, 48. 20. 18. 625. Northern, 48. 20. 28. 652. Mechanical, 48. 26. 22. 541. N. Eastern, 42. 22. 20. 523. Eastern, 45. 22. 23. 514. Columbia, 45. 22. 23. 488. Officers, 44. 22. 22. 497. Stettin, 45. 22. 23. 497. Lighting Co., 36. 2. 34. 209.

ARIZONA INDIAN ON A FARM. In the West, particularly Arizona and New Mexico, the natives are grain raisers; and that they were past masters in irrigation and agriculture is known to any one who has made an examination of the Southwest, where their story is told to the observant traveler. The Chemehuvi of today, when he plants his corn, watches it with the greatest care. Sometimes he builds a scarecrow. One observed by the writer was a laughable imitation of a Moulou, the Chief of the Southwest, who were everywhere in the vicinity.

The first mentioned Indians often build a sort of rustic couch, which is topped with a fantastic bowler and in this, at his ease, the native farmer tends his growing grain. This resting place for his head is so ingeniously made. The lower portion is formed of two logs laid parallel, about 7 feet apart; over this are placed limbs of mesquite or willow for slats. Four corner posts are inserted and outside slats fastened to them with string willow. The builder then cuts young willows 15 feet or so in length from the neighboring river bottoms and inserts them into the sandy ground, at head and foot, interlacing them at the top, where they form a perfect canopy from the hot sun.

On the windward side he piles up other willow branches, and throwing over the couch part of others, has a comfortable resting place on the edge of his grain field, from which vantage ground he can watch the various exercises, feathered and otherwise, that infest the country.—Scientific American.

PAUL JONES MEMORIAL. BOSTON, Mass., April 16.—A bronze tablet, said to be the first memorial to John Paul Jones erected in this country, has been unveiled at the school building bearing his name in East Boston. The memorial is the gift of the Paul Jones Chapter, Daughters of the American Revolution.

BUNN CHAMPION REVOLVER SHOT

Made 242 Out of Possible 300 Last Night.

BEAT FERREE FOUR POINTS

Championship Contests Aroused Great Enthusiasm; and Much Interest. Looked a Winner.

The District championship in the matter of accuracy with the revolver was won last night at Center Market. Arvid Bunn, of the Metropolitan Police force, with a score of 242, out of a possible 300, after a spirited contest.

The contest was held under the auspices of the Washington Revolver Association, and a handsome trophy was awarded the victor. The practice was at twenty yards, six strings of five shots each. The possible total under the rules was 300, but, of course, was impossible of actual achievement. The scores, under the difficult circumstances of the match, were considered exceptionally good.

The match was between the National Guard and the Metropolitan Police force, each of which organizations furnished three of the contestants. Mr. Bunn represented the Revolver Association. The rivalry was intense and there was much satisfaction in the victorious clans when the result was announced and Private Bunn awarded the trophy. He had won by the narrow margin of four points.

The detailed score was as follows: The Score. E. A. Byrnes Revolver Association—40, 37, 28, 26, 32, 44—227. St. F. W. Holt, District National Guard—41, 35, 37, 42, 43, 35—223. J. W. McCormick, Metropolitan Police force—28, 29, 34, 48—202. D. E. Langley, Metropolitan Police force—32, 35, 33, 37, 34—202. Lieut. W. M. Farrow, District National Guard—42, 45, 42, 35, 36—207. J. C. Bunn, Metropolitan Police force—38, 45, 39, 42, 39, 39—242. Capt. Sheridan Ferree, District National Guard—39, 41, 42, 41, 35, 35—238.

MENTAL QUALITIES INHERITED. Professor Karl Pearson, F. R. S., in his Huxley memorial lecture at the Anthropological Institute in London, after giving evidence to show, and declaring his belief that mental as well as physical qualities are inherited from parents, called attention to the present lack of intelligence in British professional and working men. He does not think the remedy is to be sought in foreign methods of instruction or in technical education. Intelligence must be bred, and we are censuring, he thinks, to breed it as we did 50 or 100 hundred years ago. The only possible remedy is to alter the relative fertility of the good and bad stocks in the community. We are, it seems, at the beginning of an epoch which will be marked by a steady increase of the average intelligence of the race. For the last 40 years the intellectual classes, enervated by wealth or love of pleasure, or following an erroneous standard of life, have ceased to give us the men we want to carry on the ever growing work of our empire; to battle in the forefront of the ever intensified struggle of nations. With so many professors lecturing us on our shortcomings, we shall soon begin to feel ourselves in a bad way.—London Globe.

With so many professors lecturing us on our shortcomings, we shall soon begin to feel ourselves in a bad way.—London Globe.

MENTAL QUALITIES INHERITED. Professor Karl Pearson, F. R. S., in his Huxley memorial lecture at the Anthropological Institute in London, after giving evidence to show, and declaring his belief that mental as well as physical qualities are inherited from parents, called attention to the present lack of intelligence in British professional and working men. He does not think the remedy is to be sought in foreign methods of instruction or in technical education. Intelligence must be bred, and we are censuring, he thinks, to breed it as we did 50 or 100 hundred years ago. The only possible remedy is to alter the relative fertility of the good and bad stocks in the community. We are, it seems, at the beginning of an epoch which will be marked by a steady increase of the average intelligence of the race. For the last 40 years the intellectual classes, enervated by wealth or love of pleasure, or following an erroneous standard of life, have ceased to give us the men we want to carry on the ever growing work of our empire; to battle in the forefront of the ever intensified struggle of nations. With so many professors lecturing us on our shortcomings, we shall soon begin to feel ourselves in a bad way.—London Globe.

NAVAL ACADEMY BESTS VIRGINIA

Score Was 4 to 3 in See-Saw Game.

PEGRAM PARTICULAR STAR

Captain of Middies Drove in Two Runs and Scored Last Tally by Brilliant Running.

ANNAPOLIS, April 16.—The most interesting game of baseball remembered to have been played here took place this afternoon, when the Midshipmen defeated the University of Virginia by a score of 4 to 3.

The game was brilliantly played, but the greatest interest arose from the fact of the see-saw manner in which the runs came. Pegram, the captain of the Middies, was the special hero of the day, making two two-base hits, which drove in three of the runs scored by the Navy. Pegram scored the winning run himself by splendid base running on McWhorter's hit. The score by innings:

Virginia.....0 100 0 0 1 1—3 R. H. E. Annapolis.....0 0 0 2 0 0 2—4 6 1 Batteries—Pollard and Munger, for Virginia; Hughes and Symington, for Navy.

BREEDING LIONS IN CAPTIVITY. For years back, within the classic precincts of Phoenix Park, the authorities of the Dublin Zoo have been breeding lions at a rate that has been touched by no other menagerie in the world. The climate of Ireland, which is so inimical to poisonous reptiles, seems to benefit the raging lion of the Nubian deserts to such a marvellous extent that he actually thrives better in the open air within smelling distance of the River Liffey than he is accustomed to do in his native Africa. For some mysterious reason these animals flourish and breed in the Dublin Zoo. As a result the council of the Dublin Zoological Gardens in the autumn of last year found themselves in the happy possession of no fewer than 30 home-bred lions, Stratis Budget.

SPORTING AND ATHLETIC

If there is any specialty in making Baseball Uniforms, Caps, Sweaters, Shoes, Mitts, Gloves, Masks, Bats, Balls.

You will find it here, on seeing our productions. We have a fine and extensive stock on hand of the best made monograms and letters on caps and suits. Embroidered to order. Everything first class and up to date. Tennis and golf supplies; direct agents for Morris and Old Tom Caneos.

Walford's, 625 Pa. Ave. N. W., 909 Pa. Ave. N. W.

Suits to Order, \$14, \$18, \$22. Glasgow Wooten Mills, Tailors, 615 Pennsylvania Avenue.

Baseball Uniforms. It's made of the material. Complete marking, stitching of the highest order. It's an unprecedented value at \$2.00. M. A. TAPPAN, 1339 F St.

Our \$15 HARNESS, \$10. We are offering our regular \$15 Bugby or Runabout Harness at \$10. Other grades proportionately reduced. S. BENSINGER, The Bazaar, 940-942-944 Louisiana Avenue.
