16 PHYSICIANS BAFFLED. PE-RU-A Cures a Case of Dyspepsia Which Doctors Had Given Up.

ROCHESTER, April 1.—Immense interest has been aroused by Mr. A. C. Lockhart's remarkable recovery, and his own personal statement will cause tremendous interest in the remedy that saved his life. He states: "I am nearing forty-four years of age, was born and raised in Rochester, N. Y., and have been unlucky enough to be among the poor and obliged to work for a living. "About fifteen years ago I commenced to be ailing, and calling a physician. "He pronounced my trouble a species of dyspepsia, and asked me, after he had treated me about six months, to get a leave of absence from the establishment by which I was employed (all told about twenty-five years) and go into the country, where I would get a change of life and fresh air. "I did so, and got temporary relief. I went back to work and was again taken with very distressing pains in my stomach. I seldom had a passage of the bowels without force. "I consulted another physician, with no better results. My disease kept growing on me, until I had exhausted the ability of 16 of Rochester's best physicians. Can tell their names if necessary. "The last physician recommended me to give up my work and go South, after he had practiced on me for one year. "They gave me a thorough examination with the X-Ray, with no results. They could not even determine what my ailments were. "I do not, and never have taken any stock in patent medicines, but your testimonials in the Rochester papers were worthy of consideration. "I told my wife I was going to try a bottle of the Peruna. The next time I went to the city I purchased a bottle, and before the bottle was half gone I noticed a change for the better. "I am now taking the fifth bottle, and have not an ache or pain anywhere. "My bowels move regularly every day, and I have taken on eighteen pounds of flesh, my usual weight being 145 pounds. "I was down, at one time, as low as one hundred and twenty-six pounds. "I have recommended Peruna to a great many, and they have recommended it very highly. "I have told several people who complained of that species of catarrh that if they would purchase a bottle of Peruna and take it according to directions, and if when the bottle was gone they could come to me and tell me candidly that they had no benefit, I would pay for the bottle of medicine. "I have so far had no complaints, but all first-class recommendations."—A. C. Lockhart, 27 Atkinson street, Rochester, N. Y.

Will the Doctors Give Per-na the Credit? A number of members of the medical profession who have been treating Mr. Lockhart have been puzzled and surprised. Mr. Lockhart has become so well-known and his ailment had been the subject of so much speculation and experimentation that his recovery and health should create deep interest among the doctors who have had the opportunity of studying and prescribing in his case. People prejudiced against proprietary medicines will no doubt belittle this cure as much as possible, but Mr. Lockhart and his family and his neighbors believe in the statements recited herein have perfect foundation. "Peruna has been doing much good in relieving untold cases of catarrh and catarrhal diseases in the United States, as well as in other sections of the world. A great many prominent men and women know by experience that Peruna has special virtues in relieving catarrhal affections of the stomach and digestive organs but, of course, it does not happen every day that so desperate a case as Mr. Lockhart's comes to public notice. Proof of Peruna's Merit. The fact that he had tried so many physicians—the fact that he had spared no pains or expense—had been examined and had been treated by specialists—had passed through all kinds of experimentation and manipulation and yet received no benefit—and then, all of a sudden, he was cured, and he felt much to important and startling to escape the notice of the ever-vigilant public press. Magazine Writers and the People. Magazine writers who make a specialty of assailing patent medicines are liable to shut their eyes against this kind of literature coming from the people. But, the people are always inclined to listen to practical proofs uttered by practical people, versus theoretical writers who know but little of the great masses and their needs. Revised Formula. "For a number of years requests have come to me from a multitude of grateful friends, urging that Peruna be given a slight laxative quality. I have been experimenting with a laxative addition and received no benefit—and then, I was gratified to announce to the friends of Peruna that I have incorporated such a quality in the medicine which, in my opinion, can only enhance its well-known beneficial character."
