That the flotation of its new issue of \$2,525,200 of additional capital stock has been effected successfully by the American Telegraph and Telephone Company was proved when the corporation issued a statement showing that more than 25 per cent of the new stock already had been taken. Of this, 20,000 shares were taken by a prominent London financier not connected with any banking house or syndicate, and who had been identified prominently for many years with American investment securities.
