POPULAR MEDICINE BY DR. HIRSHBERG

Intelligent Observation of Rules of Hygiene Will Decrease Illness.

By DR. L. K. HIRSHBERG.

If you have jerks, twitches, jumps, fits and spasms of your face, are you willing to exchange them for a partial or temporary paralysis? If so, go to your family physician and ask him to use the new method of injecting alcohol into the facial nerve at the angle of your jaw.

Spasms of the face muscles are seldom, if ever, the natural movements of the muscles. Usually they are the result of habits, imitation, inheritance, accident or disease.

Spasms of the face muscles are seldom, if ever, the natural movements of the muscles. Usually they are the result of habits, imitation, inheritance, accident or disease.

The paralysis is never permanent. Sometimes a month up to several years after the restoration of function, the spasm itself returns, but in some sufferers, I am happy to say, it never comes back.

UNIONS TO OPPOSE FORCED ARBITRATION

Against Legislation Which is at All Similar to Canadian Act.

Any railroad legislation that embodies compulsory arbitration or provisions similar to the Canadian law will be vigorously opposed by the labor unions.

"Moral suasion is better than force," said Mr. Forham, discussing plans for railroad legislation before the committee.

"There can be no compulsory arbitration without jail sentences and fines. There is no reason why an inquiry should not be held while a strike is going on.

Mr. Gompers told the committee that he was opposed individually and officially to legislation that would prevent the cessation of work and take from the men employed by the railroads the right to quit work in concert.

Mr. Gompers also said the Canadian disputes act had not prevented strikes.

Prof. Pupin is also president of the Institute of Radio Engineers, a member of the national advisory committee for aeronautics, and an inventor of many of the contributed valuable ideas for the telephonic, telegraphic, and wireless arts.

"Interference should be eliminated not by legislation, but by perfection of the art," he said, and drew a comparison between the development of the telephone and telegraph, which he said would never be where it was today if the government had taken over the systems.

Pupin told of one wireless invention for which private companies paid royalties and the navy appropriated it to its own use for nothing.

"Germany has left development of wireless art," he said, "to private enterprise."

Dr. J. S. Lemon, formerly professor of child psychology at Clark University, will read a paper on "The Relations of Psychology to Philosophy" at the meeting of the Society of Philosophical Inquiry tomorrow afternoon at the Public Library.

OPPOSES CONTROL OF RADIO BY U. S.

Prof. Pupin Says Government Would Smother Healthy Young Baby.

Characterizing the wireless art as "a very promising and healthy young baby which the proposed bill for government control would take away from its lawful parents and place in a government institution," Prof. M. L. Pupin, Columbia University, testified before the House Committee on Merchant Marine and Fisheries, the first of the opponents of the measure.

"The bill is most detrimental to the development of the very young wireless art because it will inevitably lead to government ownership," said Pupin.

"Interference should be eliminated not by legislation, but by perfection of the art," he said, and drew a comparison between the development of the telephone and telegraph, which he said would never be where it was today if the government had taken over the systems.

Dandruff Heads Become Hairless

If you want plenty of thick, beautiful, glossy, silky hair, do by all means get rid of dandruff, for it will starve your hair and ruin it if you don't.

It doesn't do much good to try to brush or wash it out. The only sure way to get rid of dandruff is to dissolve it, then you destroy it entirely.

You will find, too, that itching and digging of the scalp will stop, and your hair will look and feel a hundred times better.
