WIVES READY FOR STRIKE HARDSHIPS

Their's the Task of Making Ends Meet When Wages Cease.

She was a little woman, and lines from hard work showed about her mouth as she told of what the wife of a striker will do to help her husband...

Those Who Know Best

"Do the wives of these conductors and motormen believe in what their husbands are doing?" began Mrs. Slater. "That is a rather foolish question, I think. We are the ones who really have to make both ends meet..."

Work in Another's Family

"But there was one woman with a big family of babies. She was very unfortunate, then the rest of us took her into the house and fed and housed them during the trouble. You won't find a more loyal group of women in Washington today than those who are going to stick by their husbands who are asking for what is fair, and for nothing more."

Can Anybody Blame Them?

Seventeen years ago Mr. Slater, just through serving a term of enlistment in the navy, married Mrs. Slater and they settled down. He then started as a motorman for the Washington Railway and Electric Company. He has since acted as a stamper, an inspector, and in other positions awarded to the most faithful and conscientious of the company's employees.

Anti-Discrimination Clause

The Capital Traction Company's agreement with the union contains the following provision: "There shall be no discrimination exercised by or against any employe by either party hereto because of his membership or non-membership in the association..."

Union Men Complain

At union headquarters today and last night a number of shopmen and barn employes reported they had been discharged for refusing to denounce the union. Although ordered by the superintendent and foremen not to report for work tomorrow, the employes were instructed by the union officials to show up as usual. All the men who said they were discharged were cautious against accepting "their time" or full pay up to the time their services ended.

Doctor Tells How to Quickly Strengthen Your Eyesight at Home

Bon-Opto Strengthens Eyesight. Dr. Lewis says Bon-Opto is a strengthening agent for the eyes. Nuxated Iron to Make New Age of Beautiful Women and Vigorous Iron Men

Say Physicians—Quickly Puts Roses Into the Cheeks of Women and Most Astonishing Youthful Power Into the Veins of Men—It Often Increases the Strength and Endurance of Delicate, Nervous "Run-Down" Folks 200 Per Cent. in Two Weeks' Time.

A Wonderful Discovery Which Promises to Mark a New Era in Medical Science

NEW YORK, N. Y.—Since the remarkable discovery of organic iron...

Without it, no matter how much or what you eat, your food merely passes through you without doing you any good. You don't get the strength out of it, and as a consequence you become weak, pale and sickly looking, just like plant life if you are not strong or well, you are not fit to do anything.

Dr. E. Sauer, a Boston physician, who has studied both in this country and in great European medical institutions, said: "As I have said a hundred times over, organic iron is the greatest of all strength-giving foods. I am convinced that the lives of thousands of persons might be saved who now die every year from pneumonia, grippe, consumption, kidney, liver, heart trouble, etc. The real and true cause which started their disease was nothing more nor less than a weak condition brought on by lack of iron in the blood."

Not long ago a man came to me who was nearly half a century old and asked me to give him a preliminary examination for life insurance. I was astonished to find him with the blood pressure of a boy of twenty and as full of vigor, vim and vitality as a young man. In fact, I found him really was, notwithstanding his age. The secret, he said, was taking Nuxated Iron. He had filled him with renewed life. At 29 he was in bed half all; at 46 he was careworn and nearly all in Now at 55 after taking Nuxated Iron he is a man of vitality and his face beaming with the buoyancy of youth. Iron is absolutely necessary to enable your blood to change food into living tissue.

Dr. Howard James, late of the United States Public Health Service, says: "Patients in an enervated and debilitated state of health, those, for instance, convalescing from protracted fevers, those suffering from a longstanding case of anaemia, all such people in my opinion, need a restorative and upbuilding agent in these cases above mentioned."

NOTE—Nuxated Iron, which is prescribed and recommended above by physicians in a vast variety of cases, is not a patent medicine nor secret remedy, but one which is well known to druggists and whose iron contents are widely prescribed by eminent physicians both in Europe and America. Unlike the older inorganic iron products it is easily assimilated, does not irritate the stomach, does not make black, nor upset the stomach, on the contrary, it is a most potent restorative and upbuilding agent in these cases above mentioned."
