# "Turnover"

Swift & Company has referred frequently to its small profit on sales. This has raised the question, "how many times do you turn over your capital?"

Last year Swift & Company turned over its invested capital (capital stock plus surplus) nearly six times.

This, together with our large volume of business, made it possible to operate on a profit of only 1 1/2 cents on each turnover. Since there were about six turnovers, our total profit amounted to about 7 per cent on capital and surplus.

This profit amounted to 11 per cent on capital stock alone. We include surplus as part of our total investment, because that is tied up in plants and equipment and huge supplies of products in process of manufacture and on the way to market, just as is our capital stock.

If the turnover had been based on inventory instead of on capital, the figures would have been about the same, because the average value of our stock of goods on hand was about equal to our investment.

The profit, from all sources, averaged only 1/4 cent per pound on all products sold, and obviously had practically no effect on prices.

Our books are audited by certified public accountants, and are of course open to inspection by the U. S. Internal Revenue Department. We want people to know and to understand our business.

## MORGANATIC WIFE OF KING WELCOMED

Alexander of Greece Takes Bride To Paris—May Be Officially Recognized.

PARIS, May 25.—Paris, always keenly and sympathetically interested in affairs of the heart, is delightedly observant of the visit of King Alexander of Greece, with his morganatic wife, the beautiful Mlle. Aspasia Manos, daughter of a former aide-de-camp to his father, King Constantine, who is residing here. It is strongly rumored, according to dispatches from Athens, that Alexander's marriage to Mlle. Manos may be officially recognized by the Greek Constituent Assembly, and she will share his throne with him. In the meantime, however, Alexander is here incognito and treated strictly as such by official France, but tactically hailed as an idyllic lover by the press and by those of the public he and his bride encounter on their frequent trips about the city.

While the Greek legation here refuses to confirm or deny the wedding of Alexander and Mlle. Manos, it has been an open secret for some time. It has especially endeared Alexander to the French people because one of his reasons is said to have been his mother, Queen Sophie's desire that he marry into the German or Austrian nobility.

On the other hand, the principal opposition now to the official recognition of the marriage is said to come from Premier Eleutherios Venizelos of Greece, whose ambition is said to be to eliminate the house of Constantine from Greece forever. It is said he was instrumental in having a certain high ranking Greek military officer demand the king banish Mlle. Manos from his court, which he did. Mlle. Manos first went to Italy and thence to Paris where she awaited the arrival of Alexander. He soon followed her and they have been seen together much in public lately, on one occasion going to Versailles, where they lunched together and visited the gardens.

The Greek Constituent Assembly will not meet until the Turks sign the peace treaty. When it does it is believed certain the question of recognizing Alexander's marriage to Mlle. Manos will be taken up.

## Decreasing the Cost Increasing the Joy of Living

Extravagance and laziness are two chief causes of the high cost of living.

The slogan of the present day is Loaf and Spend. The old style of living, the style that made America great, was Work and Save. More work and save more means increased production and decreased consumption.

Some people are so extravagant that they don't consider the cost, especially if they can get it charged. Some of them are so forgetful that they forget to pay.

Some people are so lazy that they cannot carry a package, so they must have it sent.

PIGGLY WIGGLY every day offers you an opportunity to save. PIGGLY WIGGLY has no special prices for a day, but challenges the world on regular prices. Don't be fooled by a one-day Joker.

At PIGGLY WIGGLY prices are lower than elsewhere every day in the week and every week in the year.

During the War many a big gun was covered by trees and shrubbery, the boys in the trenches learned that things were not always what they seemed. They also learned not to believe their own eyes without looking under the surface.

Special prices for a day are often very deceiving. Where there is no profit, there is usually rascality.

You can increase the joy of living by buying at PIGGLY WIGGLY, not only by saving money, but by buying Clean Goods from a Clean Store.
